Supervising for Safety, Session 1

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

KCF Content Area: Health, Safety and Nutrition; Professionalism

CDA Content Area: Safe and Healthy Environments

Learning Objectives

Identify MN Rule 2 licensing standards and best practices of supervision

- Examine and address supervision challenges experienced in family child care programs
- Identify three interaction techniques to utilize while supervising

Session 1 Outline

Section	Overview
Welcome and Introductions	Welcome and Introductions
	 Review and Discuss Objectives
Supervision Basics	Presentation – What is Supervision?
	 Activity – Supervision Challenges
	 Presentation – Active Supervision
	 Activity – What is Capable of Intervening?
Daily Supervision	 Presentation – Drop Off and Pick Up
	 Activity – Creating a Safe Drop Off
	 Activity – Creating a Safe Pick Up
	 Activity – Programming Time
	 Activity – Transitions
	 Activity – Supervising Transitions
	 Activity – Bathroom Supervision
	 Activity – Mealtime Supervision
Prevention of Abuse and Neglect	 Activity – What is Abuse and Neglect
	 Presentation – Preventing Abuse
Closing	Activity - Reflection
	Discussion – Assignment

Supervision

Rule 2 Definition

A caregiving being within sight or hearing of an infant, toddler or pre-schooler at all times so that the caregiver is capable of intervening to protect the health and safety of the child. For the school-age child, it means a caregiver being available for assistance and care so that the child's health and safety is protected.

Caring for Our Children Standards

Caregivers should supervise infants, toddlers and preschoolers by sight <u>and</u> hearing, even when children are going to sleep, napping or sleeping, are beginning to wake up, or are indoors or outdoors. School age children should be within sight or hearing at all times.

Effective Supervision Is:

SPROACTIVE

DYNAMIC

Factors to Consider when Supervising:

- Understand the developmental skills and abilities of each child
- Establish clear, simple safety rules and teach those to children
- Maintain awareness of potential safety hazards
- Have a plan for where supervision of children can be done most effectively to reduce problem behaviors and make sure children are safe. Can the provider see and hear every child from where they are in the space?
- Use positive language and proactive strategies to promote safety with the children

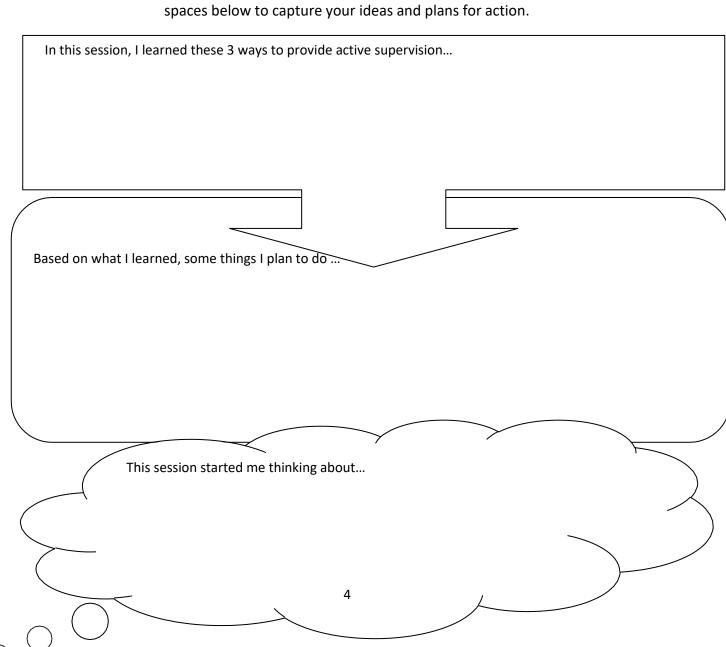

-adapted from: Stepping Stone to Caring for Our Children, Third Edition and Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, Third Edition. Available online through the National Resource Center for Health and Safety in Child Care and Early Education website http://cfoc.nrckids.org/index.cfm

Session 1 - Assignments

- Examine your program through the eyes of a child. Get down to a child level (i.e. on knees, sitting on floor, lying on stomach, etc) and look around. What do you see? What can you touch? What is accessible? What is not? Look at the walls, shelves, furniture arrangements. Are there blind spots, hiding locations, or potential supervision issues? Write down your observations.
- Go to the Consumer Product Safety Website and check to see if any equipment or materials you have in your environment are on the recall list. http://www.cpsc.gov/
- Self-Care Assignment please take a minimum of 30 minutes to take care of yourself, pamper yourself, or release your stress between now and the next time we meet.

Reflection

Take a few minutes to reflect on what you have learned in this session of this class. Use the spaces below to capture your ideas and plans for action.

Supervising for Safety, Session 2

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas, and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

KCF Content Area: Health, Safety and Nutrition; Professionalism

CDA Content Area: Safe and Healthy Environment

Learning Objectives

- Identify MN Rule 2 Licensing Standards and best practices around indoor and outdoor supervision; discuss where there are differences
- Examine and address environmental supervision challenges experienced in family child care program
- Identify three ways to be proactive in the environment

RISK REDUCTION QUIZ

1.	The water temperature in sinks and tubs accessible to children must not exceeddegree	S
	Fahrenheit to prevent children from scalding themselves while washing.	
	110 120 130 None of the above – children must only use cold water	
2.	True or False Stairways of three or more steps must have handrails.	
3.	True or False The open area between the handrail and stair tread must be enclosed with a	
	protective guardrail. The back of the stair risers must be enclosed.	
4.	Gates or barriers must be used on stairs when children between what ages are in care?	
	4 and 12 months 5 and 15 months 6 and 18 months	
5.	True or False Stairways must be well-lighted, in good repair, and free of clutter and	
	obstructions.	
6.	True or False Diapering must not take place in food preparation areas.	
7.	All food and cooking utensils must be stored to protect them from:	
	Dust Vermin Pipe leakage Other contamination	
	None of the above All of the above	
8.	True or False Appliances used in food storage and preparation must be safe and clean.	
9.	True or False Pet cages must be located and cleaned away from any food preparation,	
st	storage, or serving areas.	
10.	True or False All medicines, chemicals, detergents, poisonous plants, alcoholic beverages, and	d
	other toxic substances must be inaccessible to children.	
11.	Toilet training chairs, chairs, stools, and seats must be washed with soap and water when soiled	t,
	and at least:	
	Hourly Every morning and afternoon Daily Weekly	
12.	True or False Every bathroom door lock must permit opening of the locked door from the	
	outside and the opening device must be readily accessible to all caregivers.	
13.	True or False All electric receptacles accessible to children under first grade must be tamper-	
	proof or shielded when not in use	
14.	True or False All major electrical appliances must be properly installed, grounded in	
	accordance with the state electric code, and in good working order	
15.	True or False Extension cords can be used as a substitute for permanent wiring.	
16.	True or False Extension cords and flexible cords can be affixed to structures, extended	
	through walls, ceilings, floors, under doors or floor coverings, and be subjected to	
	environmental damage or physical impact.	
17.	True or False Electrical wiring must be sized to provide for the load and be in good repair.	
18.	True or False Excess accumulations of storage (clutter) can cause fire loading, entrapment, or	r
	difficulty in removing victims from an emergency situation	
19.	True or False Window blinds can cause a strangulation hazard. Best practice is to use cordles	
	or inaccessible cord window coverings, and not to place beds, cribs and furniture near windows	

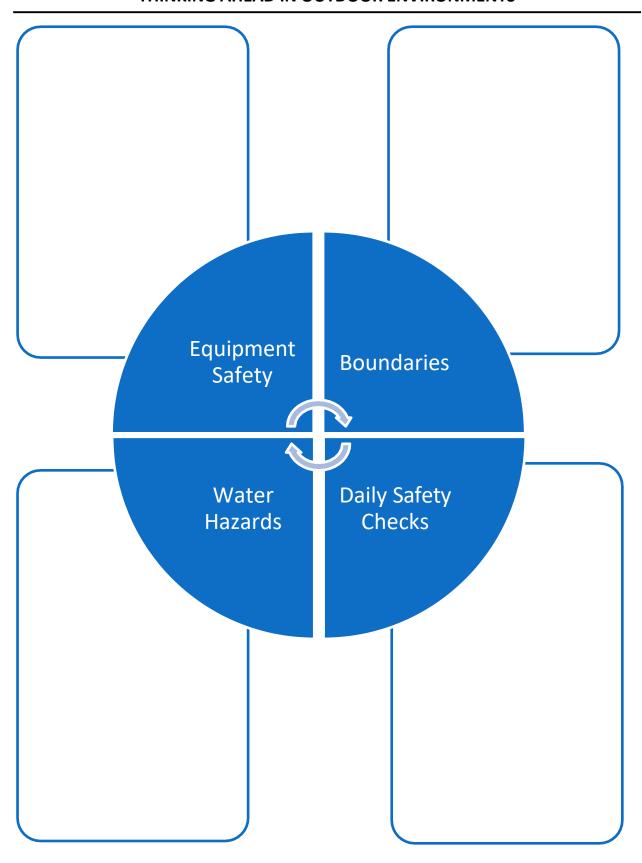

20. True or False Furniture hazards may include tipping and upholstered furniture fires. Best

sturdy bases. Keep heat sources (cigarettes, space heaters, etc) away from upholstered

furniture.

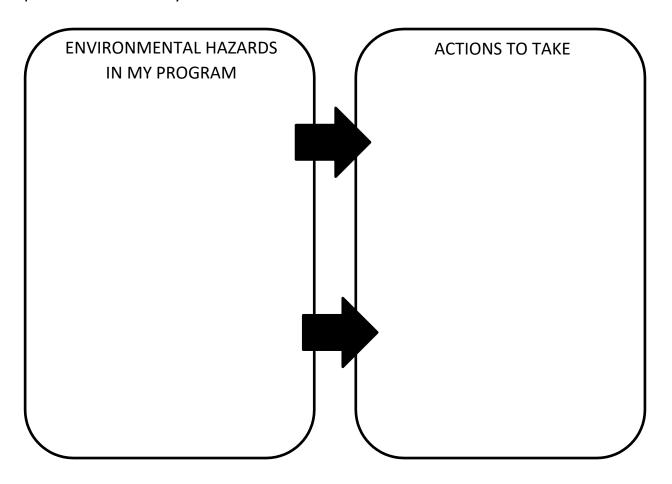

practice is to anchor furniture to the wall or floor. Place TVs and other large equipment on low,

THINKING AHEAD IN OUTDOOR ENVIRONMENTS

REFLECTION - ENVIRONMENTAL HAZARDS

Think about pets, hazardous materials and contaminants, poisonous plants, and pest control. Identify hazards and actions to take.

SESSION 2 - ASSIGNMENTS

- Using the 5 hazards listed on the risk reduction plan in the self-reflection task, identify at least 1 way to address each hazard. Use Rule 2 as a reference guide to determine if any of the hazards are addressed by licensing requirements
- Create a list of at least 10 items to include in an emergency survival kit

INDOOR/OUTDOOR RISK REDUCTION PLAN

Identify at least 5 hazards in the indoor or outdoor spaces. For each hazard, complete at least 1 action to take. Research Rule 2 to determine if any of the hazards are addressed by licensing requirements.

Supervising for Safety, Session 3

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas.

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

KCF Content Area: Health, Safety and Nutrition; Professionalism

CDA Content Area: Safe and Healthy Environment

Learning Objectives

• Identify or determine supervision needs during emergencies or disasters

- Identify resources for emergency preparedness, including disasters and health emergencies
- Identify actions to take before, during, and after health related events

Session 3 Outline

Section	Overview
Welcome and Assignment Review	Welcome and IntroductionsReview and Discuss Objectives
Emergency Preparedness	 Activity – What is an emergency or disaster Presentation – Evacuations Activity – Evacuation techniques and methods Activity – Shelter-in-Place Reflection – Building Security Presentation – Notifying families
Dealing with Illness	 Activity – Supervision Challenges when a Child is III Activity – Common Childhood Diseases Presentation – Communication Activity – Prevention and Control of Infectious Disease Activity – Immunization Myths vs Fact Presentation – Caring for III Children
Other Health Information	 Activity – Medication Administration Presentation – Allergies Presentation – Asthma Activity – Dealing with Injuries
Safe Sleep	Activity – Safe Sleep Practices
Closing	Activity – ReflectionActivity - Summary

Starting Sept. 30, 2019, you will need to update your emergency preparedness plan to include accommodations for infants and toddlers. After Sept. 30, 2019, the plan must be updated and include how you will accommodate infants and toddlers in an emergency. The initial emergency preparedness plan form developed by the commissioner does not include this, because it is a new requirement. In order to comply, you can do one of two things: • complete a one-page update developed by DHS that includes the new requirement or • complete a new emergency plan. DHS received feedback from providers that the form was too long and repetitive. In response, DHS revised and shortened the required template. You no longer need to post or share your emergency preparedness plans with parents or guardians. However, you must continue to make the plan available for review. You can find the one-page update here:

https://edocs.dhs.state.mn.us/lfserver/Public/DHS-7955-ENG

You can find the updated emergency preparedness plan, which will be available after Sept. 20,2019 here: https://edocs.dhs.state.mn.us/lfserver/Public/DHS-7414C-ENG

SECURITY ASSESSMENT

Think about security in your home and community. What do you have in place?

What are some strategies you have thought about or pursued?

PREVENTION AND CONTROL OF INFECTIOUS DISEASE

- Clean to physically remove all dirt and contamination before sanitizing or disinfecting.
- Sanitize reduce (but not eliminate) germs on inanimate surfaces. Generally it is appropriate to sanitize toys, food contact surfaces and pacifiers using ¼ tsp bleach to 1 quart of water
- Disinfect destroys or inactivates germs on inanimate objects. Generally it is appropriate to disinfect hard, non-porous surfaces like diaper changing tables, door handles, toilets, and other bathroom surfaces. Rule 2 requires diapering surfaces to be cleaned with soap and water and then disinfected with a solution of at least 2 tsp chlorine bleach to 1 quart of water.

MEDICATION ADMINISTRATION

What are some best practices and requirements for medication administration?

SESSION 3 – REFLECTION

How to Prepare for Emergencies 1. 2. 3. 4.
How to Maintain a Healthy Environment 1. 2. 3. 4.
