Acknowledgements

We would like to thank all the skilled early childhood and school-age professionals and supporters who have made this project and its subsequent revisions possible over the years.

The Minnesota Child Care Credential was originally developed through a grant from the Minnesota Department of Human Services to the Minnesota Center for Professional Development (MNCPD) at Metropolitan State University. The project was administered by MNCPD staff along with a team of specialists in early childhood adult education. Along the way, various sessions were revised to reflect the updates to best practice. During fiscal year ‘18, the credential underwent a major revision by the Center for Early Education and Development (CEED) at the University of Minnesota. After conducting an online survey and an advisory group meeting of training participants, trainers, cultural consultants and stakeholders who provided expert improvement feedback to guide the revision in 2017, a team of skilled writers and cultural consultants worked to update the curriculum organization and content. Cultural adaptations to the content in three languages were also developed as part of the revision process. The result is a series-based, cohort model consisting of 120 hours of formal early childhood education training that participants can use to meet the training requirement for the National Child Development Associate Credential.
Bienvenido a la Profesión

Clase 1
7 hours

Learning Objectives:
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory, they will learn to:

• Name three behaviors demonstrated by professionals in any profession;
• Name two unique features of the early care and education profession; and
• Describe two benefits of earning a credential as an early care and education professional.

Objetivos de aprendizaje:
• Nombrar tres comportamientos demostrados por los profesionales en cualquier profesión;
• Nombrar dos características de la atención temprana y educación profesión; y
• Describir dos ventajas de obtener una credencial como profesional en educación y atención temprana

Minnesota KCF Content Area VI: Professionalism
CDA Content Area VI: Maintaining a commitment to professionalism.

Professions
How many professions can you think of in two minutes?

Professional Behavior
How do professionals behave? What do they do? How do they prepare for their professions? What do professionals look like? How do you know if someone belongs to a profession?
Defining Features of Professions

“Professions” are characterized by:

- A specialized body of knowledge and competencies shared by all the profession’s members;
- Codes of conduct or rules of acceptable professional behavior,
- Organizations that support the field to which its professional members belong, and
- Being accountable for the responsibilities of their field (in our case, responsibility to provide quality early childhood education).

Early Care and Education as a Profession

Some of the unique aspects of early care and education as a profession are:

- Early care and education professionals work with children who are vulnerable and depend on adults for their health, well-being, and development.

- Early care and education is highly regulated.

- Early care and education makes a difference in children’s lives now and later.

- The work of professionals in early care and education makes a difference in child outcomes.

- Being involved in the lives of children and their families requires special sensitivity and responsibility.
Competencies of Professionals

Credentials

Credential = written evidence of one’s qualifications

A credential “conveys a certain status to the holders and provides some assurance to consumers that the holders are qualified to provide designated services.”

The Child Development Associate (CDA) Credential

Definition of the Child Development Associate (CDA)

A Child Development Associate (CDA) is an individual who has successfully completed the CDA assessment process and has been awarded the CDA Credential. CDAs are able to meet the specific needs of children and work with parents and other adults to nurture children's physical, social, emotional, and intellectual growth in a child development framework.

A CDA performs according to the CDA Competency Goals in center-based, home visitor, or family child care programs. To date, there are more than 200,000 CDAs in all 50 United States, the Commonwealth of Puerto Rico, and the U.S. territories of Guam and the Virgin Islands.

Earning the CDA Credential has many advantages, including motivating caregivers toward continuing education and providing a platform for professional and career opportunities. Many view the CDA Credential as an instrument for career advancement in the early childhood care and education profession. The council works to ensure that it is a credible and valid credential, recognized by the profession as a vital part of a coordinated system of professional development.

As a result of an increase in demand from many public and private employers for qualified trained staff, the number of child care providers applying for the CDA Credential has grown to nearly 15,000 annually. Furthermore, 49 states plus the District of Columbia incorporate the CDA Credential into their child care center licensing regulations.
Assignment

Complete the first assignment for your portfolio:

In this session we’ve talked all about professionalism and how, as professionals in early childhood education, we have specialized knowledge and skills. As early childhood professionals, we should be knowledgeable about our program’s licensing requirements, including the name of the organization that issues licenses and the regulations related to our type of program. Therefore, for your portfolio, you will begin your resource collection of important information that pertains to your profession.

- **Competency Standard VI: To maintain a commitment to professionalism**

  **CSVI RC: Resource Collection Items**

  RCVI-1: Find the name and contact information of the agency in Minnesota that is responsible for the regulation of child care centers and homes. (Note: These regulations are available at the website of the National Resource Center for Health and Safety in Child Care: [http://nrckids.org/STATES/states.htm](http://nrckids.org/STATES/states.htm)).

  Make a copy of the sections that describe the qualification requirements for personnel (teachers, directors and assistants) and group size, adult-child ratio requirements.

  **Field work! (Not for portfolio but important for your career path.)**

  - Go to NAEYC website and find and print a copy of NAEYC Code of Ethical Conduct (this will be used in the next class). Here’s the website: [https://www.naeyc.org/resources/position-statements/ethical-conduct](https://www.naeyc.org/resources/position-statements/ethical-conduct)

  - If you have not done so already, go online and sign up on the Minnesota Quality Improvement and Registry Tool at [www.mncpd.org/educators-providers/](http://www.mncpd.org/educators-providers/). If you feel you need help getting signed up, we can discuss it at the next class. At the least, you need to become familiar with the site.
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota KCF Content Area VI:** Professionalism

**CDA Content Area VI:** Maintaining a commitment to professionalism

**Learning Objectives:**
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory, they will learn to:
- Describe three ideals and three principles as outlined in the NAEYC Code of Ethical Conduct
- Use the NAEYC Code of Ethical Conduct to guide ethical dilemmas
- Name four ways that boundaries can be a challenge for Early Childhood Professionals

**Objetivos de aprendizaje:**
- Describir tres ideales y los tres principios señalados en el código de conducta ética de NAEYC
- Utilizar el código de conducta ética de NAEYC para dilemas éticos
- Nombrar cuatro maneras en que los límites pueden ser un reto para los profesionales de la infancia temprana

**NAEYC Code of Ethical Conduct: Notes**
Professional Boundaries: Considerations

(Crossing Lines in Parent Relationships, Exchange, March/April 2006, Anne Stonehouse and Janet Gonzalez-Mena)

- Having favorites

- Equity issues (treating everyone equitably does not mean treating everyone the same)

- Beyond the boundaries

- Friendship and professional relationships
Common Goals

Think of teams you have been, or currently are a part of. Then answer the following questions:

1. How were the team’s goals determined and/or shared with team members?

2. What teamwork competencies are encouraged and reinforced in your program?

3. What strengths do you bring to the team?

4. What are your areas of opportunity when working with a team?
Characteristics of a Successful Team

Clear Mission:

Common Goal:

Clear Roles:

Accepted Leadership:

Effective Processes:

Solid Relationships:

Excellent Communication:
Team Player Survey

Purpose:
This survey is designed to help you identify your style as a team player. The results will measure your current strengths.

Directions:
Read through the survey and answer each item based on how you feel you function now as a team member. Remember, this is a survey; there are no right or wrong answers. Be honest.

There are eighteen sentences, each with four possible endings. Please rank the endings in the order in which you feel each one applies to you. Place the number 4 next to the ending which is most applicable to you and continue down to a 1 next to the ending which is least applicable to you.

Do not make ties or use 4, 3, 2, or 1 more than once. It is possible that some of the sentences will have two or more endings that apply to you or will have none that applies to you, but you should assume these are your only choices and rank them accordingly. Each set of endings must be ranked 4, 3, 2, and 1.

The Team-Player Survey
From *Team Players and Teamwork, New Strategies for Developing Successful Collaborations*
by Glenn Parker, 2008

1. During team meetings, I usually:
   a. Provide the team with technical data or information. ________
   b. Keep the team focused on our mission or goals. ________
   c. Make sure everyone is involved in the discussion. ________
   d. Raise questions about our goals or methods. ________

2. In relating to the team leader, I:
   a. Suggest that our work be goal directed. ________
   b. Try to help him or her build a positive team climate. ________
   c. Am willing to disagree with him or her when necessary. ________
   d. Offer advice based upon my area of expertise. ________

3. Under stress, I sometimes:
   a. Overuse humor and other tension-reducing devices. ________
   b. Am too direct in communicating with other team members. ________
   c. Lose patience with the need to get everyone involved in discussions. ________
   d. Complain to outsiders about problems facing the team. ________
4. When conflicts arise on the team, I usually:
   a. Press for an honest discussion of the differences. 
   b. Provide reasons why one side or the other is correct. 
   c. See the differences as a basis for a possible change in team direction. 
   d. Try to break the tension with a supportive or humorous remark. 

5. Other team members usually see me as:
   a. Factual. 
   b. Flexible. 
   c. Encouraging. 
   d. Candid. 

6. At times, I am:
   a. Too results oriented. 
   b. Too laid back. 
   c. Self-righteous. 
   d. Shortsighted. 

7. When things go wrong on the team, I usually:
   a. Push for increased emphasis on listening, feedback, and participation. 
   b. Press for a candid discussion of our problems. 
   c. Work hard to provide more and better information. 
   d. Suggest that we revisit our basic mission. 

8. A risky team contribution for me is to:
   a. Question some aspect of the team’s work. 
   b. Push the team to set higher performance standards. 
   c. Work outside my defined role or job area. 
   d. Provide other team members with feedback on their behavior as team members. 

9. Sometimes other team members see me as:
   a. A perfectionist. 
   b. Unwilling to reassess the team’s mission or goals. 
   c. Not serious about getting the real job done. 
   d. A nitpicker.
10. I believe team problem solving requires:
   a. Cooperation by all team members.
   b. High-level listening skills.
   c. A willingness to ask tough questions.
   d. Good solid data.

11. When a new team is forming, I usually:
   a. Try to meet and get to know other team members.
   b. Ask pointed questions about our goals and methods.
   c. Want to know what is expected of me.
   d. Seek clarity about our basic mission.

12. At times, I make other people feel:
   a. Dishonest because they are not able to be as confrontational as I am.
   b. Guilty because they don’t live up to my standards.
   c. Small-minded because they don’t think long-range.
   d. Heartless because they don’t care about how people relate to each other.

13. I believe the role of the team leader is to:
   a. Ensure the efficient solution of business problems.
   b. Help the team establish long-range goals and short-term objectives.
   c. Create a participatory decision-making climate.
   d. Bring out diverse ideas and challenge assumptions.

14. I believe team decisions should be based on:
   a. The team’s mission and goals.
   b. A consensus of team members.
   c. An open and candid assessment of the issues.
   d. The weight of the evidence.

15. Sometimes I:
   a. See team climate as an end in itself.
   b. Play devil’s advocate far too long.
   c. Fail to see the importance of effective team process.
   d. Overemphasize strategic issues and minimize short-term task accomplishments.
16. People have often described me as:
   a. Independent.  
   b. Dependable.  
   c. Imaginative.  
   d. Participative.  

17. Most of the time, I am:
   a. Responsible and hardworking.  
   b. Committed and flexible.  
   c. Enthusiastic and humorous.  
   d. Honest and authentic.  

18. In relating to other team members, at times I get annoyed because they don’t:
   a. Revisit team goals to check progress.  
   b. See the importance of working well together.  
   c. Object to team actions with which they disagree.  
   d. Complete their team assignments on time.
Team Player Results

Directions:

1. Transfer your answers from the survey to this page.
2. Be careful when recording the numbers as the order of the letters changes for each question.
   a. For example: below, in question #1 the order is a,b,c,d, but in question #2 the order is d,a,b,c.
3. The totals for each of the four styles must equal 180.

</tbody>
</table>

Each column should add up to 180.

The highest number designates your primary team player style. If your highest numbers are the same or within three points of each other, consider them both as your primary style. The lowest total indicates your least active team player style.

Your primary team player style defines a set of behaviors that you use most often as a member of a team. It does not mean that it is the only style you use. All of us have the capacity to use any one of the four styles. We simply use one style – our primary style – most often.

Session B - Assignments

Throughout the week, reflect on a team you are part of and answer the following questions:

• What skills are you using as part of the team?

• What roles do members of the team play? Are some challengers, are some collaborators, are some contributors, or are some communicators?
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota KCF Content Area VI: Professionalism

CDA Content Area V: Managing an Effective Program

Learning Objectives:
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory, by the end of the session they will be able to:

- Identify how they contribute to productive team work
- Describe three different approaches to conflict resolution.
- Practice active listening skills.

Objetivos de aprendizaje:

- Identificar cómo contribuir al trabajo en equipo productivo
- Describir tres diferentes enfoques de resolución de conflictos.
- Practicar habilidades de escucha activa.
Stage 1 – Forming
Group depends on the leader for direction. Members have little understanding of role and responsibility of each member. Focus on getting the job done with little higher-level thinking.

Stage 2 – Storming
There may be competition within the group as members try to establish themselves. Subgroups may splinter. Leader begins to focus group on how to best accomplish tasks.

Stage 3 – Norming
Roles and responsibilities are established. Team members may be developing more personal relationships. Delegation of tasks may occur. Communication among members is evident. There is a willingness to examine performance.

Stage 4 – Performing
Team is performing at levels. Shared vision allows further delegation. Conflict is resolved within group through open communication. Leader no longer needs to provide detailed directions for tasks.

Stage 5 – Adjourning
The group has accomplished the task(s). Some members are hesitant to move away from the group, especially if formation of a new group is necessary. Discussion and closure activities may be helpful.

Adapted from stages of group development theory by Bruce Tuckman, 1965, 1977.
Conflict Resolution

Denial

Smoothing Over

Power

Compromise

Problem Solving
Conflict on the Job

All team situations in the workplace occasionally encounter conflict. Think back over the past few weeks or months. List at least three conflict situations that occurred in your workplace.

1)

2)

3)

Review the conflict resolution methods discussed earlier. What method was used in the three conflict situations listed above? What was the result?

1)

2)

3)

If the result was less than satisfactory, or inadequate, what conflict resolution method might have worked better? Why?

1)

2)

3)
Listening

Be present

Focus your attention

Rephrase

Clarify as needed
A reminder: If you have not already printed the licensing information assigned at the end of Session A, please do so and place this in your portfolio.

- Competency Standard VI: To maintain a commitment to professionalism

_**CSVI RC: Resource Collection Items**_

RCVI-1: Find the name and contact information of the agency in Minnesota that is responsible for the regulation of child care centers and homes. (Note: These regulations are available at the website of the National Resource Center for Health and Safety in Child Care: [http://nrckids.org/STATES/states.htm](http://nrckids.org/STATES/states.htm)).

Make a copy of the sections that describe the qualification requirements for personnel (teachers, directors and assistants) and group size, adult-child ratio requirements.
Todo se trata de relaciones

Clase 2
2.5 horas

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

**KCF Content Area I: Child Development and Learning**

**CDA Content Area VIII: Principles of Child Development and Learning (Infant Toddler Edition):**

**Objetivos de aprendizaje:**

Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- **Objetivo 1:** identificar las metas, los objetivos y el proceso generales de la credencial para bebés y niños pequeños
- **Objetivo 2:** describir las interacciones adulto-niño que fomentan el apego mediante el uso del proceso de respuesta observar / preguntar / adaptar
¿Cuáles son 1 o 2 cosas que sé sobre bebés?

¿Dónde aprendí esas cosas?

Citas sobre las relaciones entre bebés y niños pequeños

“En el principio, la visión (opinion) de si mismo y de otros se desarrolla a través de las relaciones.” (K. Johnson)

“Desde el nacimiento, los niños desarrollan un sentido de quienes ellos son. Las relaciones con miembros de la familia, otros adultos y niños, amigos y miembros de la comunidad juegan un papel muy importante en la formación de sus identidades.” (National Council for Curriculum and Assessment, Ireland)

“Las relaciones en los primeros años de vida son vitales para el desarrollo del cerebro porque esto permite que se formen conexiones en el cerebro que ayudan a que los niños confíen en otras personas, tengan sentimientos por otros y se sientan seguros.” (CSEFEL)

“La motivación para aprender el lenguaje (idioma) es social. Por esto, está basado y nutrido en las relaciones con otras personas.” (Kubicek)

“Los niños infants aprenden major a través de la imitación y la exploration en un ambiente donde se sientan seguros y en relaciones sociales con poco nivel de estres.” (Lally)

“La calidad del cuidado depende basicamente en la calidad de las relaciones que tienen los niños con los cuidadores de cuidado, maestros y otros adultos en sus vidas. “ (Shokoff & Phillips, 2000)

“Todo desarrollo y aprendizaje temprano ocurre dentro del contexto de las relaciones sociales.” (various)

¿Con quién tienen relaciones los infantes y los niños pequeños?

De las interacciones continuas con los demás, los bebés aprenden:
- Cómo funcionan las relaciones (¿Qué puedo esperar?)
- Si el mundo es un lugar seguro para aprender y explorar
- Si soy digno de cuidado
- Si tengo la capacidad de satisfacer mis necesidades

Los archivos adjuntos seguros ayudan a los bebés:
- Aprender confianza básica
- Explorar el medioambiente con confianza y seguridad
- Autorregularse y manejar las emociones
- Desarrollar un modelo de trabajo interno de las relaciones
- Con formación de identidad, sentido de autoestima

¿Cómo les hacemos saber a los bebés que pueden contar con nosotros para mantenerlos a salvo, y que estaremos cerca si nos necesitan?
Notas sobre el clip del video

¿Qué hace el bebé para mostrar que ve a su madre como una "base segura"?

¿Qué hace o dice la mamá para hacerle saber a su bebé que ella está allí para su bebé como una base segura?
The Responsive Process (El proceso de responder)

Paso uno: Observar

- Comience simplemente mirando, sin apresurarse, para hacer cosas para el bebé.
- Observe las señales verbales y no verbales.

Paso dos: Preguntar

- Pregúntese: ¿qué mensajes está enviando el niño?
- ¿Cuáles son las partes emocionales, sociales, intelectuales y físicas del mensaje?
- ¿El niño quiere algo de mí en este momento? Si es así, pregúntale al niño (a través de acciones y palabras): ¿Qué es lo que quieres?

Paso tres: adaptar

- Adapte sus acciones de acuerdo con lo que cree que son los deseos del niño.
- Mire cómo el niño responde a sus acciones.
- Modifique sus acciones según la respuesta del niño, y mire, pregunte y vuelva a adaptarse.

Tarea para aplicar:

Elije 3 veces esta semana para practicar el uso del proceso de observar-preguntar-adaptar con un niño en su programa. Anotar:
• qué señales te dio el niño (qué nota cuando "mira") y qué piensa que están tratando de decirte
• lo que hiciste para "preguntarle" al niño si esto era lo que intentaban decirte
• cómo respondiste y formas en que podrías haber "adaptado" (cambiado lo que hiciste según las indicaciones del niño)

Trae esas notas a nuestra próxima sesión. Comenzaremos discutiendo tus tareas.
Vocabulario/términos que se utilizan Session 2:

Infante/Infancia: el período de la vida desde el nacimiento (prenatal) hasta los 3 años de edad (36 meses), también utilizamos el término “bebes”, y en inglés, “infants y toddlers”.

Relaciones: Es la conexión emocional, durante un tiempo, con un significado especial para dos personas, se basa en la confianza, con expectativas personales y que produce recuerdos.

Apego: es la conexión emocional entre un niño (bebe, infante y más adelante), y un adulto que es parte de la vida diaria del niño. Cuando en un periodo de tiempo se establece este apego, el niño prefiere y depende de esta relación con este adulto. El niño usa a esta persona como una base segura, punto de partida para explorar y con quien encuentra consuelo y protección cuando lo necesita.

Base segura (puerto seguro): base se refiere a la persona que cuida al niño como la base desde donde el niño explora su entorno, y al que vuelve, cuando necesita apoyo emocional.

Proceso de respuesta al observar/preguntar/adaptarse: es el proceso de observar las señales del niño para responderle: extender una de sus iniciativas, guiarlo, enseñarle y/o intervenir. Los tres pasos en el proceso para responder, se identifican en el Programa para el Cuidado Infantil (Lally, 1993) are:

- Observar – identificar los gestos/señales verbales (sonidos o palabras) y no-verbales (gestos, expresiones faciales)
- Preguntarse – después de observar al niño, pregúntese lo que significa. ¿El niño quiere o necesita algo?
- Adaptarse – reaccionar de acuerdo a la respuesta de su observación y lo que piensa significa

Señales: Los bebes e infantes expresan sus deseos y necesidades a través de lo que hacen (con movimientos o sin moverse, expresiones faciales) también con sonidos (incluyendo palabras cuando están mas grandes)

Atención compartida: cuando el adulto y el niño se enfocan en lo mismo, al mismo tiempo, comunicándose no verbalmente (sin hablar) comparten el mismo interés en un objeto, al mirarlo y tocarlo o señalándolo (conectándose al compartir un interés), etc.

Bandera roja: comportamientos que le preocupan en áreas del desarrollo del niño. Deben informarle para que pare, vea y reflexione, y luego observe y documente.

Proveedor de cuidado/maestro/cuidador: nos referimos a las personas que “cuidan” al niño fuera del núcleo familiar. A veces los llamamos “maestro” o “proveedor de cuidado”, igualmente
a las personas de los centros, como a las personas que ofrecen cuidado en sus hogares. Algunas veces usamos el término “cuidador (infantil) primario” para indicar la persona que tiene la responsabilidad principal del cuidado del niño. No s referirnos al cuidador primario o cuidadores en el núcleo familiar, o al cuidador primario o cuidadores en el hogar o centro de cuidado infantil.

Estableciendo relaciones de apoyo con las familias

Clase 3
2 horas

Descripción general de la clase 3
Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware
Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

Minnesota KCF Content Area III: Relationships with Families

CDA Content Area: Standard IV: To establish positive and productive relationships with families

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- **Objetivo 1:** Reconocer nuestras respuestas emocionales hacia los bebés (y sus familias) se basan en impulsos de protección y en nuestra cultura.
- **Objetivo 2:** Explorar estrategias para promover la continuidad cultural con las familias
- **Objetivo 3:** Generar estrategias para ganar confianza de las familias, atendiendo al contexto (incluido un hijo de un padre con una necesidad especial)

**GLOSARIO**
**Cultura:** "La cultura es el conocimiento aprendido y compartido que utilizan los grupos específicos para generar su comportamiento e interpretar su experiencia del mundo. Comprende creencias acerca de la realidad, cómo las personas deberían interactuar entre sí, lo que "saben" sobre el mundo y cómo deberían responder a los entornos sociales y materiales en los que se encuentran." (PITC).

**Continuidad cultural:** Trabajar con las familias para aprender sobre sus valores, creencias y objetivos a fin de respaldar prácticas de atención consistentes entre el hogar y el cuidado infantil. Debido a que los niños desarrollan un sentido de quiénes son en el contexto de la cultura, los apoyos de continuidad cultural facilitan un sentido de armonía y familiaridad entre el hogar y el entorno de cuidado.

**Humildad cultural:** una autorreflexión activa y una conciencia crítica de los propios supuestos, creencias, valores y cosmovisión; y conocer las limitaciones de la propia perspectiva.

**Necesidades protectoras:** el impulso natural para proteger a los niños pequeños. Los impulsos de protección son tan fuertes que pueden provocar fuertes sentimientos y reacciones en los adultos. Por ejemplo, la respuesta natural (biológica) que sentimos cuando escuchamos a un bebé llorando.

**Identidad:** el desarrollo de uno mismo de uno mismo. Los bebés pequeños comienzan con un sentido de sí mismos como conectados con aquellos que los cuidan. Durante los primeros 6 meses de vida, comienzan a desarrollar una idea de quiénes son, separados de su padre / cuidador principal. El sentido del yo de los bebés y niños pequeños se ve fuertemente afectado por las relaciones con los padres y los cuidadores principales.

**Proceso paralelo** (Hacer a los demás lo que otros le harían a los demás. Jeree Pawl): Esto se refiere al proceso paralelo de la construcción de una relación con el padre que contribuye a la capacidad del padre para construir una relación positiva con su hijo. Cualquier cosa que hagas por el padre, también lo estás haciendo por el niño. Tenga en cuenta la vulnerabilidad de los padres. Parenting / caregiving es una experiencia profundamente personal.
¿Cómo le das la bienvenida a un nuevo bebé en tu familia?

¿Qué haces para recibir a un nuevo bebé en tu programa?

¿Cómo le das la bienvenida a su familia?

**Atención cultural y contextual y formación de identidad**

- Cultura es un componente fundamental en el desarrollo de la identidad de un niño
- A través de aprendizaje cultural, los niños adquieren un sentimiento de pertenencia, un sentido de historia personal y seguridad al saber quiénes son y de dónde provienen.
- La experiencia de cuidado infantil debe estar en armonía con la cultura del hogar. Por lo tanto, los cuidadores deben prestar gran atención a la incorporación de las prácticas domiciliarias en la atención.

  - Otros factores contextuales a los que se debe prestar atención para comprender las influencias en la familia, el hogar y la identidad:
    - Discapacidad
    - Comunidad (incluyendo rural, urbana, suburbana)
    - Ingresos
    - Vivienda

  - La investigación sugiere que los bebés y niños pequeños aprenden muchas lecciones de sus cuidadores. Algunas de las lecciones que pueden incorporarse al sentido de identidad del niño son:
    - Qué cosas temer
    - ¿Cuál de los comportamientos se consideran apropiados?
    - Cómo se reciben y actúan los mensajes de uno
    - Cuán exitoso es uno para satisfacer las necesidades de los demás
    - ¿Qué emociones y nivel de intensidad de las emociones se puede mostrar con seguridad
    - Qué tan interesante es uno
    - Cuán competente es uno

Handout:

LA CULTURA COMO PROCESO

Los seis conceptos que se mencionan anteriormente se centran en la “estructura profunda de la cultura”. Estos ayudan a entender el concepto de la cultura como un proceso. A continuación, sigue una explicación más detallada de cada concepto.

1. La cultura es un conjunto de reglas de conducta. La cultura no se puede ver porque las reglas son invisibles; uno solo puede ver los productos de la cultura: las conductas generadas por las reglas. Sin embargo, las reglas culturales no causan la conducta. Éstas influyen a las personas a que se comporten de maneras semejantes, que les ayudan a entenderse entre ellos. Es gracias a entender las reglas de una cultura que uno sabe cómo debe saludar a una persona más joven o mayor que uno, a un amigo o a un extraño. Las reglas culturales ayudan a los maestros a saber cómo cargar a un bebé. Las reglas culturales determinan las preferencias alimenticias y las celebraciones: determina si se celebra el sol o a la luna, si debe uno llevar puesto un vestido o un pantalón, o nada en absoluto. Estas reglas dan significado a todos los sucesos y las experiencias de la vida. La esencia de la cultura no son estas conductas en sí, sino las reglas que producen estas conductas.

2. La cultura es una característica de los grupos. Las reglas de una cultura son compartidas por el grupo y no son inventadas por un individuo. Las reglas del grupo, las cuales se transmiten de una generación a otra, forman la esencia de la cultura. Es un error confundir las diferencias individuales con las diferencias culturales de grupo. Cada persona adquiere una personalidad singular como resultado de su historial personal y, a la vez, se desarrolla dentro de un contexto cultural con algunas de las mismas características conductuales que otros miembros del grupo tienen en común.

3. La cultura se aprende. Nadie nace aculturado. Más bien, cada persona nace con la capacidad biológica para aprender. Lo que cada persona aprenda depende de las reglas culturales de las personas que lo criaron. Algunas reglas se enseñan con palabras: “sostén el tenedor con la mano derecha, el cuchillo con la izquierda”. Otras reglas se demuestran con los actos: cuándo sonreír, cuánto acercarte a una persona al hablar con ella, etc. Debido a que la cultura se aprende, es un error asumir la cultura de una persona por su apariencia. Alguien puede ser de raza negra y a la vez ser de cultura irlandesa. Una persona también puede llegar a ser bicultural o tri-cultural al aprender las reglas de culturas distintas a las de su grupo primario.

4. Los individuos están inmersos, en mayor o menor grado, dentro de una cultura. Debido a que la cultura se aprende, también la pueden 7 aprender algunas personas dentro del grupo en un mayor grado que otras. Conforme los niños se acultan, ellos generalmente aprenden las reglas esenciales de su cultura, aunque es posible que no siempre aprendan cada regla cultural de la misma manera. Algunas familias están más vinculadas a sus tradiciones, mientras que otras lo están menos. Además, aunque las familias y los individuos aprenden las reglas culturales, es posible que no siempre se comporten conforme a lo que han aprendido: algunas personas son conformistas y otras inconformistas. Por consiguiente, la conducta de los miembros de un grupo cultural puede variar, dependiendo del grado en que sus experiencias estén inmersas dentro de la cultura. El pensar acerca de las variaciones conductuales de esta manera ayuda a las personas, cuando trabajan con una familia en particular, a entender por qué, por ejemplo, no todas las personas japonesas “se comportan como japoneses”.

5. Los grupos culturales toman prestadas y comparten reglas. Cada grupo cultural tiene su propia serie de reglas de conducta y por lo tanto es singular. Sin embargo, algunas de las reglas de la cultura A pueden ser iguales a las reglas de la cultura B. Esto sucede porque las reglas culturales evolucionan y cambian con el tiempo y, a veces, cuando dos grupos tienen un contacto amplio entre sí, se influyen unos a otros en algunos aspectos. Por ello, dos grupos de personas pueden hablar el mismo idioma, pero tener reglas distintas acerca del rol de las mujeres. Entender este concepto ayuda a evitar confusiones cuando por ejemplo, una persona de otra cultura sea tan parecida al maestro en algunos aspectos, pero tan distinta en otros.

6. Los miembros de un grupo cultural pueden ser competentes en la conducta cultural pero ser inca paces de describir las reglas. La aculturación es un proceso natural. Cuando las personas están aculturadas, no se dan cuenta que han sido una serie de reglas en particular las que han ido dando forma a sus ideas y su conducta. Así como un niño de cuatro de años que
domina el idioma no puede trazar un diagrama de una oración ni explicar las reglas gramaticales si se le pidiera hacerlo, muchas personas también pueden ser muy competentes en la conducta cultural sin saber conscientemente que se están comportando de acuerdo a las reglas culturales. De la misma 8 manera, entender la aculturación explica por qué uno no puede acercársele a una persona y pedirle que le enseñe la cultura. Los maestros probablemente tampoco puedan explicar su propia cultura.

Promoción de la salud y del bienestar

Ambientes limpios, seguros, sanitarios

Clase 4
Sesiones de A & B
4 hours

Session A

Time: Location:

KCF Content Area: VII Health, Safety and Nutrition

CDA Content Area: Safe, Healthy, Learning Environment

Learning Objectives

- Identify five components necessary to maintain a clean and sanitary environment
- Describe effective hand-washing techniques and when they should be utilized
- Explain appropriate diapering and toilet-training procedures
- Recognize potential blood-borne pathogen exposure incidents and identify procedures for effective precaution and containment

Objetivos de aprendizaje

- Identificar cinco componentes necesarios para mantener un ambiente limpio y sanitario
- Describir técnicas de lavado de manos y cuándo se deben ser utilizadas
- Explican procedimientos para cambiar pañales y enseñar a ir al baño
- Reconocer el potencial de enfermedades transmitidas por la sangre, identificar riesgos de exposición del agente patógeno e identificar los procedimientos de contención y de precaución.

Steps for Sanitizing or Disinfecting

Steps:

1) Spray surface with soapy water to CLEAN.

2) Spray surface with plain water to RINSE.

3) Spray surface with appropriate bleach solution (sanitizer or disinfectant) depending on the area it’s being used in.

4) Let sit for 2 minutes- this is the required dwell time for bleach in order to meet all its kill claims.

Test the sanitizer strength of bleach daily. It should test between 50-100 ppm.

If using a product other than bleach, reference this chart to ensure all criteria are met:

# Cleaning, Disinfecting, and Sanitizing Routines

Cleaning throughout the Day

Keeping your early childhood environment orderly and clean is one of the many ways to promote learning throughout the day. A few simple actions beyond daily cleaning, disinfecting and sanitizing routines will help you provide the highest quality early childhood setting.

These actions include:

- **Straighten as you go.** Caregivers should model, help, and encourage children to clean up an area or activity (to the best of their developmental ability) before moving on to the next activity. For children, this may include putting toys away, clearing off and wiping down surfaces, setting tables, etc. Remember to never allow children access to cleaning solutions beyond soap and water.
- **Arrange toys and materials in locations accessible to the children.** This not only creates a child-choice setting but allows them to put materials away where they belong.
- **Clean and sanitize tables, chairs, high chairs, and other surfaces used for multiple purposes as they are used.**
- **Prevent possible slips, trips, or falls by immediately wiping up (and disinfecting if necessary) any liquids, food, or materials on the floor.**
- **Put away food and dishes after snacks and lunch.**
- **Empty garbage cans when they are full. Reline with a new garbage bag.**
- **Sweep floors (particularly under tables and chairs) after meals or messy activities.**
- **Replace or re-fill all consumable materials (i.e. paper, crayons, paint, etc.) as they empty out.**
- **Take advantage of nap time (if applicable) to accomplish cleaning tasks such as:**
  - A quick mop of non-carpeted areas. Mop using warm water and floor-cleaning solution. Go over the area with a dry mop to absorb moisture and allow the floor to dry more quickly. Make sure the floor is dry before children or caregivers are permitted on them to avoid potential slips.
  - Clean dishes from lunch.
  - If there is not a designated nap time when these can be accomplished, find another time during the day when children are not present or direct supervision is not compromised.

Reminder: Keep all cleaning supplies in an inaccessible and preferably locked location.
When Should Hands be Washed?

Caregivers:

Children:
Effective hand-washing is one of the best ways to prevent illness and the spread of germs.

To thoroughly and effectively wash hands, follow these steps:

1. Turn on the water and adjust to a warm temperature.

2. Wet both hands under the running water.

3. Apply liquid soap to hands.

4. Briskly rub the hands together until a soapy lather appears and continue for at least 20 seconds.

5. Thoroughly wash all areas of both hands including between fingers, around nail beds, underfingernails and jewelry, palms, backs of hands, and wrists.

6. Rinse hands thoroughly under running water until they are free of all soap and dirt.

7. Dry hands with a clean, disposable paper towel.

8. Turn water off with a paper towel.

9. Throw the paper towel into a lined trash container.
Diaper Changing Procedures

Diaper changing is a simple procedure that quickly becomes routine. Follow the safe, sanitary process listed below to decrease the spread of illness and promote wellness among children and caregivers.

1. Gather supplies (i.e. fresh diapers, wipes, diaper ointment, vinyl/nitrile gloves, etc.) and place them on the diaper changing table or within hands reach.
2. Ensure the diaper changing table has been disinfected since last used. (If not, disinfect.) Place a disposable paper barrier the length of the child on the diapering surface.
3. Wash hands thoroughly and put on disposable non-latex/nitrile gloves.
4. Pick up the child or walk him/her to the diaper changing table. Gently lay the child down on the diapering surface. (If you have steps leading up to the diapering area, supervise and assist the child.)
5. Remove soiled or wet diaper. If clothes are soiled, remove them.
6. Clean child’s bottom with moist disposable wipes. Wipe from front to back, using 1 wipe per swipe.
7. Put the soiled wipes inside the diaper and fold.
8. Holding the soiled diaper in your gloved hand, peel off gloves around, enclosing the soiled diaper inside the glove. Or, place the soiled diaper in a plastic bag and then throw diaper and soiled gloves away in a lined, covered, hands-free diaper pail.
9. Put a fresh diaper on the child and re-dress in clean clothes if necessary.
10. Assisting (or supervising) the child, wash the child’s hands. Immediately after returning the child to wherever the child is supposed to be without touching anything, the staff member should return to the diapering table to begin to clean up.
11. Remove the disposable paper covering from the diapering surface and dispose of it in the diaper pail.
12. Immediately wash, rinse, and disinfect the diapering area. Allow diapering surface to air dry.
13. Thoroughly wash your hands using effective hand-washing procedures.

Note: If using cloth diapers, a separate diaper pail is required. Typically, soiled or wet cloth diaper covers go in the cloth diaper pail, while soiled gloves, disposable coverings, and wipes go in the disposable diaper pail. Check with your diaper service for specific information.
Scenario: The parents of a two-and-a-half-year-old child in your care approach you one day about toilet-training. They’ve noticed that a couple other children about the same age are using the bathroom. They would like you to start toilet-training their son tomorrow.

What are the next steps with this family?

What questions might you ask this family?
Methods of Compliance:

1) Disposal bags
2) Paper towels
3) Resuscitation mouth pieces
4) Gloves—vinyl or nitrile
5) Handwashing
6) Eye protection (now required by DHS)
7) Sharps container (now required by DHS)
8) Disinfectant
Exposure or Not?

At some point, caregivers in an early childhood program will find themselves in a situation that may be an “exposure incident” for blood-borne pathogens.

Examine the scenarios below. Are they “exposure incidents” or not?

1. You pick up a toddler and realize they have had a potty accident. It has soaked through the toddlers’ pants and on to your hand. Is this an exposure incident?

2. While reading a story with you, a child picks at a scab until it begins to bleed. He reaches over and grabs your hand, coming in to contact with your fresh, open paper cut. His hand has blood on it where he touched you. Is this an exposure incident?

3. An infant you are rocking to sleep suddenly vomits on and down the front of your shirt. You notice a pink tinge to the vomit and wonder if it could be blood. Is this an exposure incident?

4. While outside, a child falls and injuries herself on a couple small sticks on the ground. The sticks have broken her skin and she is bleeding. You put on gloves and begin to assist her. While cleaning off the blood, you cut your glove and hand on a small sliver caught in the wound. Is this an exposure incident?
Resources

American Academy of Pediatrics: www.aap.org – multiple resources related to health and safety for health care providers, child care providers, and families

Infectious Diseases in Childcare and School Settings
http://www.health.state.mn.us/handhygiene/schools/daycaremanual.html

Up-to-date resources for common infectious illnesses and prevention within childcare settings:

“Car Seats Made Simple” – www.carseatsmadenpoise.org – offers information on how to choose a car seat, where car seat clinics are being held, recall information, and more

Centers for Disease Control (CDC) – www.cdc.gov – multiple resources related to health, injuries, and communicable diseases; information on vaccinations and schedules: https://www.cdc.gov/vaccines/schedules/easy-to-read/child-easyread.html.

Fire Department – provide safety information and safety programs for children

Library – community resource for books, videos, DVDs, videos, etc.

Child Care Aware https://www.childcareawaremn.org/ supporting the professional growth of child care providers and connecting families to quality child care statewide

Minnesota Dept. of Health – www.health.state.mn.us – provides information related to health promotion and safety issues for all ages

Minnesota Poison Control Center – www.mnpoison.org – emergency resource for
poisonings as well as information to prevent poisonings

**Minnesota Safe Kids Coalition** - [https://www.minnesotasafetycouncil.org/safekids/index.cfm](https://www.minnesotasafetycouncil.org/safekids/index.cfm) - group of organizations who promote the safety of children

**Minnesota Safety Council** – [www.minnesotasafetycouncil.org](http://www.minnesotasafetycouncil.org) – resources on injury prevention, work related safety issues, winter safety, and more

**Minnesota State Fire Marshal’s Office** – [www.fire.state.mn.us](http://www.fire.state.mn.us) – information related to Minnesota State safety codes; a safety curriculum for children pre-K through grade 8

**National Safety Council** – [www.nsc.org](http://www.nsc.org) – resources related to injury prevention

**Public Health Agency** – provide various resources related to all aspects of community health, including health & safety, immunizations, communicable diseases, etc.

Session A – Portfolio Assignments

Complete this assignment for your portfolio

1. CDA Competency Standard I: To establish and maintain a safe, healthy learning environment.

CSI: Reflective Competency Statement I

CSI: Begin your Reflective Statement about this Competency Standard with a paragraph describing how your teaching practices meet this Standard.
Knowledge and Competency Framework (KCF), CDA Content Area
The KCF and CDA Content Areas are listed here to help you understand why these topics are part of the MN CDA and where you can go for further information. These may not be the only areas addressed, but they are the primary influences behind the session content.

KCF Content Area: VII Health, Safety and Nutrition
CDA Content Area: Safe, Healthy, Learning Environment

Learning Objectives
● Recognize elements of a safe environment crucial to preventing and reducing injuries
● Define five possible workplace hazards found in an early childhood environment
● Identify five proactive caregiver solutions to potential workplace hazards

Objetivos de aprendizaje
● Reconocer elementos de un entorno seguro para prevenir riesgos y reducir lesiones
● Definir cinco peligros posibles en un ambiente de educación temprana
● Identificar 5 soluciones proactivas para evitar peligros y accidentes

Indoor Safety Checklist

Review the following on a frequent basis to avoid unnecessary hazardous situations in the indoor environment.

General considerations:

- Hot water temperature is set to 120° F or less. The water in the faucets is regularly checked before exposing children.

- Hot foods or liquids are out of reach of children and always under direct adult supervision. Hot liquids such as coffee cannot even be in the classroom if they are out of reach of children in center-based programs.

- Poisonous items, such as cosmetics, medicine, cleaning supplies, and other items labeled “keep out of reach of children” are kept in an inaccessible, preferably locked, cabinet. Staff purses and bags are kept out of reach of children.

- Plastic bags are stored so they are inaccessible to children as they pose a suffocation risk.

- Food allergy must be posted with child’s name, allergy, reaction and caregiver action where the food is prepared AND served.

- Accessible electrical outlets are protected with safety covers that children cannot remove (i.e. screw mounted outlet covers), or are the GFCI (ground-fault-circuit-interrupter) type.

- Electrical cords and window cords are secure and inaccessible to children (kept out of their reach).

- Equipment with lids or doors large enough for children to crawl in (i.e. toy box, dramatic play furniture) cannot be latched from the inside. Hinges are checked regularly to ensure proper working order.

- Shelving, equipment, furniture, toys, tables, chairs, etc. are checked for sharp edges, missing parts, loose pieces, and wear-n-tear that might cause injuries.

- Floor is cleared regularly of tripping hazards.

- Safety gates are used at the top of stairs.

- Rugs and mats should have a non-skid backing and be free of frayed or curled edges. They should be secured and not pose a tripping hazard.

- Windows have screens. When open, windows latch in to place and are not propped. For programs serving children under age 5, the opening is no more than 3.5 inches to prevent children getting through and/or getting their head stuck.
• Emergency exits are free of obstruction.
• Cabinets and drawers have child safety latches.
• Finger-pinch devices are installed wherever doors are accessible to children. This is not a requirement but is best practice. If door guards are not present, staff have to supervise children to not open doors.
• Children are never left unattended or unsupervised around standing water this includes toilets, sensory tables or tubs, pools, bathtubs, etc.
• Caregiver items are inaccessible and preferably stored in a locked cabinet. This includes, but is not limited to:
  • Personal items – purse, medications, cosmetics, sprays, perfumes, etc.
  • Program items – scissors, starch, stapler, push pins, etc.

Additional Infant/Toddler/Two Considerations for Indoor Safety

• Crib is free of plastics, pillows, stuffed animals, bumper pads, or other soft plush items that may be a suffocation hazard. Nothing is in the crib except for a properly fitting mattress and a tight-fitting sheet that cannot be easily dislodged when pulled at the corner. Infant can have a sleep sack and a pacifier. Nothing else must be in the crib except the baby and pacifier. (Pacifier cannot have any attachments—clips, strings, giraffes, etc)

• Cribs are checked with the DHS crib inspection form monthly. Cribs have to meet federal regulations so all cribs must have slats that meet regulations. The crib check form will require the staff to check for the mattress coming to the edge, etc.
  Crib Check Form for FCC:  
  http://www.dhs.state.mn.us/main/groups/licensing/documents/pub/dhs16_178540.pdf

  Crib Check Form for Centers: 

• Toys, equipment, climbers, shelves, etc. have rounded (or protected) edges. Climbers must be placed over a shock-absorbing surface.

• Buy toys and materials larger than two inches in diameter. If unsure, test with a choke tube or empty toilet paper tube. If the toy/material fits inside the tube it is a choking hazard and should not be accessible to infants, toddlers, or two-year-olds without immediate adult supervision.

• There are no Styrofoam objects, plastic bags, or latex (rubber) balloons accessible to children.

• Floor is frequently checked and cleared of choking hazards, spilled food or liquids, sharp objects, etc.

• Large furniture and equipment is secure, allowing children to pull themselves up without toppling, shaking, or collapsing.
Art materials that cannot be safely consumed (even though that is not their intent) are only used under direct adult supervision.

**Outdoor Safety Checklist**

Review the following on a frequent basis to avoid unnecessary hazardous situations in the outdoor environment.

- Outdoor play area is contained by a fence or other barrier that prevents children from leaving the designated area.
- Outdoor play area is free of anthills, beehives, wasp nests, and other potentially harmful insects.
- Outdoor play area is free from poisonous plants, litter, and trash.
- Caregiver outdoor equipment, tools, or substances labeled “keep out of reach of children” (i.e. lawn mower, shovel, weed killer) are inaccessible and locked away.
- Outdoor play equipment is free from sharp edges, cracking, rotting, rust, missing parts, loose pieces, peeling paint, and broken sections.
- Outdoor play equipment matches the developmental abilities of the children using it.
- Outdoor play area is free of tripping hazards.
- Adequate fall zones are under climbing structures (6 foot fall zone).
- Outdoor play equipment is not too high (i.e. 1 foot per year of age above fall surface), is secure and stable. Outdoor climbing equipment needs to be on a shock-absorbing surface. Rubber tiles need to be at least 6” deep and all others at least 9” deep. Staff should regularly check for depth of surfacing and replace as needed.
- Climbing structures and other equipment pose no risk of entanglement or head entrapment with openings between 3 ½ inches and 9 inches across.
- Sandboxes are raked daily and checked for objects or animal droppings.
- Permanent water features (i.e. pool) are fenced and are only accessible with direct adult supervision.
- A well-stocked first aid kit is permanently available in the outdoor play space.
- Outdoor temperature is between 15 degrees F and 90 degrees F, including wind chill. Children are dressed appropriately for the weather. Access the “Child Care Weather Watch” for monitoring outdoor conditions: [http://www.c-uphd.org/documents/wellness/weatherwatch.pdf](http://www.c-uphd.org/documents/wellness/weatherwatch.pdf)

Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota KCF Content Area III: Relationships with Families

CDA Content Area IV: Building Productive Relationships with Families

Learning Objectives:

- Describe how cultural or racial bias can influence our interactions with children and families;
- Define family-centered care; and
- Complete a self-assessment on cultural and linguistic competencies and identify ways to use the information to improve program quality.

Objetivos de aprendizaje:

- Describir cómo el prejuicio racial o cultural puede influir en nuestras interacciones con los niños y familias;
- Definir el cuidado infantil centrado en la familia; y
- Completar una autoevaluación en competencias culturales y lingüísticas e identificar maneras de utilizar la información para mejorar la calidad del programa
Session A

The purpose of this class is to help you find ways and resources to welcome all families, reflect on our own practices and biases, and find new ways to communicate with and support all families in your program.

Welcoming People into My Home

When you were growing up, how did your family welcome guests into your home? What did you do or say to make the guests feel welcome? How did you expect your visitors to act or respond?
Glossary

**Bias.** Opinions that are influenced by personal experiences from which people have formed prejudices. We ALL have biases in one way or another.

**Cultural awareness.** Being cognizant, observant, and conscious of similarities and differences among and between cultural groups (National Center for Cultural Competence).

**Cultural competence (for an individual).** Our ability to work effectively with people from all backgrounds; in this case, our ability to make families feel we are working with them in a partnership regarding the care and education of their children. Cultural competence applies to individuals and organizations.

**Cultural continuity.** Working with families to learn about their values, beliefs, and goals in order to support consistent care practices between home and child care. Because children develop a sense of who they are in the context of culture, cultural continuity supports a sense of harmony and familiarity between home and care settings.

**Cultural humility.** Being aware that you cannot be an expert on how another person experiences their own culture. Avoiding assumptions and working to understand the other person’s perspective on how their culture influences and shapes them.

**Culture – Two Definitions:**

“Culture is the learned and shared knowledge that specific groups use to generate their behavior and interpret their experience of the world. It comprises beliefs about reality, how people should interact with each other, what they ‘know’ about the world, and how they should respond to the social and material environments in which they find themselves.” (PITC Guide to Culturally Sensitive Care, 2nd ed., p.xi).

“Culture is more than a collection of artifacts and holidays. In its broadest sense, it is a set of values, attitudes, beliefs, and rules for behavior by which we organize and give meaning to the world.” (Carol Brunson Day, 1988)

**Discrimination.** Behavior that treats people unequally or inequitably because of their group affiliation or membership. This can be behavior of an individual, a group, an organization or a policy or practice. Discrimination often comes out of a person’s prejudice and stereotypes.

**Empathy.** Understanding so intimate that the feelings, thoughts, and motives of one are easily comprehended by another. Children watch the people around them all the time and they are much more empathetic than we may think. It is a caregiver’s job to help children learn how to put their empathy into words and actions.

**Family.** A group of people who love and support one another. Numerous family structures exist. Family-centered care works to promote the health and wellbeing of all children and their families through respectful partnerships.

**Identity.** One’s developing sense of self. Young infants start with a sense of themselves as connected to those who care for them. Over the first 6 months of life, they begin to develop a sense of who they are as separate from their parent/primary caregiver. Young children’s sense of self is strongly affected by relationships with parents and primary caregivers.

**Implicit bias.** Subtle, often subconscious, stereotypes that guide our expectations and interactions with people.

**Perspective taking.** The ability to feel or imagine what another person feels or might feel; putting yourself in someone else’s “shoes” to see life experiences from their viewpoint.

**Prejudice.** An opinion, prejudgment, or attitude about a group or individual members. Teaching Tolerance notes that while a prejudice can be positive, it often refers to a negative attitude and may be accompanied by fear and hate.
Racism. “An attitude, action, or practice of an individual or institution, backed by societal power, that undermines human and legal rights because of specific physical characteristics such as skin color” (Derman Sparks & Olson Edwards, 2010).

Stereotype. An exaggerated belief, image, or distorted truth about a person or group; a generalization that allows for little or no individual differences or social variation. Stereotypes are based on images in mass media, or reputations passed on by parents, peers and other members of society. Stereotypes can be positive or negative.

Glosario

**Sesgo.** Opiniones que están influenciadas por experiencias personales de los cuales las personas forman prejuicios. TODOS tenemos prejuicios en una u otra forma.

**Conciencia cultural.** Ser consciente, atento y consciente de las similitudes y diferencias entre grupos culturales (Centro Nacional de Competencia Cultural).

**Competencia cultural (para un individuo).** Nuestra capacidad para trabajar eficazmente con personas de todos los orígenes; en este caso, nuestra capacidad para que las familias sientan que estamos trabajando con ellas en una sociedad con respecto a la atención y educación de sus hijos. El concepto de “Competencia cultural” se aplica a individuos y organizaciones.

**Continuidad cultural.** Prácticas de trabajo con las familias para conocer sus valores, creencias y metas para obtener coherencia entre casa y guardería. La continuidad cultural crea armonía y familiaridad entre el hogar y el centro de cuidado infantil y los niños desarrollan un sentido de lo que son en el contexto de su cultura.

**Humildad cultural.** Ser consciente de que no puede ser un experto en cómo otra persona experimenta su propia cultura. Evitar suposiciones y trabajar para entender la perspectiva de la otra persona sobre cómo su cultura influye y moldea su pensamiento y reacciones.

**Cultura – Dos definiciones:**

"La cultura es el conocimiento aprendido y compartido que grupos específicos utilizan para generar su comportamiento e interpretar su experiencia del mundo. Se compone de creencias acerca de la realidad, cómo la gente debe interactuar con los demás, lo que 'saben' sobre el mundo, y cómo deben responder a los entornos sociales y materiales en los que se encuentran." (Guía del PITC culturalmente sensible cuidado, 2nd ed., p.xi).

"La cultura es más que una colección de artefactos y de celebraciones. En su sentido más amplio, es un conjunto de valores, actitudes, creencias y reglas de comportamiento por el cual organizar y dar sentido al mundo." (Carol Brunson día, 1988)

**Discriminación.** Comportamiento que trata a las personas desigualmente o injustamente a causa de su afiliación o pertenencia a un grupo particular. Esto puede ser el comportamiento de un individuo, de un grupo, de una organización o una política o práctica. A menudo la discriminación proviene de prejuicios y estereotipos de una persona hacia otras.

**Empatía.** Lo comprensión que los sentimientos, pensamientos y motivos de uno están fácilmente comprendidos por otro. Los niños ven a la gente a su alrededor todo el tiempo y son mucho más empáticos que podemos pensar. Es el trabajo del maestro de poner su empatía en palabras y acciones para ayudar a los niños a aprender.

**Familia.** Un grupo de personas que se aman y apoyan mutuamente. Existen numerosas estructuras de la familia. La atención centrada en la familia promueve la salud y el bienestar de todos los niños y sus familias a través de asociaciones respetuosas

**Identidad.** Uno desarrolla sentido de sí mismo. Los niños pequeños comienzan con un sentido de sí mismos como conectado a quienes cuidan de ellos. Durante los primeros 6 meses de vida, empiezan a desarrollar un sentido de quienes son como separados de su cuidador principal. Este sentido de sí mismo es afectado fuertemente por las relaciones con los padres y los cuidadores principales de los niños.
**Sesgo implícito**. Los estereotipos sutiles, a menudo subconscientes, que guían nuestras expectativas interacciones con la gente.

**Toma de perspectiva**. La capacidad de sentir o imaginar lo que otra persona siente o puede sentir; “ponerse en los zapatos de alguien” para ver la vida desde su punto de vista.

**Perjuicio**. Una opinión o actitud de un grupo o a miembros individuales. Mientras que un perjuicio puede ser positivo, a menudo se refiere a una actitud negativa y puede estar acompañada de miedo y odio.

**Racismo**. “Una actitud, acción o práctica de un individuo o institución, respaldados por el poder social, que socava los derechos humanos y legales debido a las características físicas específicas como el color de la piel” (Derman Sparks & Olson Edwards, 2010).

**Estereotipo**. Una creencia exagerada, una imagen o distorsión de la verdad sobre una persona o grupo; una generalización que no permite diferencias individuales o variaciones sociales. Los estereotipos se basan en imágenes en los medios de comunicación o ideas transmitidas por los padres, compañeros y otros miembros de la sociedad. Los estereotipos pueden ser positivos o negativos.

---

1. *When you were growing up, what is one thing you were taught by your family about how to behave in school?*

2. *What is one thing you were taught about how to behave in school that you still believe is important?*

3. *What is one thing you were taught about how to behave in school that you feel differently about now (or no longer believe)?*

---

What’s one thing you do in your program that you would like parents to know?

Why do you do this?

---

**TWO WAY COMMUNICATION WITH FAMILIES**

*What are some of the ways that families communicate with you?*

*How do you find out about family preferences for communication (such as who, how, and when)?*

*What are some ways that you find out more about families as they enter your program?*

*How and when do you communicate with families?*

*What do you communicate about?*
CULTURAL CONTINUITY

What are some ways you find out how families do things at home, so that you can try to provide cultural continuity?

What do you do to get to know families over time?

ACKNOWLEDGE: Reflect and Listen:
• Communicate awareness of the issue
• Convey sincere interest and responsiveness
• Involve the family in seeking a joint solution

When we acknowledge, we recognize that there is a shared need, concern or difference (differing views). Part of coming to a new agreed upon solution is looking into ourselves and asking:
What is it that I am trying to do or say (what is my intent)? What is my bottom line (things I cannot give up)?

ASK: Learn about the Parent’s Point of View
• Gather data, clarify
• Pay attention to verbal and nonverbal responses
• Restate what you think the parent/other person is saying

Asking needs to be genuine: we really want to learn more about what the other person thinks. Trying to take their perspective is one way to try and understand it. This is an exchange of ideas.

ADAPT: Work with the Parent/Family Toward a Solution:
• Listen for areas of common agreement
• Negotiate around important issues
• Seek win-win solutions

What is in the best interest of the child? What is our common ground? The goal is to come to an answer together, one that feels productive for both.
CELEBRATING HOLIDAYS

Avoid

• Trivializing (by only “visiting” a culture)
• Misinformation (do your research)
• Creating “in” and “out” groups

Gather input from families

Develop a policy

Resources on Celebrating Holidays

• Article on ideas on alternative approaches to holidays: https://www.naeyc.org/resources/topics/anti-bias-education/holidays
• “Anti-Bias Education for Young Children and Ourselves” by Derman Sparks & Olsen Edwards (2010) has a chapter on the topic

What is one idea from today that you want to try or one thing you want to do differently?

CDA Portfolio Assignment: Begin this assignment for your portfolio

CDA Competency Standard IV: To establish positive and productive relationships with families

CSIV: Reflective Competency Statement IV

CSIV: Begin your Reflective Statement about this Competency Standard with a paragraph describing how you teaching practices meet this Standard. Then prepare at least one paragraph on each of the following:

CSIVa: How do you ensure that families are kept aware of what’s happening in their child’s daily/weekly life in your program?
CSI IVb: How do you ensure that you are aware of what’s happening in each child’s home life? How does that awareness direct your teaching practices?
Session B Welcoming Families: Creating Cultural Connections

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota KCF Content Area III: Relationships with Families

CDA Content Area IV: Building Productive Relationships with Families

Learning Objectives:
- *Describe how cultural or racial bias can influence our interactions with children and families;*
- *Examine strategies to address bias;*
- *Identify supportive strategies to build family partnerships.*

Objetivos de Aprendizaje:
- *Describir como el (sesgo) prejuicio racial o cultural puede influir en nuestras interacciones con los niños y familias;*
- *Examinar estrategias para manejar al sesgo cultural;*
- *Identificar estrategias de apoyo para construir alianzas con las familias.*

3 hours total
Counting Implicit Bias in Ourselves

1. **Self-awareness of our own implicit biases is an important first step.**

2. **Perspective taking (seeing through another’s lens, walking in another’s shoes) builds empathy and can reduce implicit bias.**

3. **Exposure to counter-stereotypical and positive images can reduce bias.**

4. **Opportunities to engage in constructive dialogue with diverse partners can help reduce implicit bias.**

How do I view behavior?

How do I view children’s behavior and the meaning of that behavior?
Who “gets in trouble” in my program/classroom?
Who do I expect will act out? Why? How do I think or talk about that child or children? Are there any patterns that show I may be reacting more strongly or more often to some children than others? Why might that be happening? What feelings does that bring up in me?

*Project Implicit* is a non-profit effort launched by researchers from different universities who are studying the topic. If you go to their website, you can take a test that will tell you about “your implicit associations about race, gender, sexual orientation, and other topics” (Social Attitudes) or a test about attitudes toward
different mental health related issues (addiction, anxiety, etc., termed “Mental Health”). No identifying information is collected and you get a report for yourself.
The link for Project Implicit: https://implicit.harvard.edu/implicit/

Addressing Bias with Children

- Listen and respond

- Normalize discussing differences and similarities among people

- Check your environment for messages

- Address expressed bias
**Strengthening Families™ Approach**

<table>

</tr>
</tbody>
</table>

**Recognizing and Responding to Family Risk Factors**

There are additional risk factors to be aware of, including:

- Ongoing environmental stress, such as living in poverty or underemployment, in difficult relationships, and/or in dangerous neighborhoods
- Social isolation and lack of outside support for the family
- A family’s lack of knowledge regarding appropriate child development or child rearing practices
- Alcohol or substance abuse in the family
- Family mental health issues, such as depression or anxiety
- Children’s persistently aggressive or challenging behaviors; difficult temperaments
• A family member who seldom recognize or reward their child's positive behaviors, but does have strong responses to their child's negative behaviors

• The challenge of caring for a child (or other family member) with physical, cognitive, or emotional disabilities or chronic serious illness

### Barriers to Family Involvement in Child Care Programs

• Cultural values and practices are not reflected or valued

• Language Barriers

• Perceived imbalance of power

• Personal history with school or child care programs

• Assumptions

• Time/Logistics

• Lack of meaningful opportunities

• Others...

### Sharing Goals for Children: Families and Early Educators

• What are their hopes and dreams?

• Checking in

• Set regular check ins

• Share observations and wondering about meaning

• Share thinking about next steps
The Protective Factors Framework

Five Protective Factors are the foundation of the Strengthening Families Approach: parental resilience, social connections, concrete support in times of need, knowledge of parenting and child development, and social and emotional competence of children. Research studies support the common-sense notion that when these Protective Factors are well established in a family, the likelihood of child abuse and neglect diminishes. Research shows that these protective factors are also “promotive” factors that build family strengths and a family environment that promotes optimal child and youth development.

Parental Resilience
No one can eliminate stress from parenting, but a parent’s capacity for resilience can affect how a parent deals with stress. Resilience is the ability to manage and bounce back from all types of challenges that emerge in every family’s life. It means finding ways to solve problems, building and sustaining trusting relationships, including relationships with your own child, and knowing how to seek help when necessary.

Social Connections
Friends, family members, neighbors and community members provide emotional support, help solve problems, offer parenting advice and give concrete assistance to parents. Networks of support are essential to parents and also offer opportunities for people to “give back,” an important part of self-esteem as well as a benefit for the community. Isolated families may need extra help in reaching out to build positive relationships.

Concrete Support in Times of Need
Meeting basic economic needs like food, shelter, clothing and health care is essential for families to thrive. Likewise, when families encounter a crisis, such as domestic violence, mental illness or substance abuse, adequate services and supports need to be in place to provide stability, treatment and help for family members to get through the crisis.

Knowledge of Parenting and Child Development
Accurate information about child development and appropriate expectations for children’s behavior at every age help parents see their children and youth in a positive light and promote their healthy development. Information can come from many sources, including family members as well as parent education classes and surfing the Internet. Studies show information is most
effective when it comes at the precise time parents need it to understand their own children. Parents who experienced harsh discipline or other negative childhood experiences may need extra help to change the parenting patterns they learned as children.

**Social and Emotional Competence of Children**
A child or youth’s ability to interact positively with others, self-regulate their behavior and effectively communicate their feelings has a positive impact on their relationships with their family, other adults and peers. Challenging behaviors or delayed development creates extra stress for families, so early identification and assistance for both parents and children can head off negative results and keep development on track.

**Culturally responsive practices with families:**
- Learning about the child and family’s culture and preferences
- Creating welcoming environments for families from diverse racial and cultural groups
- Attending to communication and finding what works for the families we serve
- Negotiating conflicts respectfully
- Being aware of the impact of implicit bias, and working to counter it in ourselves, our programs and our interactions
- Attending to the give and take of partnerships with parents and families
- Collaborating with families in setting goals for learning and development

Introducción a las necesidades especiales y cómo apoyar a las familias

Clase 6
Sesiones A y B
6 horas

Session A

Primary Core Competencies and Parent Aware Area
The primary Core Competencies and CDA Content Area are listed here to help you understand why these topics are part of the MN Child Care Credential and where you can go for further information. These may not be the only areas addressed, but they are the primary influences behind the session content.

Minnesota’s KCF: Content Area II: Developmentally Appropriate Learning Experiences

CDA Content Area: To advance physical and intellectual competence

Learning Objectives
• Describe strategies for increasing social/ emotional competence for children with challenging behaviors
• Identify red flags in development
• Explain the importance of observation in early care environments

Objetivos de aprendizaje
• Describir estrategias para aumentar la competencia social / emocional de los niños con comportamientos desafiantes
• Identificar banderas rojas en el desarrollo
• Explicar la importancia de la observación en centros y hogares de educación temprana

Understanding Behavior and its Impact on Development

“Environments that are engaging, predictable, and characterized by on-going positive adult-child interactions are necessary for promoting children’s social and emotional development and preventing challenging behaviors.”

“Children are less likely to engage in problem behavior when they know what to do, how to do it, and what is expected.”

• Children may display certain behaviors as a means of communication and to assist them in understanding the world
Behaviors can communicate a need, such as:

- To protect from an overwhelming situation
- To intensify sensory input to a level they can feel
- To reduce sensory input so they can function,
- To meet the individual’s needs or wants
- To organize or make sense of their environment

<table>
<thead>
<tr>
<th>Motivation/ Cause</th>
<th>Description of Behavior</th>
<th>Strategies to Change Behavior</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sensory (always consider whether the child is physically able to perform task)</td>
<td>Child is using behavior to get or avoid sensory input</td>
<td>Deep pressure input, squish games, tickle games, sensory play, swinging, jumping, lotion, soft music, dim lights</td>
</tr>
<tr>
<td>Escape</td>
<td>Child is avoiding an “undesired” or difficult task</td>

### Environmental Considerations
- Visual schedules and Supports
- Provides structure and consistency
- Organized Environment
- Should be at child’s level!
- Lighting
- Provide break space

### Communication
- Allow time for processing
- Use consistent language
- Tell child what to do rather what not to do

### Sensory
- Minimize stimulation
- Provide fidget toys/ sensory modifications
- Sensory activities (sensory table, play dough, etc.)
- Climbing structures

### Schedules and Routines
- Posted schedules
- Transitions: Routines that alert children to when activities will begin, stop or change.

**You will note that many strategies can cross multiple categories**
Red Flags in Development

Red flags are behaviors that should warn you to stop, look, and think and then observe and document. To complete this process,

- Know the normal patterns of growth and development.
- Observe a child in a variety of situations.
- Look for patterns or clusters of a behavior.
- Compare the child’s behavior to a “norm” of six months younger and six months older.
- Note how much the child has grown in the past 3-6 months—has he/she progressed?
- Keep in mind the factors that may be influencing the development.

Notes on Possible Red Flags
(for more on Red Flags go to http://helpmegrowmn.org/HMG/GetHelpChild/WhenRefer/RedFlags/index.html)
When concerns arise, we want to look at possible reasons for the concerns. The following are some questions to ask yourself when concerns arise:

- Is the expectation we are having developmentally appropriate?
- Is the concern/behavior consistently occurring?
- Are there cultural components to be aware of that impact development?
- Is the area of concern getting in the way of
  - Learning
  - Communication
  - Social Interactions

We also want to look at the whole child and the whole family situation and factors that may impact the child’s development, these may include:

- Cultural differences
- Poverty
- Abuse/ neglect in the family
- Nutrition
- Sleep issues
- Allergies
- English Language Learners (multiple languages)
- Birth risk factors (e.g. prematurity)

For more information on typical milestones for young children, as well as a link to refer a child for screening and possible additional services when concerns arise, go to: [http://helpmegrowmn.org/HMG/index.htm](http://helpmegrowmn.org/HMG/index.htm)

For more ideas about how to address developmental concerns with parents, here is a link to a free self-guided module on how to talk to parents about their child’s development from the Center for Disease Control: [https://www.cdc.gov/ncbddd/watchmetraining/module4.html](https://www.cdc.gov/ncbddd/watchmetraining/module4.html)
Session A: Homework and Portfolio Assignment

**Note:** Exercise 2 is best done in class at the end of Session A. If you didn’t get it finished, please complete before the next session as it will be discussed at the beginning of Session B.

2. Exercise 2: Complete the “What is the Behavior” grid at the end of this packet for either a child who is in your care now or a child you know. Be prepared to share this information at the next session. Use the Help Me Grow site as a reference for what is to be expected at the child’s age: [http://helpmegrowmn.org/HMG](http://helpmegrowmn.org/HMG)

**Primary Core Competencies and Parent Aware Area**
The primary Core Competencies and CDA Content Area are listed here to help you understand why these topics are part of the MN Child Care Credential and where you can go for further information. These may not be the only areas addressed, but they are the primary influences behind the session content.

**Minnesota’s KCF: Content Area II: Developmentally Appropriate Learning Experiences**

**CDA Content Area:** To Advance physical and intellectual competence

**Learning Objectives**
- Understand when and where to refer for screening and/or assessment
- To be aware of the resources and services for children with special needs including eligibility criteria and how to support families in accessing these services
- To have a general understanding of the most common special needs and special health needs and the impact on development

**Objetivos de aprendizaje**
- Entender cuándo y dónde referir para examen o evaluación
- Conocer los recursos y servicios para los niños con necesidades especiales incluso criterios de elegibilidad y cómo apoyar a las familias en el acceso a estos servicios
- Tener una comprensión general de las necesidades especiales más comunes y las necesidades especiales de salud y el impacto en el desarrollo

---

**Most Common Disabilities and Special Health Care Needs**

**Attention Deficit Hyperactivity Disorder (ADHD)**

**Strategies**

**Resources**
Autism Spectrum Disorder:

Autism affects the persons overall development in 3 primary areas:
- the way a person communicates; understands and uses language,
- how the person interacts socially with others,
- how the person understands and responds to his environment and the world around him.

Referral for Screening and Assessment – Notes
“Early childhood inclusion embodies the values, polices, and practices that support the right of every infant and young child and his or her family, regardless of ability, to participate in a broad range of activities and contexts as full members of families, communities, and society. The desired results of inclusive experiences for children with and without disabilities and their families include a sense of belonging and membership, positive social relationships and friendships, and development and learning to reach their full potential. The defining features of inclusion that can be used to identify high quality early childhood programs and services are access, participation and supports.”

Early Childhood Inclusion: A Joint Position Statement of the Division for Early Childhood (DEC) and the National Association for the Education of Young Children (NAEYC), 2009

Benefits to Inclusion

A benefit to inclusion that is important to me is:

Resource for early childhood programs in Minnesota:
The Center for Inclusive Child Care: [https://www.inclusivechildcare.org/](https://www.inclusivechildcare.org/)
- CICC provides free relationship-based professional development (RBPD) including support, training, modeling and resources to child care programs throughout Minnesota, including supporting the unique needs of infants and toddlers in your care.
- CICC provides online information and resources including Tip Sheets on:
  - Sharing Concerns with Families: [https://www.inclusivechildcare.org/resource-library/self-study/sharing-concerns-families](https://www.inclusivechildcare.org/resource-library/self-study/sharing-concerns-families)
Session B: Portfolio Assignment

Competency Standard IV: To establish positive and productive relationships with families

CS IV RC: Resource Collection Items

1. RC IV: Collect a Family Resources Guide that you might choose to share with families you serve. The Guide should include all of the helpful information you think they might need. At a minimum, you must include the following required items:

2. RC IV-1: The name and contact information (phone number, website, etc.) of a local agency that provides family counseling.

3. RC IV-2: The name and contact information (phone number, website, etc.) of a translation service for families whose home language is other than English as well as a service that provides American Sign Language translation.

4. RC IV-3: The name, contact information and brief descriptions of at least two agencies in the community that provide resources and services for children with disabilities (in most communities, the local school district provides these services).

Places to start:

Help Me Grow website: http://helpmegrowmn.org/HMG

MNhelp.info website (a great variety of resources for families): https://mnhelp.info/

Glossary

Developmental delay: a child not reaching one or more developmental milestones by an expected time period. http://helpmegrowmn.org/HMG/HelpfulRes/Glossary/index.html

Sensory Integration: The process of how an individual receives information and processes it based on his/her senses (touch, taste, smell, sound, sight). This may include how one perceives his/her body, and the world around him/her. According to the theory of sensory integration, the many parts of the nervous system work together so that one can interact with the environment effectively and experience appropriate satisfaction. Having poor sensory integration may interfere with activities necessary for daily functioning (e.g. brushing teeth, playing on play equipment, hugging). (from www.pathways.org/glossary)

</tr>
<tr>
<td>Talk about development regularly</td>
<td>I am so happy to be Taylor’s new teacher! I care a lot about making sure all my children are on track in terms of how they play, learn, speak, act, and move for their age, so I will be looking for and tracking Taylor’s developmental milestones and sharing his progress with you regularly. It would be great if you would look for milestones at home, too, and let me know what you’re seeing as well. I have some free milestone checklists that can help.</td>
</tr>
<tr>
<td>Share resources</td>
<td>A great way to monitor Taylor’s developmental milestones is with these checklists. They can help you understand typical milestones he should be reaching for his age and those to look for as he gets older. You can place them on the refrigerator for quick and easy reference throughout the day.</td>
</tr>
<tr>
<td>Encourage families to use milestone checklists or the Milestone Moments booklet to monitor their child’s development at home. Find these free resources here: <a href="http://www.cdc.gov/Milestones">www.cdc.gov/Milestones</a></td>
<td>It sounds like you are pretty worried and I hear you saying that you do not hear Taylor speak clearly at home. Is that correct?</td>
</tr>
<tr>
<td>Use good listening skills</td>
<td>Let’s talk about what you have noticed at home. Can you describe specific situations?</td>
</tr>
<tr>
<td>Listen closely, make eye contact, nod when appropriate, and be silent when the parent is speaking</td>
<td>Is there anything else about Taylor’s development you’d like to talk about?</td>
</tr>
<tr>
<td>Repeat the parent’s main points when you respond so he or she will know you heard and understood</td>
<td></td>
</tr>
<tr>
<td>Consider how the parent feels about what he or she is saying</td>
<td></td>
</tr>
<tr>
<td>Watch and listen closely for clues to those feelings and acknowledge them when you respond</td>
<td></td>
</tr>
<tr>
<td>Probe for more information when necessary</td>
<td></td>
</tr>
</tbody>
</table>

| When you have concerns to share: |  |
| Highlight the child’s strengths | We love having Taylor in class. He follows the classroom rules and really loves to sing, dance, and act during our circle time. |
| Let the parent know what the child does well and the milestones he or she is meeting | Since our last meeting, I have noticed a few things about Taylor that I would like to discuss with you. I’ve been completing a milestone checklist for him, like I do for all the children, and I see he is meeting his cognitive milestones very well. However, he is not meeting a few of his language/communication milestones. For one, I have noticed that Taylor doesn’t speak clearly enough for most people to understand. As you can see on the checklist, a five-year-old typically speaks clearly. |
| Keep the conversation positive | There might not be anything to be concerned about, but I do think it’s important to talk to Taylor’s doctor about this in the next few weeks to be sure. Take this checklist with you when you go, share it, and ask the doctor for a developmental screening. This will help the doctor and you to know whether Taylor might need a little extra help. Getting help early can make a big difference! Let me know if you need anything from me for that doctor’s appointment. |
| Make sure you are well prepared | Thank you for taking time to meet with me again. I know the last time we talked about Taylor’s development, we were concerned about his language skills. Have you been able to talk with Taylor’s doctor about this? |
| Invest time in building meaningful relationships with the parents and discuss developmental progress regularly |  |
| Complete a milestone checklist for the child’s age to help the parent know that you are basing your comments on facts and not just feelings |  |
| Encourage the parent to share any concerns with the child’s doctor |  |
| Remember it’s not your role to make or even suggest a diagnosis |  |
| Remind parents of the importance of acting early on concerns |  |
| Follow-up with the family in a few weeks |  |

[www.cdc.gov/ActEarly](http://www.cdc.gov/ActEarly) | [1-800-CDC-INFO (1-800-232-4636)](tel:1-800-232-4636) |
Tips for Talking with Parents about Developmental Concerns

How to respond

**If parents disagree with you about their child’s behavior or abilities**

**Try:** Sometimes children behave differently at home than they do at school. I’m only able to share with you what I’ve seen in the classroom. How does Taylor act when he’s around other children in the neighborhood?

**If a parent gets angry or upset**

**Try:** I understand that you are upset. Like you, I want what’s best for Taylor. That’s why it’s so important for me to share with you what I am seeing. If he does need some extra help, I want him to have the opportunity to get it as soon as possible. Do you want to discuss your questions and concerns now, or would you rather think about this a little more and meet again (in a couple of days, next week, etc.)?

(If the parent hasn’t already been given a milestone checklist, give one and suggest that he or she fill it out and bring it back.)

**If a parent reports that the doctor said to wait and see**

**Try:** While it’s true that every child develops at his or her own pace, there are certain milestones we typically see from most children by Taylor’s age. If you are concerned, you can reach out to early intervention directly to see if Taylor qualifies for help through free or low-cost services. You don’t need a doctor’s referral. Acting early may make a real difference for Taylor, so it’s better to find out for sure. If his development is delayed enough to qualify for help, you can get those services started right away and then follow-up with the doctor.

Be Mindful of Cultural Differences

Not all cultures place the same emphasis on particular developmental milestones. When communicating with families, be aware of your own cultural biases in making decisions about how to communicate with families.

Promoviendo las relaciones entre padres / familia extendida e hijo

Clase 7
3 horas

Descripción general de la clase 7

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

KCF Content Area III: Relationships with Families

CDA Content Area (Infant Toddler Edition):
   Standard IV: To establish positive and productive relationships with families

Parent Aware training Indicator:
TR3d. Demonstrates ability to communicate program information in parent’s primary language (for example, through on-site staff, qualified volunteers, an interpreter service or translated materials)
OR All lead teachers/child care providers have completed at least 6 hours of training in working with families from different cultures and socio-economic levels.

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

• Objetivo 1: Describir el proceso de establecer una identidad como padre
• Objetivo 2: Desarrollar estrategias para promover las relaciones entre padres y niños
  • Objetivo 3: Practicar la toma de perspectiva
Glosario

Pirámide de perspectiva: tratando de ver desde el punto de vista de todos para comprender mejor y responder, y para apoyar la relación padre / hijo. En este caso sería: ¿qué significa esto para el bebé? ¿Qué significa esto para el padre? ¿Qué significa esto para el cuidador (usted)?

Acknowledge-Ask-Adapt: un proceso receptivo para negociar las diferencias entre adultos (docente con padres, personal con personal, etc.)

- Reconocer: Reconozca la diferencia entre sus pensamientos y los pensamientos de otra persona (las diferencias pueden provenir de diferencias culturales o contextuales). Con un adulto, esto generalmente se hace verbalmente
- Preguntar: le pido respetuosamente al adulto más información para comprender y aclarar mejor el problema
- Adaptarse: buscar un terreno común cuando sea posible. Llegue a una resolución que aborde el problema real (PITC y L. Derman-Sparks)

La Pirámide Perspectiva: Considerando múltiples perspectivas

¿Cómo es ser este padre?
¿Cómo es ser este niño?
Vamos a practicar:

¿Cómo es ser este niño?

¿Cómo es ser los otros niños?

¿Cómo es ser este padre?

¿Cómo es ser este cuidador?

Other perspectives (other family members, etc.)
RECONOCER: Reflexionar y Escuchar
• Comunicar la conciencia del problema
• Transmite interés sincero y receptividad
• Involucrar a la familia en buscar una solución conjunta

PREGUNTAR: Aprender sobre la perspective de la otra persona
• Recopilar datos, aclarar
• Presta atención a las respuestas verbales y no verbales
• Reafirma lo que piensas que el padre u otra persona está diciendo

ADAPTAR: Trabajar con la familia para llegar a una solución
• Escuche las áreas de acuerdo común
• Negociar en torno a cuestiones importantes
• Buscar soluciones ganar-ganar
ACKNOWLEDGE, ASK AND ADAPT:
A PROCESS IN COMMUNICATING

Step 1: Acknowledge

How do you recognize the need for communication with the other person? How does your attitude convey sincere interest and response? What can you say to the other person to communicate an awareness that there is a problem you need to jointly solve?

- Take time to think about how you feel about this issue and get clarity on the reasons behind your feelings.
- Listen carefully to the other person’s concern. If you bring up the concern, do it respectfully with an attitude of wanting to understand the issue. Seek the other’s point of view without being critical, arguing, disagreeing or trying to solve the problem.

Step 2: Ask

How can you get information that will help you understand more precisely the other person’s point of view.

- The next step is data gathering, trying to get to the real sources for conflict or misunderstanding for the other person or for you. There is more than one way to ask. It may be appropriate to ask directly and then follow with more questions to clarify. Or there may be other ways you can find out through observations or other means rather than asking direct questions, which sometimes cause a defensive reaction or are culturally inappropriate.
- Pay attention to verbal and nonverbal responses. Restate what you think is being said; take time to be sure you are meaning the same thing in the language you are using.

Step 3: Adapt

How do you work with the other person to define the issues and boundaries of the problem? Do you seek “common ground” as the basis for negotiation? Do you open up a negotiation with the other person about what to do?

- Once the issues have been defined, seek out the common ground by stating your areas of greatest importance to each other. Listen carefully for areas of common agreement.
- Negotiate around the areas of important agreements and boundaries. Come to a resolution that addresses the real/major issues. Sometimes we have to agree to disagree.

**Homework:** This week’s assignment is to ask one parent in your program about their child’s personality in terms of:

- Activity levels
- Approach to unknown people or situations
- General mood
- “Soothability” (how easily do they settle after being upset?)

Choose one day between your conversation with the parent and our next class to focus on this child. Notice how the parents' description shows up in that child’s experiences throughout the day. Compare the parent’s description with your own observations of this child. How are your view of the child and the parent’s view similar? How are they different? Describe any new ideas or understanding this gives you about the child, the parent, or your own perspective.

**NOTAS**
Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota KCF Content Area I: Child Development and Learning

CDA Content Area VIII: Understanding principles of child development and learning

Learning Objectives:
This session was developed to address the following learning objectives. You can reasonably expect that, by the end of this session, actively engaged participants will be able to:

- Name three types of knowledge or core considerations that influence developmentally appropriate practice.
- Describe the domains of development and the types of skills within each domain
- Match developmental milestones to the age at which they typically occur (for example – first words during infancy, toilet learning during the toddler stage, cooperative play during preschool, and peer relationships during school age)

Objetivos de aprendizaje:
- Nombrar tres tipos de conocimiento que influyen en la práctica apropiada.
- Describir los dominios de desarrollo y los tipos de habilidades dentro de cada dominio.
- Conectar los acontecimientos importantes del desarrollo a la edad en que normalmente ocurren (por ejemplo, primeras palabras durante la infancia, control del esfínter durante la etapa de niño pequeño, juego cooperativo en educación preescolar y las relaciones con otros niños de edad escolar)
Theories and Theorists

There are many foundational and emerging theories in early childhood education. Below is a list of some of the most important theorists that guide our work in early childhood education. As you watch the video, take notes. Listen for words or ideas that particularly stand out for you or have influenced your own beliefs about children’s development and learning.

Sigmund Freud - Psychosexual Theory

Maria Montessori – Montessori Method

Arnold Gesell – Maturation Theory

Rudolph Dreikurs – Model of Social Discipline

Erik Erikson - Psychosocial Theory/Eight Stages of Development

Abraham Maslow – Hierarchy of Needs
Developmentally Appropriate Practice Overview

For more NAEYC Resources on developmentally appropriate practice, visit: https://www.naeyc.org/resources/topics/dap

Developmentally appropriate practice is about:

- Teaching that adapts to the age, experience, interests, and abilities of individual children.
- Meeting children where they are, taking into account their physical, emotional, social, and cognitive development and characteristics.
- Having goals for children that are both challenging and achievable – a stretch but not an impossible leap.
- Recognizing that what is challenging yet achievable will vary, depending upon the individual child’s development, experiences, knowledge, skills, and the context in which the learning take place.

Excerpt from Basics of Developmentally Appropriate Practice: An Introduction for Teachers of Children 3 to 6
Core Considerations for Developmentally Appropriate Practice

When considering what activities or actions fit within developmentally appropriate activities, caregiver must consider:

**What is age appropriate?**

**What is individually appropriate?**

**What is appropriate to the social and cultural context?**
About a Child Activity
Write about a child you know well.

How old is the child?

What kind of things can this child do well?

What things does he or she struggle with?

What does this child like to do?

What does this child not like to do?

What words would you use to describe this child?

What is this child like – friendly, shy, energetic, calm, excitable, outgoing, risk taking, cautious, etc.?

What is the child’s family situation?

What language or languages does this child speak?

What cultural practices does this child participate in?

What foods does this child like? Not like?

12 Principles of Child Development

1. All areas of development and learning are important.

2. Learning and development follow sequences.

4. Development and learning result from an interaction of maturation and experience.

5. Early experiences have profound effects, both cumulative and delayed, on development and learning.
6. Development proceeds toward greater complexity, self-regulation, and symbolic or representational capacities.

7. Children develop best when they have secure relationships.

8. Development and learning occur in and are influenced by multiple social and cultural contexts.

9. Children learn in a variety of ways.

10. Play is an important vehicle for developing self-regulation and promoting language, cognition, and social competence.

11. Development and learning advance when children are challenged.

12. Children’s experiences shape their motivation and approaches to learning.

**Domains of Development**

**Social and Emotional**

**Language and Literacy**

**Cognitive (including math, science and social systems – learning to understand themselves and others as part of a community)**
Session A-Field Work (Not for CDA portfolio; it is for the next class)

Observe two children of the same age for 15 minutes. Write down everything that the children do during those 15 minutes (to the best of your ability - it can be hard to keep up!). This method of observation is called a “Narrative Recording” and is a useful way to capture a rich description of children’s behaviors.

After your observation, take a few minutes to connect some of the behaviors that the children exhibit that are the same as the behaviors found in the Important Milestones reviewed during the session. What can these children do? What can they not yet do?

Note the differences in development between the 2 children. How are they alike developmentally? How are they different? What other similarities and differences do you notice between these two children? Do they like the same things? Do they behave in the same ways when they are tired or hungry?

Bring the observation notes with you to session B. You will discuss with classmates at the beginning of class and you will use your observation notes for a class activity.
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota KCF Content Area I:** Child Development and Learning

**CDA Content Area VIII:** Understanding principles of child development and learning

**Learning Objectives:**
This session was developed to address the following learning objectives. You can reasonably expect that, by the end of this session, actively engaged participants will be able to:

- **Describe at least three influences on development that result in individual variation between children.**
- **Identify three central components of executive function skills.**
- **Explain the impact of culture on development.**

**Objetivos de aprendizaje:**

- **Describir al menos tres influencias en el desarrollo que resultan en una variación individual entre los niños.**
- **Identificar tres componentes centrales de las competencias de la función ejecutiva.**
- **Explicar el impacto de la cultura en el desarrollo infantil.**

Trainers should always be mindful of these objectives and be sure their delivery and feedback during the course supports the participants’ mastery.

**Types of Individual Differences**
Children of the same age may be different in many ways. Some of the individual differences include:
Executive Function Skills

Inhibitory Control

Working Memory

Flexible Thinking

Recognizing Executive Function Skills

Look back over your notes from your narrative observation. Where did you see children using their EF skills? Make a list of the behavior and the EF skill it demonstrates. Remember that many of these skills are overlapping! A child putting a puzzle together, for example, is using her inhibitory control skills to control her behavior, her cognitive flexibility to try the puzzle pieces in different combinations, and her working memory to remember what the picture is supposed to look like when the puzzle is put together. With a partner, list as many connections to EF as you can in the time allotted.
Examples of Executive Function Skills across Age Ranges

<table>
<thead>
<tr>
<th>Age Ranges</th>
<th>Inhibitory Control</th>
<th>Working Memory</th>
<th>Flexible Thinking</th>
</tr>
</thead>
<tbody>
<tr>
<td>What EF skills might look like across the developmental spectrum</td>
<td>Self-control, the ability to choose a response rather than simply react</td>
<td>Holding information in your mind and working with it</td>
<td>The ability to think about something in more than one way; used to solve problems in appropriate contexts</td>
</tr>
<tr>
<td>Infants (0-24 months)</td>
<td>can move around a barrier to get a desired object</td>
<td>responds to familiar caregiver (Ex: smiles when parent enters the room)</td>
<td>shifts attention based on anticipation or discomfort (Ex: looks away from unfamiliar caregiver, etc.)</td>
</tr>
<tr>
<td></td>
<td>can maintain focus for brief amount of time</td>
<td>mimics familiar actions (Ex: covers eyes for peek-a-boo) shows surprise when an object is not where expected</td>
<td>adjusts to changes in location</td>
</tr>
<tr>
<td></td>
<td>signals a need for an adult (Ex: cries when her diaper needs to be changed)</td>
<td>shows surprise when an object is not where expected</td>
<td></td>
</tr>
<tr>
<td></td>
<td>beginning response inhibition (won’t touch something when told to “stop”)</td>
<td>reacts when adults change their routine or pattern</td>
<td></td>
</tr>
</tbody>
</table>
| Early Childhood (2 - 5 years) | can follow multiple step instructions  
| | takes turn  
| | waits in a line  
| | pays attention to a caregiver who is talking  
| | pays attention to a peer who is talking (Ex: participates in back and forth conversation)  
| | responds appropriately to directions (Ex: Stops running when told not to run)  
| | can remember two step instructions  
| | can recall information from familiar stories (Ex: acting out parts of the story “Little Red Riding Hood”)  
| | remembers what comes next in a pattern  
| | shares past experiences in context (Ex: During a discussion about zoo animals, shares that he saw a bear at the zoo)  
| | can play games like Memory or simple  
| | knows there are different rules in different settings (Ex: I can run on the playground but not inside)  
| | begins to use strategies to resolve conflict (Ex: “We can take turns or ask a teacher for help.”)  
| | thinks of words that rhyme  
| | solves simple problems  
| | puts puzzles together  
| | builds representational structures out of different materials (Ex: builds a spaceship out of blocks)  
| | can sort objects  
<p>|</p>
<table>
<thead>
<tr>
<th>Young Children (6 - 12 years)</th>
<th>games with rules like Connect Four or Chutes and Ladders</th>
<th>according to different characteristics (Ex: put the red toys together, now put all of the animal toys together)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• can successfully follow different sets of rules</td>
<td>• follows rules independently (Ex: puts materials away without reminders)</td>
<td>• solves increasingly complex problems</td>
</tr>
<tr>
<td>• can reflect on mistakes</td>
<td>• can remember and work with 5 pieces of information (Ex: Can participate in complex games like basketball, etc.)</td>
<td>• changes behaviors to fit in in different situations (Ex: uses different language with friends than with authority figures)</td>
</tr>
<tr>
<td>• can ignore irrelevant information to focus on what is important (Ex: “tuning out” noises while reading)</td>
<td>• can play more complex games like chess or Minecraft</td>
<td>• continued accuracy when switching focus</td>
</tr>
<tr>
<td>• games that require inhibition like tag, double dutch, etc.</td>
<td></td>
<td>• increased ease in adapting to changing rules</td>
</tr>
</tbody>

**Influences of Culture**

**Culture is...**

PITC Guide to Culturally Sensitive Care, 2nd Ed.:

“Culture is the learned and shared knowledge that specific groups use to generate their behavior and interpret their experience of the world. It comprises beliefs about reality, how people should interact with each other, what they ‘know’ about the world, and how they should respond to the social and material environments in which they find themselves.” (p.xi).

“Culture is more than a collection of artifacts and holidays. In its broadest sense, it is a set of values, attitudes, beliefs, and rules for behavior by which we organize and give meaning to the world.” (Carol Brunson Day, 1988)
The Iceberg Concept of Culture
Like an iceberg, the majority of culture is below the surface.

**Surface Culture**
Above sea level
*Emotional load:* relatively low
- food
- dress
- music
- visual arts
- drama
- crafts
- dance
- literature
- language
- celebrations
- games

**Deep Culture**
Unspoken Rules
Partially below sea level
*Emotional load:* very high
- courtesy
- contextual conversational patterns
- concept of time
- personal space
- rules of conduct
- facial expressions
- nonverbal communication
- body language
- touching
- eye contact
- patterns of handling emotions
- notions of modesty
- concept of beauty
- courtship practices
- relationships to animals
- notions of leadership
- tempo of work
- concepts of food
- ideals of childrearing
- theory of disease
- social interaction rate
- nature of friendships
- tone of voice
- attitudes toward elders
- concept of cleanliness
- notions of adolescence
- patterns of group decision-making
- definition of insanity
- preference for competition or cooperation
- tolerance of physical pain
- concept of “self”
- concept of past and future
- definition of obscenity
- attitudes toward dependents
- problem-solving roles in relation to age, sex, class, occupation, kinship, and so forth
Important Ideas Related to Culture

- Culture is about roles, rules, and practices that shape behavior
- Culture is characteristic of groups
- Culture is learned
- Individual members of a culture may experience the culture differently
- Culture is dynamic, it changes with time and other circumstances
- Cultural groups borrow and share practices from other cultural groups

Caring for and Educating Children with Special Needs: Using Child First Language
Using child first language means saying, “a child who has Down’s syndrome” rather than, “a Down’s syndrome child.” It is a more respectful way to talk about children. Let’s practice rephrasing the terms on this list.

Deaf child

Autistic child

Hyperactive child

Article: 22 Respectful Ways to Respond When Someone Uses the R-Word: https://themighty.com/2016/02/how-to-respond-when-someone-says-retard-or-retarded/
**The Caregiver’s Role**

Think of ways that the caregiver’s actions need to be modified when working with children with special needs.

**Caregiver’s actions when children with special needs are present:**

---

**Portfolio Assignment – Session B**

**Complete this assignment for your portfolio**

**Competency Standard I: To establish and maintain a safe, healthy learning environment**

1. **CSI RC: Resource Collection Items**

   RC I-3: Collect a sample of your weekly plan that includes goals for children’s learning and development, brief descriptions of planned learning experiences, and also accommodations for children with special needs (whether for children you currently serve or may serve in the future). Indicate the age group(s) for which the plan was intended.

2. **Write at least one paragraph:**

   CSIc: Reflect on the weekly plan you included in your Resource Collection. How does this plan reflect your philosophy of what young children need on a weekly basis? If the plan was not designed by you, what do you see as its strengths and/or what would you change? For Center-Based Infant/Toddler: Additionally, describe how you would adapt this weekly plan for use with each of the three age groups (young infants, mobile infants and toddlers).
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota KCF Content Area I:** Child Development and Learning

**CDA Content Area VIII:** Understanding principles of child development and learning

**Learning Objectives**
- Describe caregiver behaviors associated with respect and a positive climate for children
- Explain the link between caregiver behaviors and child development

**Objetivos de aprendizaje**
- Describir conductas del cuidador que demuestran respeto y un clima positivo para los niños
- Explicar la relación entre las conductas del cuidador y desarrollo infantil de los niños

**NAEYC Video Notes: Looking at the Basics of Developmentally Appropriate Practice**

---

**Positive Climate and Learning and Development**

**Positive Climate** = an environment that reflects a positive emotional connection between caregivers and children. In a positive climate environment there is warmth and enjoyment in the communications between caregivers and children. Caregivers demonstrate respect for children with words and actions. They also offer help so children know they can count on adults when they do not have sufficient experience or skills.

**Negative Climate** = an environment that reflects negative communications and interactions between caregivers and children. In an environment with negative climate, caregivers use negative or harsh communications such as yelling, threats, or sarcasm. An environment that reflects a
negative climate may also be characterized by caregivers who are disconnected or ignore the needs of the children.

**Caregiver Sensitivity**

**Sensitivity** = Caregiver’s awareness of children’s needs and their responsiveness to those needs. Sensitive caregivers demonstrate behaviors such as:

- Providing comfort and assistance
- Anticipating problems
- Noticing when children are struggling or are frustrated
- Responding to children’s emotions
- Noticing individual children
- Noticing children who are not engaged in activities
- Listening to children’s concerns and questions
- Responding when children seek help
- Demonstrating concern for all children
- Providing only as much help as needed for children to try new things

**Picture This**

Sensitive caregiving encourages children’s development. Choose four items from the list above and write examples of what the caregiver would say or do to encourage a child’s development.

1. 

2. 

3. 

4. 

**Reflection and Goal Setting**

Write down two things you have learned and one idea or strategy you want to apply to your work right away.

Two things I learned:
One idea or strategy I will apply:

---

**Assignment – Session C**

**Homework Assignment:**

Think about how a positive climate and caregiver sensitivity can promote children’s EF skills. How do you use your skills as a sensitive caregiver to do this? What are some additional ways you can create or use a positive climate and sensitivity to promote children’s EF skills? (May apply to Competency statement IIIa)
Etapas de la infancia

Clase 9
2 horas

Descripción general de la clase 9

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

KCF Content Area I: Child Development and Learning

CDA Content Area VIII: Principles of Child Development and Learning (Infant Toddler Edition):

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: Clasificar tres etapas de desarrollo y tareas de desarrollo relacionadas
- Objetivo 2: Distinguir los dilemas del desarrollo en cada etapa
- Objetivo 3: Formular estrategias para apoyar las tareas de desarrollo
Class 9 Overview:

<table>
<thead>
<tr>
<th>Time</th>
<th>Section Overview – Key Concepts</th>
<th>Overview of teaching technique for section</th>
</tr>
</thead>
</table>
| 15 minutes | Practice to reflection: Positive climate, caregiver sensitivity and EF | • Pair and share  
  • Facilitated group discussion                                                   |
| 25 minutes | Stages of Infancy                                                   | • Small group puzzle activity matching tasks to stages  
  • Large group debrief  
  • Overview of stages                                                               |
| 35 minutes | Dealing with dilemmas at each stage                                 | • Small group dilemma sort  
  • Small group strategize: one dilemma per group  
  • Report back  
  • Summary and additions                                                             |
| 10 minutes | When parents have concerns about ages and stages                    | ▲ Mini-lecture                                                                    |
| 25 minutes | Strategies to support developmental tasks                           | • Small groups: work on one of the three tasks (security, exploration, identity) at each stage  
  • Report back                                                                       |
| 10 minutes | Planning to Practice:                                                | • Review assignment, clarify as needed                                           |

Two things I learned about how positive climate and caregiver sensitivity can promote EF:
GLOSARIO

Etapas de la infancia (jóvenes, móviles, mayores):
• bebés pequeños se refiere a niños desde el nacimiento hasta los 8 meses de edad
• bebés móviles se refiere a niños de 8 a 18 meses de edad
• niños pequeños se refiere a niños de 18-36 meses de edad

Security: feeling safe and having needs met, feeling safe enough to interact or explore.

Exploración: los bebés descubren y examinan su mundo, las personas y los objetos en él utilizando todo su cuerpo y todos sus sentidos.

Identidad: un sentido de desarrollo de sí mismo. Los bebés pequeños no tienen un sentido de sí mismos como individuos separados: después del primer sexto mes comienzan a desarrollar un sentido de quiénes son como separados de su padre / cuidador principal.

Dilemas: un dilema es un problema que implica tener que hacer una elección difícil entre dos opciones.

Bandera roja: comportamientos que le causan preocupación en un área (s) del desarrollo de un niño. Deben advertirle que se detenga, mire y piense, y luego observe y documente.
Developmental Dilemma Scenario

1. **Thinking about the child**: What might the child be feeling? What task might this child be working on? Are they developing a new skill or understanding of the world? What might be challenging for them?

2. **Thinking about the caregiver**: If you were this child’s caregiver, what would this be like for you? What might be your worries, questions or frustrations?

Knowing what you do about this child, temperaments, the setting, what would you do to help this child work on their task while addressing the related challenges?

3. **Thinking about that parent/family member**: Do you have anything in common with what the parent might be thinking or feeling? How you might describe what the child is doing in positive terms? What is it they are learning or have learned to do that might be leading to this “dilemma”? What is exciting about this?

**One developmental dilemma I want to keep in mind:**

**Homework Assignment**: Your homework for next session is to choose an infant or toddler to observe between now and next session. Notice and write down things you see the child doing as he or she works on security, exploration and identity (note 2-3 things they do in each area).

NOTAS
Desarrollo del cerebro

Clase 10
2.5 horas

Descripción general de la clase 10

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

KCF Content Area IIb: Promoting Cognitive Development

CDA Content Area II: Steps to advance physical and intellectual competence (Infant Toddler Edition):

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: reconocer el desarrollo del cerebro como una función de la naturaleza que interactúa con la crianza
- Objetivo 2: generar estrategias para apoyar el desarrollo de la función ejecutiva y la autorregulación
- Objetivo 3: Distinguir las oportunidades de cuidado para servir y regresar (intercambios o interacciones de ida y vuelta)
GLOSARIO

**Función ejecutiva y autorregulación**: la creciente capacidad de los niños para controlar sus sentimientos y sus cuerpos. Esto incluye controlar lo que hace su cuerpo, controlar los sentimientos fuertes y ser capaz de enfocarse o prestar atención a algo. Los adultos ayudan a los bebés y niños pequeños a comenzar a desarrollar la autorregulación.

**Control inhibitorio**: se refiere al autocontrol; detenerse de hacer algo reflexivamente y, en cambio, tomar decisiones o ser intencional sobre sus acciones. En un aula, por ejemplo, una estudiante usa su control inhibitorio cuando deja de agarrar un juguete que quiere alejarse de otro niño o cuando tiene que esperar en la cola para darle la vuelta a la diapositiva.

**Memoria funcional**: la memoria funcional es la capacidad de mantener la información en su mente y poner esa información en uso. Los niños usan su memoria funcional cuando recuerdan las reglas de la clase como se puede correr afuera pero no dentro del aula.

**Pensamiento flexible**: también conocida como "flexibilidad cognitiva", es la capacidad de pensar en algo de más de una manera. Nos ayuda a cambiar la atención para responder a diferentes demandas o aplicar diferentes reglas en diferentes situaciones.

**Servir y regresar**: interacciones de ida y vuelta (o dar y recibir) que ayudan a los bebés y niños pequeños a desarrollar su cerebro y a aprender. Por ejemplo: un niño se acerca haciendo sonidos, gestos o expresiones faciales y un adulto responde apropiadamente al niño. Esto puede repetirse muchas veces y, en el caso de los recién nacidos y los bebés pequeños, ocurre con mayor frecuencia durante las rutinas.

**Estrés tóxico**: puede ocurrir cuando un niño experimenta dificultades fuertes, frecuentes y/o prolongadas sin suficiente apoyo de un adulto. (Tal estrés puede incluir abuso físico o emocional, negligencia crónica, abuso de sustancias del cuidador o enfermedad mental, exposición a la violencia y/o la carga acumulada de dificultades económicas familiares.) El estrés tóxico puede causar daño al cerebro.

</tbody>
</table>
**Building Better Babies con cuidado sensible y receptive**

El llanto de un bebé es la señal de comunicación perfecta: estamos biológicamente precableados para responder porque el bebé depende por completo del cuidador para sobrevivir. El cerebro infantil está poco desarrollado, no tiene la capacidad de regular la excitación y la emoción y depende de que el cuidador proporcione esta regulación. El cerebro se desarrolla en función de la experiencia, por lo que la forma en que los cuidadores responden a los gritos del bebé realmente afecta la eficacia con que el cerebro se conecta a sí mismo para que el bebé aprenda a tranquilizarse y autoregularse.

**Las investigaciones nos dicen que cuanto más responden los llantos de un bebé, menos llora el bebé.**

El bebé necesita que sus cuidadores respondan a sus señales:

- **Continuamente y sensiblemente** — primero descubriendo lo que el bebé intenta decírnos y luego respondiendo de la manera que mejor funcione para este bebé en particular.
- **Consistente y predecible** — **la mayor parte del tiempo** (¡ningún cuidador puede ser perfecto!).

** Esto le enseña al bebé que:** Se puede confiar en los adultos y las relaciones son agradables.

- Ella es una persona capaz que puede satisfacer sus necesidades y tener un efecto en el mundo que la rodea.
- El mundo es un lugar seguro para que él explore y aprenda.

**Algunas razones por las que los bebés lloran:** Para señalar una necesidad de comida, consuelo (¡Sí, puedo sentir solo!), atención, tacto, estimulación (¡Sí, puedo aburrirme!), o la necesidad de reducir la estimulación (¡estoy abrumado!). En respuesta a un exceso de excitación, miedo o malestar físico.

- El llanto inconsolable en las primeras 12 semanas a menudo se trata de organizar un sistema nervioso inmaduro: ocurre en el 85% de los bebés
- Reflejar desorganización / regresión / frustración justo antes de un hito de desarrollo importante (antes de que pueda sentarse y entretererme con juguetes o justo antes de aprender a gatear o caminar)

**¿Qué es el cuidado sensible?**

- **Apreciando que cada bebé es único** en muchas cosas, incluyendo:
  - Genética (características heredadas)
  - Temperamento (por ejemplo, luchador, cauteloso, flexible)
  - Influencias de las circunstancias ambientales
  - Y todos tienen días buenos y días malos: verifique con los padres las posibles razones por las que un bebé puede estar más inquieto (sueño, estrés familiar, etc.)

**Hay que estar pendiente de las señales verbales y no verbales- no solo apresurarse a hacer cosas para el bebé (tal vez ella está tratando de resolverlo por sí misma)**

- Preguntándose a usted mismo y al bebé lo que quiere; y entonces--
- Adaptar sus acciones de acuerdo con lo que el niño parece querer; y entonces--
- Observando cómo él / ella responde a tus acciones; y entonces--
- Modificar sus acciones de acuerdo con la respuesta del niño.
Maneras de calmar a un bebé agitado:
o Sostenga al bebé o esté cerca para que él lo pueda oír / ver. Cambie la posición del bebé, algunos bebés como la estimulación de mirar hacia afuera para que puedan ver más. Algunos bebés, especialmente bebés muy pequeños, les gusta 'envueltos'.
o Considere usar un portabebé, como un Snuggli, un Baby Bjorn, o un cabestrillo, que mantiene al bebé cerca, pero libera sus manos para satisfacer las necesidades de otros niños.
o Muévete! Los bebés son apaciguados por el movimiento: bailar, rebotar, balancearse, caminar, rockear, cambiar la posición del bebé.
o Proporcione sonidos relajantes: hablar, cantar o sonidos de zumbidos rítmicos, monótonos y de tono bajo, p. ej. "Máquinas para dormir" o música suave.
o Entretener-espejos, ventiladores de techo, móviles, caras tontas, imitando al bebé.
o Trate de mantener la calma y la calma y tomar un descanso cuando lo necesite, p. turnarse con otro cuidador porque los bebés pueden sentir nuestra tensión o frustración.
o Trate de no tomar el llanto del bebé personalmente, a veces solo tiene que esperar allí con un bebé al que le resulta difícil calmarse. La experiencia del bebé es que ella tiene un "compañero" para tratar de sentirse mejor, incluso si lleva un tiempo.

Michele Fallon LICSW, IMH-E®
Infant and Early Childhood Mental Health Consultant

Lally, R. and West Laboratory for Educational Research and Development, Program for Infant and Toddler Caregivers
Teaching a baby to “cry better” through responsive care in her childcare setting promotes trust and regulation which makes the baby’s cues easier to read.

Which helps her learn and also helps parents feel more effective and therefore likely to be more responsive themselves.

Which helps the parents and baby enjoy being together.

Which promotes healthy attachment.

Which makes a more competent baby who feels that the world is a safe place in which to explore and learn.
**In class:**
Write a few sentences on what infants and/or toddlers do as they explore their identity and how you (their caregiver) support them to feel good about who they are (their identity). (Applies to CDA Competency Statement IIIa)

For today’s session, Brain Development, write a note to yourself one idea about brain development. It can be for your own reminder, or something you’d like to share with parents or others.

**Homework:** This week, practice 'serve and return' activities: notice something the child initiates that you respond to (e.g. a smile, imitation of sounds, a game like peek-a-boo) and something that you initiate that the child responds to. Do this at least once a day. Write down the activity and who initiated it (you or the baby). Be sure to try these serve and return activities during daily routines such as diapering and feeding as well as during play.
Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota’s KCF Content Area I: Child Development and Learning

CDA Content Area VIII: Understanding principles of child development and learning

Learning Objectives:
• Define basic cognitive development skills and expectations.
• Identify variations in cognitive development.

Brain Development and Plasticity Notes:

Nurturing Cognitive Development

Visual Stimulus (Stuff We See!)
During early childhood, children’s vision abilities increase. With each day and new experience, their ability to see objects, the environment, and movement are expanding. Changes or differences in the environment and the materials available to them can catch their visual attention and interest. Knowing this, caregivers need to regularly change the materials, displays, and other things children see to help them develop visual abilities. Do: Display children’s artwork, family pictures, or content posters at child eye level. Don’t: only choose commercial decorations, put something on a wall just because it is there (some blank space is ok!), or have so many things to look at that children get distracted (we call this “visual clutter”). Following these guidelines will allow children to more easily pay attention to and recognize the important features and information in the environment.

Auditory Stimulus (Stuff We Hear!)
Research has shown that music stimulates different areas of the brain and promotes cognitive development. For a young child’s developing brain, music and sound patterns expand their world, encourage them to tell the difference between different types of sounds, and help them learn to enjoy music. Introducing opportunities to interact with instruments helps children expand their mental concept of an object while allowing them control over what the music sounds like. In addition to instruments, you can give children a chance to improve their auditory (hearing) through vocal or instrumental recordings. You might consider having a permanent music center in your early childhood program, or having a music box filled with various instruments always accessible.
**Emotional Climate**
Cognitive development can be improved or decreased by the emotional climate created by a caregiver. Children being cared for in nurturing, responsive settings where trust, security, and a sense of respect are established will express their ideas, explore freely, take risks, and develop as they, as individuals, should. Sadly, children in negative climates won’t do these things. They may fail to take risks and explore. The emotional impact of the caregiver-created climate affects how children develop and thrive.

**Independent Learning**
An effective early childhood program promotes independent learning through its environmental design and available experiences. Even infants and toddlers try to do things on their own, in their own way. It is absolutely necessary that the equipment, materials, and activities in the early childhood environment invite children to interact with them independently, without always needing caregiver assistance. Additionally, the environment should be accessible, with materials and spaces that children can manage on their own, while offering opportunities for new or expanded learning.

<tr>
<td>Do you want to build with blocks?</td>
<td></td>
</tr>
<tr>
<td>Did you like the book?</td>
<td></td>
</tr>
<tr>
<td>Are you done?</td>
<td></td>
</tr>
</tbody>
</table>

Some open ended starters: “Tell me about...” “What do you think about...” “What did you notice about...”

### Reasons for Offering Choices

Children need choices because:

- Choices create situations where children are encouraged (maybe even required) to think, not just react.
- Choices provide opportunities for children to make mistakes and learn from the consequences.
- Choices help eliminate power struggles.
- Choices provide children with opportunities to experience adults who trust and value their thinking ability.
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas, the MN Core Competencies Content Area, and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota’s KCF: Content Area II: Developmentally Appropriate Learning Experiences

CDA Content Area II: Supporting physical and intellectual development

Learning Objectives:
• Name three opportunities is an early childhood program to promote creativity and self-expression.
• Discuss the value of, and difference between, process art and product art.

Planning art experiences

<table>
<thead>
<tr>
<th>Do I want to focus on process (creativity, imagination, problem solving, experimenting, fine motor)?</th>
<th>Do I want to focus on product (following directions, fine motor, creating a model)?</th>
</tr>

• Teach Preschool Blog: Making the transition from product to process focused art: http://prekandksharing.blogspot.com/2012/02/making-transition-from-product-to.html
Three Types of Block Play

Constructive Play

Constructive is focused on building something. Manipulating objects (i.e. blocks) to create something different is the epitome of constructive play. This type of play is encouraged by providing an adequate amount of space and enriched materials.

Dramatic play

Dramatic play is often motivated by a child’s desire to recreate a favorite story, memory or make sense of a situation. By adding props, such as animals, barns, cars, police stations, etc. children engage their imagination.

Exploratory play

This identifies the child's interest in the building process- rather than the desire to recreate something. Utilizing building materials, children experiment with spatial concepts, balance, weight, etc. In exploratory play, the goal is to determine how materials work together, rather than create a specific end result.
Tips for Promoting Cognitive Development and Creativity

Comment on specific things about the product

- Describe colors, shapes, parts of costumes, or dance moves in an objective way whenever possible. For example, “You have five blue circles on your page.” or “You are wearing pink shoes with the chef hat.”

Ask questions to prompt thinking during the creation and/or play process

- Use open-ended questions to encourage cognitive development and enrich the learning opportunities. For example, “What happened when you painted over the crayon drawings?” or “What dance move works best with this song?”

Encourage effort

- Offer encouragement for children’s effort and work. For example, “You worked hard on that painting; shall we put it on the board?”

Assist children to engage in activity

- Encourage reluctant children to begin an activity, helping them if necessary. For example, “Would you like to try the markers on the large paper?”

Encourage children to work until finished

- Assist children in thinking through options, overcoming challenges, and completing activities. For example, “What are you thinking about adding next?”

Encourage self-confidence

- Support children as they take risks, try new things, and make mistakes. For example, “Let’s add those moves to our class dance. We can change them if we don’t like them.”
CDA Portfolio Assignment

Competency Standard II: To advance physical and intellectual competence

Resource Collection

RCII: In your own words, describe a creative arts learning activity. Indicate the age group and list the intended goals, materials and process/teaching strategies. For each activity, specify how it is developmentally appropriate for that age group.

- Family Child Care-infants, toddlers, preschool
- Preschool-3s, 4s, 5s
- Infant/Toddler-young infants, mobile infants, toddlers

Bring your creative arts activity to the next class! Also, please bring you copy of the ECIPs.
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota’s KCF Content Area II: Developmentally Appropriate Learning Experiences

CDA Content Area II: Supporting physical and intellectual development

Learning Objectives:
1. Identify multiple, daily opportunities to support cognitive development.
2. Describe impact of intentional interactions on cognitive development.
3. Plan activities that stimulate cognitive development.

One Activity, Two Approaches

<table>
<thead>
<tr>
<th>Adult directed activity</th>
<th>Child directed activity</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Webbing
Any activity can be turned into an activity that also helps develop approaches to learning. According to Egertson, in an article titled *In Praise of Butterflies: Linking Self-Esteem to Learning* (Young Children, Nov 2006) there are a few questions you can ask yourself to make sure you are not missing an opportunity to help children cognitive development.

How will this activity:

1. Encourage children to be open to new tasks and challenges?
2. Strengthen children’s initiative and persistence?
3. Encourage children to reflect on and interpret what they are doing?

Does this activity:

4. Support children’s creativity and stimulate their imagination?
5. Expand children’s cognitive approaches to tasks?

Being able to answer yes to some or all of these means the activity, whether child- or teacher-directed or somewhere in between, will increase children’s cognitive development.

**What Can You Do?**

- Work together toward shared solutions
- Use ‘play’ objects to represent real-life items
- Use language to communicate thoughts and ideas
- Practice problem-solving
- Take initiative to try an idea
- Demonstrate the ability to delay gratification (i.e. compromise, wait a turn)
- Recognize simple shapes
- Identify how shapes can fit together
- Demonstrate knowledge of the properties of an object
Express thoughts and emotions using language Express multiple emotions
Awareness of number concepts
Experiment with various materials and textures Demonstrate control of small-muscle movements
Express ideas creatively
Understand and use position language such as; under, over, above, to the side
Follow two or three step directions
Video notes: “Scaffolding Children’s Thinking”

CDA Portfolio Assignment

Competency Standard II: To advance physical and intellectual competence

Competency Statement II: To advance physical and intellectual competence

CS IIc Pick a third learning experience you chose for your resource collection (RCII). How does this experience reflect your philosophy of how to support young children’s creative development?
Usando los ECIPs- indicadores de progreso infantil: estándares de aprendizaje temprano de Minnesota

Clase 12
Sesiones A-D
8 horas
Sesión 1

- Listar tres propósitos (o utilización) para los ECIPS- indicadores de progreso infantil: estándares de aprendizaje temprano de Minnesota
- Describir la organización y la estructura de los ECIPS incluyendo el uso del vocabulario: dominios, componentes, subcomponentes y los indicadores

Sesión 2

- Describir dos formas los ECIPS ayuda profesionales para entender el desarrollo y crecimiento del niño
- Demostrar métodos para utilizar los ECIPS para informar la planificación de currículo e instrucción

Sesión 3

- Demostrar la capacidad de vincular los indicadores de ECIPS a la observación del niño
- Utilizar los ECIPS para planificar y llevar a cabo observaciones como parte de la evaluación auténtica

Sesión 4

- Identificar recursos para usar el ECIPS dentro del programa como implicando a las familias en el aprendizaje de los niños
- Desarrollar una meta de desarrollo profesional basada en la comprensión de los ECIPS
- Desarrollar un objetivo de mejora del programa relacionado con los ECIPS

Tareas para la sesión 2

1. Traer 1 – 2 de sus recientes planes de lección o la lista de todas las actividades que hace con los niños cada día.
2. Comenzar a revisar el documento de los ECIPS.
3. Anotar preguntas sobre vocabulario, indicadores y así sucesivamente.
4. LLEVAR las preguntas para la próxima sesión.

Tareas para la sesión 3

1. Observar a un niño en su programa varias veces.
2. Escribir lo que observa sobre el comportamiento del niño. Escribir notas detalladas. TRAER sus notas de observación escritas a la siguiente sesión.

2. Continuar a leer el documento ECIPs, traer preguntas.

Tarea para la sesión 4

1. Continúe revisando el documento ECIPs, traiga todas las preguntas que tenga.

Acceso al ECIPs:

### El proceso de enseñanza intencional:

1. **Planear**
2. **Enseñar**
3. **Evaluar**
4. **Observar**
5. **Documentar**

**Mi objetivo de desarrollo profesional:**

**Mi objetivo de mejora de calidad de programa:**
Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y/o indicadores se abordan en la capacitación.

KCF Content Area I: Child Development and Learning

CDA Content Area VIII: Principles of Child Development and Learning (Infant Toddler Edition)

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: Describir los rasgos temperamentales clave
- Objetivo 2: Practicar el reconocimiento de cómo los rasgos del temperamento pueden aparecer en bebés y niños pequeños
- Objetivo 3: Estrategizar las respuestas de cuidado a diferentes temperamentos

• Review CDA Portfolio Assignment |
Temperamento: la forma en que un niño en particular se acerca y reacciona ante el mundo (su "personalidad"). Influye en el comportamiento del niño y cómo interactúan con los demás.

Goodness of Fit: describe cuándo el entorno (incluidas las interacciones) y las exigencias y expectativas del cuidador encajan bien con el temperamento del niño. A veces eso significa hacer cambios en lo que hacemos o cómo lo hacemos o en el entorno físico para que ES un "buen" ajuste.

Reactividad: la forma en que los bebés responden a nuevas experiencias y nuevas personas. Por ejemplo, ¿tienen fuertes reacciones que pueden conducir a respuestas cautelosas? ¿O reacciones bajas, que pueden facilitar las nuevas personas y situaciones? Esto está relacionado con la facilidad con que algo desencadena una respuesta en un niño, la intensidad de la respuesta y el tiempo que le toma al niño calmarse una vez que comienza la respuesta.

Autorregulación: la creciente capacidad de los niños para controlar sus sentimientos y sus cuerpos. Los adultos ayudan a los bebés y niños pequeños a comenzar a desarrollar la autorregulación.

Función ejecutiva: estas son habilidades que incluyen manejar sentimientos fuertes, ser capaz de enfocarse o prestar atención a algo, mantenerse enfocado y autocontrol

Effortful Control: la creciente capacidad de enfocarse en algo y cambiar la atención de una cosa a otra. También significa ser capaz de evitar hacer algo o comenzar a hacer algo a propósito. Los niños pequeños aprenden a hacer esto a través de las interacciones con los demás (especialmente con los adultos cercanos).

Por ejemplo, los bebés están trabajando para controlar los movimientos de sus manos y hacer que hagan lo que quieren que hagan (levantar y sostener una botella, por ejemplo). Los niños pequeños están aprendiendo a dejar de comportarse que podrían lastimar a los demás (morder o empujar, por ejemplo) cuando se sienten frustrados.

Sesión 4 Hoja:

Ayudar a los bebés y niños pequeños a autorregularse

Observa de cerca. Los bebés envían señales que le dicen cuándo tienen hambre, están cansadas o listas para jugar.

Responder. Esté atento a las diferencias individuales en la necesidad de regularidad, novedad e interacción.

Proporcionar estructura y predictibilidad. Los bebés necesitan cuidadores consistentes y enfoques de rutinas tales como alimentarse, dormir y cambiar pañales o ir al baño.

Organice entornos apropiados para el desarrollo. Las estanterías bajas, las etiquetas transparentes y los materiales apropiados para la edad pueden ser un desafío y se pueden adaptar a las capacidades cambiantes del niño.

Definir límites apropiados para la edad. Ayude a un niño a sentirse seguro y ayúdelo a saber lo que se espera.

Muestre empatía y cariño. Cuando los cuidadores reconocen las necesidades de los niños y los tratan como importantes, los niños se sienten bien consigo mismos y son más capaces de manejar emociones fuertes.

Conclusión

"La autorregulación en el desarrollo temprano está influenciada por las relaciones de un niño con los adultos importantes en su vida. Proporcionar las experiencias, el apoyo y el estímulo que ayudan a los niños muy pequeños a aprender a autorregularse es un elemento crítico en la atención de calidad"

Write down one benefit of asking a parent for their perspectives on their child.

Write one idea down from the list of “responding to Temperaments” that you want to remember to do or try with a child in your care.

**Homework:**
Use the temperament scale to rate a child that you haven’t used for an assignment yet. Look at your own temperament chart. Think about: Are there areas that may challenge the “goodness of fit?” Write down 2 strategies or things you want to try that you think will improve the “goodness of fit” (do this in class?) Between now and the next class, try your ideas. We will talk about what you experienced when we come back for our next session.

**CDA Portfolio Assignment:**
Begin your Reflective Statement about this Competency Standard with a paragraph describing how your teaching practices meet this Standard. (Note: You may also choose to write one paragraph for each Functional Area, if this makes it easier to express your thoughts more clearly). Then, write at least one paragraph.

**CSIIla:** Describe some of the ways you support the development of children’s positive self-concepts and growing social/emotional skills.

**GLOSARIO**

**Adaptación (resilience):** funciona bien a pesar de las dificultades o el trauma.

**Factores de riesgo:** condiciones o variables que aumentan las posibilidades de resultados negativos o indeseables.

**Factores de protección:** condiciones o variables que amortiguan el impacto de los factores de riesgo y promueven el desarrollo y el bienestar saludables.

**Factores de protección de Strengthening Families ™:** Este enfoque identificó cinco factores de protección que son elementos clave en las familias fuertes. Ellos son: adaptación de los padres, conexiones sociales, apoyo concreto en tiempos de necesidad, conocimiento de la crianza de los hijos y el desarrollo del niño, y la competencia social y emocional de los niños.

**Estrés:** respuestas biológicas y emocionales a experiencias desafiantes, amenazantes o traumáticas.

**Stressor:** una experiencia que se percibe como desafiante, amenazante o traumática.

**Estrés tóxico:** respuestas biológicas y emocionales que resultan de una adversidad fuerte, frecuente y prolongada, como el abuso y la negligencia infantil, la violencia familiar. El impacto del estrés tóxico se puede reducir cuando un bebé o niño pequeño tiene al menos una relación estable y segura.

**Recursos para la sesión 14:**

- Recursos del Center for the Developing Child: https://developingchild.harvard.edu/resourcecategory/spanish-resources/
- Enlace a la Alianza Nacional de Enfermedades Mentales (NAMI) de Minnesota, que es una organización sin fines de lucro dedicada a mejorar las vidas de niños y adultos con enfermedades mentales y sus familias. NAMI Minnesota ofrece educación, apoyo y defensa: http://www.namihelps.org/
Tres fuentes de adaptación para los niños

Para superar las adversidades, los niños recurren a tres fuentes de características de adaptación que pueden reconocer: YO TENGO, YO SOY, YO PUEDO. Lo que usan de cada una de las tres fuentes se puede describir de la siguiente manera:

### YO TENGO

- Las personas a mi alrededor en las que confío y que me aman
- Personas que establecen límites para mí, así sé cuándo parar antes de que haya peligro o problema
- Las personas que me muestran cómo hacer las cosas bien por la forma en que hacen las cosas
- Gente que quiere que aprenda a hacer cosas por mi cuenta
- Personas que me ayudan cuando estoy enfermo, en peligro o necesito aprender

### YO SOY

- Una persona a la que la gente puede gustar y amar
- Me alegra hacer cosas agradables para los demás y mostrar mi amor
- Respetuoso de mí mismo y de los demás
- Dispuesto a ser responsable de lo que hago
- Seguro que las cosas estarán bien

### YO PUEDO

- Hablar con otros sobre cosas que me asustan o me molestan
- Encontrar formas de resolver problemas que enfrento
- Controlarme cuando tengo ganas de hacer algo incorrecto o peligroso
- Averiguar cuándo es un buen momento para hablar con alguien o tomar medidas
- Encontrar a alguien que me ayude cuando lo necesite

Nota: Un niño que enfrenta desafíos o adversidades no necesita todas estas características para aprender a demostrar adaptación, pero se necesita más que una.

**Homework:** This week, your practice assignment is to select one of the three circles we worked on today—child, family or caregiver—and continue to build on the ideas you had written down. Choose 2 ideas of actions that you can take to build resilience in either a child, family or yourself. Write them down, as well as how you intend to do them and build them in as part of your regular skills to promote resilience. Take notes each time you do them, including how you felt when you were doing them. Be prepared to discuss your experience at Class 16 (Routines and Opportunities).

4 horas

Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

MN KCF Content Area VI: Professionalism
CDA Content Area VI: To maintain a commitment to professionalism.

Learning Objectives
This session was developed to address the following learning objectives. You can reasonably expect that, by the end of this session, actively engaged participants will be able to:

• List three reasons why professional development is important for early care and education professionals
• Describe three resources available to early care and education professionals to assist them in meeting their professional development needs
• Use the Individual Training Needs Assessment to identify at least one area of opportunity for professional development

Objetivos de aprendizaje
• Enumere tres razones importantes para el desarrollo profesional de docentes de educación temprana
• Describa tres recursos disponibles para los docentes de educación temprana para ayudarles a desarrollarse profesionalmente
• Evaluar necesidades de capacitación Individual para identificar al menos un área de oportunidad para el desarrollo profesional

Session A

Professional Development Basics

Professional development is “structured teaching and learning experiences that are formalized and designed to support the acquisition of professional knowledge, skills, and dispositions as well as the application of this knowledge in practice”

National Professional Development Center on Inclusion, 2007 in Practical Approaches to Early Childhood Professional Development: Evidence, Strategies, and Resources

Key Concepts

- Professional development is:
  - Planned;
  - More than maturation;
  - Includes training but is not limited to training; and
  - Relates to the skills and knowledge of the profession

- All types of professionals participate in professional development

- All early childhood professionals can benefit from professional development
  “All early childhood professionals – no matter how qualified – need to continue to incorporate into their professional repertoire new knowledge and skills related to working with young children”

- Professional development can take many forms

- Professional development focuses on both current and future needs

- Professional development improves the quality of care children experience
Benefits of Professional Development

Intentional Professional Development

Intentional professional development features:

1. Conduct needs assessment to determine professional development needs
2. Establish goals for your professional development activities
3. Determine what professional development activities will help you to reach your goals.
4. Develop a written plan that documents your goals and the activities to reach the goals

Sources of Data for Assessing Professional Development Needs

**TRAINING REQUIREMENTS**
For example:
- CDA requirements
- First aid & CPR
- Abusive Head Trauma
- Sudden Unexpected Infant Death Syndrome
- Child restraint systems
- Behavior management

**PROGRAM NEEDS: CHANGES, IMPROVEMENTS, ADDITIONS**
For example:
- Adoption of new curriculum or assessment tools
- Beginning process to become accredited or participate in QRIS
- Survey information

**INDIVIDUAL TRAINING NEEDS**
For example:
- Areas in which you feel challenged
- Areas in which you would like to increase confidence
- Areas of interest to you
- Skills or knowledge needed to advance within your organization and the profession

Session A – CDA Portfolio Assignment

   CSVI RC: Resource Collection Items

   RCVI-2: Collect a list of two or three early childhood associations (national, regional, state or local), including website addresses, describing the professional resources and membership opportunities they each offer.

FIELD WORK:

2. Complete the ITNA. Take notes on content areas or topics where you feel you have room for growth and bring those notes to the next session. The Individual Training Needs Assessment (ITNA) can be accessed through Develop at https://www.developtoolmn.org/app/default.aspx#myModule=btnITNA. Note: you have to a Develop account and sign into your individual Develop account to see it online. The ITNA tab is located in the Professional Profile section. (You should have signed up for a Develop account during the first MNITCDA class.)

3. Bring your CDA portfolio folder with the items you have completed since class 1 of the Minnesota ITCDA program to the next session.
Session B

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

MN KCF Content Area VI: Professionalism

CDA Content Area VI: To maintain a commitment to professionalism.

Learning Objectives
This session was developed to address the following learning objectives. You can reasonably expect that, by the end of this session, actively engaged participants will be able to:

- Name two ways to document professional development accomplishments
- Create a professional development plan
- Describe the use of a portfolio in documenting professional development

Objetivos de aprendizaje
- Nombrar dos formas para documentar logros de desarrollo profesional
- Crear un plan de desarrollo profesional
- Describir el uso de un portafolio para documentar el desarrollo profesional

CDA INDIVIDUAL PROFESSIONAL DEVELOPMENT PLAN

Name: ____________________________________________________________

Date of Plan Creation: ____________________ Develop ID#: ______________________

The knowledge, skills, and practices of early childhood educators are important factors in determining how much a young child learns and how prepared they are for entry into kindergarten. Early childhood educators are lifelong learners who continually enrich their knowledge and increase their skills in order to implement best practices and increase the quality of their program.

Directions:

• A strong professional development plan starts with a self-assessment. This is an opportunity to think about the areas of your job in which you already have knowledge and skills, and the areas about which you would like to learn more. The Individual Training Needs Assessment (ITNA) is a self-assessment tool based on Minnesota’s Knowledge and Competency Framework for Early Childhood Professionals. You can use the ITNA to assess your own skills and set professional development goals.
  o To take the ITNA, please login to your Develop account (www.developtoolmn.org) and click on the ITNA tab to begin.

• Use the information from your self-assessment to determine which areas of your job are the most important to you right now. Set goals for learning and strengthening your skills in those areas.

• Establish a timeframe for pursuing your goals. This gives you the opportunity to think about the resources needed to achieve them. It also allows you a framework to create regular check-in points along the way with a supervisor or mentor, as well as an opportunity to reflect on your own progress.

Competency and Content Areas:

Depending on where you are in your professional journey, you may choose to align your goals with Minnesota’s Knowledge and Competency Framework or the CDA Competency Areas.

• The Knowledge and Competency Framework is a guide for practitioners to improve and demonstrate their work with children and families.

• The Child Development Associate (CDA) Competency Areas: CDA Candidates must have 120 clock hours of formal child care education and in-service training. CDA training is broken into eight content areas. Candidates must have at least 10 hours in each area. The content areas are:
  1. Planning a safe and healthy learning environment
  2. Advancing children’s physical and intellectual development
  3. Supporting children’s social and emotional development
  4. Building productive relationships with families
  5. Managing an effective program operation
  6. Maintaining a commitment to professionalism
  7. Observing and recording children’s behavior
  8. Principles of child development and learning

SMART Goals

• As you develop your action plan, use the SMART model by ensuring all of your goals and action steps are Specific, Measurable, Attainable, Realistic, and within a specific Timeframe.
• Concrete goals will enable you to determine when you have achieved your objectives. Lay out small, reasonable steps. Expecting too much too soon will discourage progress. Divide development activities into small steps that lead to your end goal.

NAEYC Key elements of Standard 6: Professional Preparation

• 6a: Identifying and involving oneself with the early childhood field
• 6b: Knowing about and upholding ethical standards and other professional guidelines
• 6c: Engaging in continuous, collaborative learning to inform practice
• 6d: Integrating knowledgeable, reflective, and critical perspectives on early education
• 6e: Engaging in informed advocacy for children and the profession

### Knowledge & Competency Framework Area(s)

*Example goal matches KCF Area VI.*

- I. Child Development and Learning
- II. Developmentally Appropriate Learning Experiences
  - Specify which subcategory of KCF II:
    - ________________
    - ________________
  - III. Relationships with Families
  - IV. Assessment, Evaluation and Individualization
  - V. Historical and Contemporary Development of Early Childhood Education
  - VI. Professionalism
  - VII. Health, Safety and Nutrition
  - VIII. Application through Clinical Experiences

### CDA Content Area(s)

*Example goal matches CDA Area VI.*

- I. Planning a Safe and Healthy Learning Environment
- II. Advancing Children's Physical and Intellectual Development
- III. Supporting Children's Social and Emotional Development
- IV. Building Productive Relationships with Families
- V. Managing an Effective Program Operation
- VI. Maintaining a Commitment to Professionalism
- VII. Observing and Recording Children's Behavior
- VIII. Principles of Child Development and Learning

Functions of your CDA Portfolio

A portfolio is...

- A collection of evidence of abilities;
- A display of some of your best work;
- A way of showing what you have learned;
- Organized into sections that relate to different aspects of your work;
- Unique to each individual;
- Focused on showing quality, not quantity; and
- Ever changing as you continue to grow and develop as a professional.

Organizing the CDA Portfolio

Using Your CDA Portfolio

In addition to obtaining your CDA, your portfolio may be a helpful tool in the following situations:

- Interviewing for a new job or a promotion
- Demonstrating for prospective families your professionalism and skills and abilities as a caregiver
- Documenting how you use grant funds or changes you have made based on participation in a grant or scholarship program
- Assessing your own abilities to plan for professional development
- Demonstrating your professional growth for your supervisor, a mentor or others
- To demonstrate the quality of your work as part of an accreditation process
The CDA Portfolio

The CDA Portfolio is...

“The CDA Portfolio is... a collection of materials that you will use as an early childhood professional in future work with young children and families. It is compiled for two purposes:

1. It provides a picture of what information Candidates find valuable in their work as a basis for assessing competence as a CDA; and

2. It provides Candidates an important experience in locating resources, using them in their work, and evaluating their effectiveness in early childhood programs.”

Contents

Section 1: Autobiography

Write a statement about yourself of about 300 words. In the first part tell who you are, and in the second part, tell what things about your life influenced your decision to work with young children. If you wish, include a formal resume of your education and work experiences.

Section 2 Statements of Competence

In your own words, describe what you do with children and families that demonstrates your ability to meet the specific needs and support the learning and development of children in each of the six Competency Goal areas. The statement for each area should be 200 – 500 words in length and should state your goals for children and give clear and specific examples of what you do to achieve those goals. Begin each of the statements using one of the specific phrases that follow:

1. To establish and maintain a safe, healthy learning environment...

2. To advance physical and intellectual competence...

3. To support social and emotional development and to provide positive guidance...

4. To establish positive and productive relationships with families...

5. To ensure a well-run, purposeful program responsive to participant needs...

6. To maintain a commitment to professionalism...

This section of the file contains 17 specific items organized by Competency Area. Each item should be numbered so that it can easily be located. Some of the items will vary slightly depending upon which type of CDA you are applying for – Infant/Toddler, Preschool, or Family Child Care.

The chart on the following pages describes the 17 items for this section.

<table>

**Reflective Statements of Competence**

**CS I:** Begin your Reflective Statement about this Competency Standard with a paragraph describing how your teaching practices meet this standard (to establish and maintain a safe, healthy learning environment).

**CS I a:** Reflect on the sample menu in RC I-2: If you designed the menu, how does it reflect your commitment to children's nutritional needs? If you did not design it, what are its strengths and/or what would you change?

**CS I b:** Reflect on the room environment in which your CDA Verification Visit Observation will occur: How does the room design reflect the way you believe young children learn best? If the room was not designed by you, what do you see as its strengths and/or what would you change? Additionally, reflect on and describe the similarities and differences between room environments designed for infants as compared to toddlers.

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y/o indicadores se abordan en la capacitación.

Minnesota KCF Content Area: II: Developmentally Appropriate Learning Experiences

CDA Content Area II: Advancing children’s physical and intellectual development

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y/o indicadores se abordan en la capacitación.

- Objetivo 1: Describir las oportunidades de aprendizaje y desarrollo en las rutinas
- Objetivo 2: Identificar formas de usar rutinas como oportunidades para la continuidad con el hogar
Reflexión: Escribe 3-4 frases sobre cómo “serve and return” ayuda a los niños a aprender a comunicarse. *(Applies to CDA Competency Statement IId.)*
GLOSARIO

Rutinas: actividades diarias repetidas. En este caso, nos enfocamos en las rutinas de cuidado de la alimentación, cambio de pañales / uso del baño, siestas; y llegadas y salidas.

Continuidad cultural: Trabajar con las familias para conocer sus valores, creencias y objetivos, a fin de respaldar las prácticas de atención consistentes entre el hogar y el cuidado infantil. Debido a que los niños desarrollan un sentido de quiénes son en el contexto de la cultura, los apoyos de continuidad cultural facilitan un sentido de armonía y familiaridad entre el hogar y el entorno de cuidado.

Función ejecutiva y autorregulación: la creciente capacidad de los niños para controlar sus sentimientos y sus cuerpos. Esto incluye controlar lo que hace tu cuerpo, controlar los sentimientos fuertes y ser capaz de enfocarte o prestar atención a algo. Los adultos ayudan a los bebés y niños pequeños a comenzar a desarrollar la autorregulación.

Necesidades protectoras: el impulso natural para proteger a los niños pequeños. Los impulsos de protección son tan fuertes que pueden provocar fuertes sentimientos y reacciones en los adultos. Por ejemplo: la respuesta que sentimos cuando escuchamos a un bebé llorando.
Prácticas de alimentación receptivas (adapted from Branscomb & Goble, 2008)

Infantes:
• Dar comida cuando necesitan (no en un horario predeterminado)
• Infórmese sobre las prácticas de alimentación domiciliaria de las familias y trate de utilizarlas en su programa
• Aprende como los niños muestran que tienen hambre o que están llenos.
  o No use comida solo para calmar a un bebé irritable
  o Hazle saber al bebé que los oyes y que estarán allí pronto
  o Sea confiable
• Las comidas deben ser tranquilos y no apresuradas
  o Crea un lugar tranquilo donde tengas tiempo para la interacción y la cercanía
  o Con la alimentación con biberón: cuna y hablar o cantar al bebé, prestando atención a ellos
• Las políticas y prácticas del programa deberían apoyar a las madres que desean amamantar

Infantes empezando mover:
• Respetar y apoyar las crecientes habilidades de los niños, comparta la responsabilidad (por ejemplo, turnarse para sostener la botella)
• A medida que los niños comienzan a comer alimentos sólidos, espere desorden mientras exploran alimentos y desarrollan habilidades motoras finas
• Disfruta de la comida con niños, mostrándoles la alegría de comer juntos como una experiencia social
• Anime a comer pero nunca obligue a comer
• Comience a involucrar a los bebés mayores en servir, preparación simple de alimentos y limpieza.

Niños pequeños:
• Ofrezca comida para satisfacer el hambre (no la use como recompensa, castigo o soborno)
• Dado que los rechazos de alimentos son comunes, no los convierta en luchas de poder prestándoles demasiada atención
• Establecer expectativas apropiadas para el desarrollo del comportamiento en el horario de comida
• Reconocer habilidades crecientes al darles a los niños pequeños opciones (entre alimentos saludables) y responsabilidad (preparación y limpieza) en las comidas
• Haga que las comidas sean experiencias sociales agradable
Recursos:

Para obtener más información sobre nutrición y comidas con bebés y niños pequeños, hay módulos gratuitos en línea disponibles en Healthy Start http://www.adph.org/healthystart/index.asp?id=6504

Para obtener más capacitación sobre nutrición infantil y apoyar a los niños en el cuidado infantil que están amamantando, diríjase a Develop at: www.developtoolmn.org

One thing I want to remember during routines is...

Homework:

Talk with at least 2 families from your program about a routine at home that also occurs in your program (for example meals, diaper/toileting, napping) to find out how they do it at home. Then think about you do it in your program and adapt your routine based on what you hear from the families.
Further reading:

Contrasting Perspectives on Caregiving Practices
by Janet Gonzalez-Mena

You know the old saying, "There are two kinds of people in the world?" This piece isn’t about two kinds of people. It is about two different perspectives on what children need most. Into the first perspective fits most of the professional orientation of early childhood educators and early childhood special educators. That perspective is an individualistic one. It goes something like this: babies are born into the world completely dependent and unaware that they are separate human beings. The early lessons must be to get them to accept the fact that they are separate individuals and can become more and more independent as they grow. The ultimate goal is when an individual can stand on his or her own two feet and be his or her own person. That doesn’t mean that the individual is alone in the world. Of course, relationships are important too. But relationships are expected to happen naturally as the child becomes socialized. It’s the independence and individuality aspects of development that must be stressed because they don’t seem natural to those with an individualistic perspective.

Into the other perspective fits 70% of the world population (Triandis). That perspective is a collectivistic or communitarian one. It goes something like this: babies are born into the world with strong tendencies to be independent individuals and they must be coaxed into understanding that they aren’t alone, but in fact, are part of a group of other people. The early lessons must be to get them to accept the fact that they are permanently tied to those around them and that group needs take priority over individual ones. With the proper care, the older they grow, the more attached they become. The goal is life-long ties. Of course, individual attributes, talents and skills are important, but because they serve the group; they aren’t for the glory of the person. Individuality and independence are seen to come naturally; that’s why group membership must be stressed.

Parents raise their children according to which perspective is strongest and it influences their child rearing practices down to specific ideas like how much to hold babies; when and where to put them down to sleep; when and how to toilet train; how long to spoon feed. Some families’ orientation is based on a clear perspective and has strong set of priorities to go with it. Others are less clear about their priorities. All families combine elements of individualism and collectivism, but the emphases are different.

The point is not to analyze people in order to classify them, but rather to talk to them so you can understand the meaning behind what you may consider questionable behavior, like toilet training before a year old or spoon feeding three year olds.

No matter how uncomfortable one feels about the perspective that isn’t theirs, one way isn’t right and the other wrong. Both work for rearing healthy children. They may have different outcomes as far as the strength of the commitment to family and balance of group needs to individual needs; but which ever perspective you take, it’s hard to ignore the wisdom of this quote:

"Individual commitment to a group effort – that is what makes a team work, a company work, a society work, a civilization work." – Vince Lombardi

Entornos que promueven la exploración

Clase 17
3 horas

Descripción general de la clase 17

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

**Minnesota KCF Content Area**: II: Developmentally Appropriate Learning Experiences

**CDA Content Area II**: Advancing physical and intellectual development

**Objetivos de aprendizaje:**
Sí bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: Explore estrategias para promover el desarrollo motor, el movimiento y la exploración
- Objetivo 2: Identificar elementos de entornos de calidad para bebés y niños pequeños

**Reflection Assignment: Routines**-- *Write 3-4 sentences about how discussing routines with families helps you improve a program/program routine with children. (Applies to CDA Competency Statement IVb.)*

## GLOSARIO

Entorno de aprendizaje: todas las cosas en el aula o en el hogar de cuidado infantil familiar que los niños necesitan para crecer y aprender, así como también cómo se configura el espacio. Esto
incluye acciones de los adultos en el espacio, así como juguetes, materiales, equipos, muebles, seguridad, limpieza y comodidad (iluminación, temperatura, colores, sonidos, etc.).

Habilidades perceptivas: usar tus sentidos para aprender y comprender el mundo que te rodea. Las habilidades perceptivas requieren la coordinación de las capacidades cognitivas, sensoriales y motoras para interactuar con el entorno de una persona

Desarrollo físico y motor: cómo los niños usan sus cuerpos para hacer movimientos grandes con sus piernas y brazos (motor grueso) y para hacer pequeños movimientos con sus dedos y manos (motor fino).

Propiocepción: la capacidad de nuestro cuerpo de detectar dónde se encuentra en el espacio, incluida la sensación de movimiento de nuestros músculos y articulaciones.

Conversación propia y paralela (self and parallel talk): en la conversación propia, el adulto describe lo que está haciendo mientras lo hace. En una conversación paralela, el adulto describe lo que el niño está haciendo mientras lo hace. Esto construye una relación, el vocabulario de los niños en el contexto (especialmente las palabras de acción) y las habilidades del lenguaje.

Sistema vestibular: un sistema sensorial ubicado en el oído interno que afecta nuestro equilibrio y sistema de equilibrio y nuestro sentido de orientaciónespacial (donde nuestros cuerpos están relacionados con otros objetos en el ambiente) al proporcionar información relacionada con el movimiento y la posición de la cabeza.

¿Por qué se mueven los bebés y niños pequeños?

<table>
<thead>
<tr>
<th>Posición y estabilidad del cuerpo</th>
<th>Moverse de un lugar a otro</th>
<th>Manipulando objetos</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
¿Cómo promueve un ambiente la sensación de bienestar para los bebés o niños pequeños?

¿Qué en el ambiente podría invitarlos a usar sus sentidos?

¿Qué podría desafiar sus habilidades motoras?
Seven dimensions of an Infant and Toddler Environment
(Sources: Weiser, 1991 and Prescott, 2008)

Infants and toddlers are sensitive to all of the qualitative aspects of a center: “its movements, sounds, volumes, textures, visual and kinesthetic vibrations, forms, colors, and rhythms”. (Weiser, 1991)

Open/Closed: can be used to rate materials, storage spaces, programs, physical environment, attitudes of caregivers

• open to exploration and experimentation
• open to the wonder of emerging skills
• open and warm in relationships
• open materials are those with a variety of uses and responses
• open storage means an orderly visible arrangement of toys and materials
• open physical environment is when the space is uncluttered, has a sense of organization, and has a clear traffic flow
• program open to the world outside its walls

Simple/Complex: the extent to which there is potential for active manipulation and alteration by children

• simple object has one obvious use or purpose and reacts in one predictable way
• complex unit has subparts or combines two essentially different play materials that allow the children to manipulate or improvise
• increasing complexity is directly correlated to length of attention span, and that is a worthwhile goal

High/Low Mobility: used to describe the activities, equipment and space that require large muscle movements, the small muscle movements, and basically any movement

• high/low mobility includes the ability of the child to move through space

Large Group/Individual: An appropriately planned physical environment will suggest the social structure of the group. For infants and toddlers, we do not plan total group activities (with the exception of eating and sleeping). Rather, we should allow as much room as possible for individual exploration and
experimentation. We should provide interest centers as a way of organizing space.

**Soft/Hard:** The degree of softness can be used as a predictor of the quality of a childcare program. The younger the child, the more important softness is as a characteristic of the environment, both physical and human.

**Intrusion/Seclusion:** This dimension has to do with boundaries between people and things in the physical setting. It is closely related to the large group/individual dimension.

- room size and shape have some influence
- privacy (or seclusion) is more easily provided in irregularly shaped large rooms
- toddlers need a “melt down” space

**Risk/Safety:** There needs to be a happy medium in this dimension. We must plan a safe environment, but we don’t want to remove all challenges in doing so.

- young children love to experiment with their bodies in space
- young children must try out different ways of doing things, which is essential in learning the best way
- adult-imposed rules are not fool-proof, and are quickly forgotten as soon as the adult’s attention turns elsewhere

**Movement documentation panels**

- ¿Qué están explorando los niños?

- ¿Qué elementos del entorno (equipos o materiales, disposición del espacio, ambiente como luz, sonido, etc.) invita a su exploración?

- ¿Qué podría desafiar sus habilidades motoras? ¿Qué habilidades motoras podrían usar?

- ¿Qué podrían estar aprendiendo?
• ¿Puedes pensar en otro material, pieza de equipo o distribución de espacio que pueda proporcionar una experiencia similar para estos niños? (Podría ser algo que use o tenga en su programa)

**Ideas for Infant Toddler Learning Centers**

- **Infant Reaching/Grasping/Kicking Center**
- **Infant Peek-a-Boo/Object Permanence Center**
- **Infant Play Pit/Center**
- **Climbing Center**
- **Mirror Area**
- **Infant Block Center**
- **Toddler Block Center**
- **Vehicle Center**
- **Hauling/Transporting/Push-Pull Center**

**The name of your center:**

- **What** is included in the center using what you have at hand or can get easily?

- **What** will children explore there? What might challenge their motor skills?

- **When/where** you might you use the center?
Language and Book Center

Active Start—
Physical Activity Guidelines for Children Birth to Five Years

National Association for Sport and Physical Education (NASPE)

The guidelines presented below support NASPE’s position that all children birth to age five should engage in daily physical activity that promotes health-related fitness and movement skills.

**Infants (birth to 12 months)**

1. Infants should interact with parents and/or caregivers in daily physical activities that are dedicated to promoting the exploration of their environment.
2. Infants should be placed in safe settings that facilitate physical activity and do not restrict movement for prolonged periods of time.
3. Infants’ physical activity should promote the development of movement skills.
4. Infants should have an environment that meets or exceeds recommended safety standards for performing large muscle activities.
5. Individuals responsible for the well-being of infants should be aware of the importance of physical activity and facilitate the child’s movement skills.

**Toddlers (12 to 36 months)**

1. Toddlers should accumulate at least 30 minutes daily of structured physical activity.
2. Toddlers should engage in at least 60 minutes and up to several hours per day of daily, unstructured physical activity and should not be sedentary for more than 60 minutes at a time except when sleeping.
3. Toddlers should develop movement skills that are building blocks for more complex movement tasks.
4. Toddlers should have indoor and outdoor areas that meet or exceed recommended safety standards for performing large muscle activities.
5. Individuals responsible for the well-being of toddlers should be aware of the importance of physical activity and facilitate the child’s movement skills.

**Preschoolers (3 to 5 years)**

1. Preschoolers should accumulate at least 60 minutes daily of structured physical activity.
2. Preschoolers should engage in at least 60 minutes and up to several hours per day of daily, unstructured physical activity and should not be sedentary for more than 60 minutes at a time except when sleeping.
3. Preschoolers should develop competence in movement skills that are building blocks for more complex movement tasks.
4. Preschoolers should have indoor and outdoor areas that meet or exceed recommended safety standards for performing large muscle activities.
5. Individuals responsible for the well-being of preschoolers should be aware of the importance of physical activity and facilitate the child’s movement skills.

Excerpted with permission from the National Association for Sport and Physical Education (NASPE), an association of the American Alliance for Health, Physical Education, Recreation and Dance, Active Start: A Statement of Physical Activity Guidelines for Children Birth to Five Years (Reston, VA: NASPE, 2002), 5–11. Visit www.aaahperd.org/NASPE.

An overview of perceptual and motor development is available at:
http://www.cde.ca.gov/sp/cd/re/itf09percmotdev.asp

Standards for physical activity: https://www.shapeamerica.org/standards/guidelines/activestart.aspx

More information on Tummy Time from Healthychildren.org (American Academy of Pediatrics) in English:
https://www.healthychildren.org/English/ages-stages/baby/sleep/Pages/Back-to-Sleep-Tummy-to-Play.aspx

In Spanish: https://www.healthychildren.org/spanish/ages-stages/baby/sleep/paginas/back-to-sleep-tummy-to-play.aspx

Homework: Look at the handout with the Ideas for Infant Toddler Learning Centers. Choose a center you don’t already have in your program, create that center and try it out with the infants and/or toddlers in your program. (You can partner with another person and both try the same center.) Your center must encourage movement appropriate for the age group of children using the center.

To bring for next time: a brief description of the center you created and some of the things infants and toddlers did when they used the center. (If you like you can bring photos—any photos of children need parental permission.)
Aprendizaje a través de la exploración
Clase 18
2.5 horas

Descripción general de la clase 18
Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y/o indicadores se abordan en la capacitación.

**Minnesota KCF Content Area II:** Developmentally Appropriate Learning Experiences

**CDA Content Area II:** Advancing physical and intellectual competence

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- **Objetivo 1:** Describir los conceptos y estrategias de aprendizaje que los bebés y niños pequeños construyen a través de la exploración
- **Objetivo 2:** Identificar formas en que los cuidadores apoyan los descubrimientos infantiles

Mira la jugada. ¿Qué ves que cada persona hace o dice?

¿Esto le dice algo sobre lo que están aprendiendo o tratando de descubrir? Describir:

CONCEPTOS DE APRENDIZAJE
Agregue sus propias notas y ejemplos

Número: la capacidad de desarrollo para comprender el número y la cantidad ("más" "desaparecido").

Relaciones espaciales: la comprensión en desarrollo de cómo las cosas se llenan, caben y se mueven en el espacio.

Causalidad (causa y efecto): desarrollar la comprensión de que un evento produce otro

Categorización / clasificación: capacidad de desarrollo para agrupar, ordenar, categorizar o conectar objetos y personas por similitudes y diferencias.

Representación / Juego simbólico: desarrollar la capacidad de usar objetos, acciones o ideas para representar otros objetos, acciones o ideas en juego.
APRENDIENDO ESTRATEGIAS
AGREGUE SUS PROPIAS NOTAS Y EJEMPLOS

Imitación: desarrollar la capacidad de copiar, repetir y practicar las acciones de los demás (ya sea inmediatamente o más tarde).

Atención de mantenimiento: capacidad de desarrollo para atender a personas y cosas mientras interactúas con otros y exploras el entorno y los materiales de juego.

Uso de herramientas: los bebés usan sus propios cuerpos, otras personas (generalmente adultos) y objetos para explorar y comprender el mundo.

---

**Homework:** Observe one child at play at least 3 times this week. Have your list of “Discoveries” and make a note when the child uses one of these as a tool or seems to be interested in something related to one of the discoveries. Share one of you observations with the child’s parent (along with your excitement about the child’s active learning).

**Recursos para la clase 18:**

For more video clips on “Learning opportunities for children up to age 4” from Switzerland in English, Spanish (and 11 other languages including Tigringa): [http://www.kinder-4.ch/en/filme_alter](http://www.kinder-4.ch/en/filme_alter)

CDA Portfolio Assignment:

Write 2-4 sentences about one discovery you saw children making and a toy or piece of equipment that helped them explore that discovery. (May apply to CDA Portfolio in either Resource Collection/RCII, either in terms of science/sensory or mathematics or Competency Statement IIb.)

Homework: Observe one child at play at least three times this week. If you like, you may put out the play set you planned in this session to prompt the child’s explorations. Have your list of Learning Concepts handy and make a note when the child seems to be interested in something related to one of the Learning Concepts. Share one of your observations with the child’s parent (along with your excitement about the child’s active learning).
Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota KCF Content Area I: Child Development and Learning

CDA Content Area 8: Principles of Child Growth and Development
Learning Objectives

- Explain the important role of play in children’s development
- Match play activities to domains of development
- List environmental factors for planning learning areas and experiences that support development

Objetivos de Aprendizaje

- Explicar el papel del juego en el desarrollo de los niños desarrollo
- Emparejar el juego con las etapas de desarrollo infantil
- Hacer una lista de centros de aprendizaje para la planificación de experiencias que apoyan al desarrollo

|            |                                              | 2.5 hours total                                                          |
Principles of Play

Play is important in young children’s development because:

- Play emphasizes learning as an active process
- Play is motivating for children
- Play allows time for practice and repetition
- Play allows children to try new things with minimal risk
- Play allows for individual differences
- Play emphasizes all domains of development
Play and Domains of Development

Name of toy or play item ________________________________

How do children use it?

What might children be learning when they play with it?

What domains of development does it address?

Planning for Play:

Space

Materials

Time

Responses to the Environment

Environment: the place in which learning happens. The environment includes indoor and outdoor spaces.

| An Environment You Like | An Environment You Don’t Like |
What do you like about this place? Why does it appeal to you? How does it feel?

What do you not like about this place? What about it does not appeal to you? How does it feel?
Principios para el uso de espacio para promover el desarrollo

- El entorno es seguro para la exploración de los niños
- El ambiente es limpio y organizado
- El ambiente se divide lógicamente en zonas o áreas de actividad de aprendizaje
- Las áreas se agrupan dentro del espacio basado en las actividades y el nivel de sonido
- Las áreas están dispuestas de modo que es fácil ver a los niños mientras juegan
- Hay bastantes áreas para que los niños jueguen cómodamente
- Hay una gran variedad de actividades para que los niños puedan explorar
- El ambiente tiene zonas duras y blandas y lugares para que los niños trabajen solos y en grupos.

Áreas o Centros de aprendizaje

La mayoría de programas para niños pequeños tiene las siguientes áreas de aprendizaje:

<table>
<thead>
<tr>
<th>Área</th>
<th>Descripción</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Arte</strong></td>
<td>Esta área incluye materiales de arte</td>
</tr>
<tr>
<td><strong>Bloques de</strong></td>
<td>Esta área incluye bloques y apoyos para el uso con bloques tales como coches y señales. Puede ser llamado construcción o edificio.</td>
</tr>
<tr>
<td><strong>Juego dramático o salón hogar</strong></td>
<td>Esta área tiene mesa, sillas, aparatos domésticos, muñecos, ropa de disfraces.</td>
</tr>
<tr>
<td><strong>Biblioteca o área de libros</strong></td>
<td>Esta área también puede incluir un área de escritura para niños mayores.</td>
</tr>
<tr>
<td><strong>Área de juegos sensoriales</strong></td>
<td>Esta área por lo general incluye algún tipo de arena y agua. Es un espacio de descubrimiento y de experiencia sensorial.</td>
</tr>
<tr>
<td><strong>Juguetes de mesa</strong></td>
<td>Esta área puede combinarse con bloques en algunos programas, especialmente para bebés y niños pequeños</td>
</tr>
</tbody>
</table>

Your ideas for other learning areas:

</tr>
</tbody>
</table>
1. **Over the next week during play time, observe the play spaces in your program.** What do children learn/practice while playing there? How does the room design help them to learn? How do the materials help children learn? Is there anything you would you change in the environment (think of space and materials) to better support children's learning while they play in this area?

   (We will discuss your observations in class. You can also use your observations to begin writing up the CDA Portfolio assignment below:)

You will use this information to complete this assignment for your portfolio. Use your professional experience and the knowledge you are gaining in the credential to guide your thinking.

**CDA Competency Standard I: To establish and maintain a safe, healthy learning environment.**

Write at least one paragraph in response to the following prompts:

CSIb: Reflect on the room environment in which your Observation will occur: How does the room design reflect the way you believe young children learn best? If the room was not designed by you, what do you see as its strengths and/or what would you change? For Center-Based Infant/Toddler: Additionally, reflect on and describe the similarities and difference between room environments designed for infants as compared to toddlers.

For center-based providers working with infants and toddlers: Additionally, describe the similarities and differences between environments designed for infants as compared to toddlers.

For center-based providers working with preschoolers: Additionally, describe the similarities and differences between environments designed for preschoolers as compared to toddlers.

For family child care-based providers: Additionally, describe how you organize one learning area that is used by all the children in your care (for instance, what materials do you include in the dramatic play area to support infants, toddlers, preschoolers, and/or school age children.)

2. **Bring a copy of your daily schedule to the next session.**
**Session B**

**Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas**

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota KCF Content Area II: Developmentally Appropriate Learning Experiences**

**CDA Content Area 1: Planning a Safe and Healthy Learning Environment**

**Learning Objectives**

- Describe elements of an effective daily schedule;
- Identify types of play: play with objects and social play;
- Define scaffolding and caregiver behaviors that scaffold learning in play.
- Objetivos de aprendizaje:

  - Describir elementos de una rutina diaria eficaz;
  - Identificar los tipos de juego: jugar con objetos y juego social;
  - Definir el andamiaje que los docentes pueden hacer para apoyar el juego de los niños.

2.5 hours total
The Daily Schedule

Daily Schedules are important because:

- Predictable, secure routines help children feel safe to learn and to exhibit the behavior we expect.

- Families need to know what to expect from the program.

- Caregivers need to know what to plan for and what to expect throughout the day.

Factors to Consider in Developing or Analyzing the Daily Schedule

- Use your knowledge of child development

- Consider the attention span of the children

- Allow enough time for children to develop interest in activities

- Plan time for care routines – eating, napping, arrival and departure, etc.

- Think about balance: child-directed and adult-directed activities and sizes of groups

- Minimize transitions between activities

- Remain flexible
Creating a Daily Schedule

Tips for developing your daily schedule:

• Start with non-negotiable items

• Establish times for key events – group times, meals, naps, outdoor play

• Plan the sequence of events – what things should come before other things?

• Plan the blocks of time

• Organize estimated times for the rest of the day’s events

• Try it out, adjust as needed
## My Current Daily Schedule

<table>
<thead>
<tr>
<th>What is working well</th>
<th>Opportunities for Improvement</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Play Definitions**

### Social Play

<table>
<thead>
<tr>
<th>Type of Play</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Play with Adults</td>
<td>Babies and young children play games with adults such as Peek-a-Boo and So Big.</td>
</tr>
<tr>
<td>Solitary Play</td>
<td>Child plays alone.</td>
</tr>
<tr>
<td>Parallel Play</td>
<td>Child plays alongside of other child/children, but doesn’t interact.</td>
</tr>
<tr>
<td>Associative Play</td>
<td>Child plays alongside of other child/children and borrows ideas by observing what they are doing. They do not plan play themes together.</td>
</tr>
<tr>
<td>Cooperative Play</td>
<td>Child plays in a group. Children plan play ideas together and cooperate to make it happen.</td>
</tr>
</tbody>
</table>
### Play With Objects

<table>
<thead>
<tr>
<th>Type of Play</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sensorimotor play</td>
<td>Child explores properties of toy through mouthing, holding, shaking, turning, and pounding.</td>
</tr>
<tr>
<td>Constructive play</td>
<td>Child constructs buildings, towers, structures, and gears through blocks, manipulatives, play dough.</td>
</tr>
<tr>
<td>Dramatic play</td>
<td>Child uses objects to pretend, such as talking on a phone. As children get older they begin to substitute objects for more real-looking objects, such as using a block for a phone. They also learn to play roles as they play out play scenarios.</td>
</tr>
</tbody>
</table>

### Stages of Peer Play

*adapted from “Social and Emotional Development” by Carol Garhardt Mooney*

<table>
<thead>
<tr>
<th>Typical Age when Behavior First Appears</th>
<th>Type of Play</th>
<th>What It May Look Like</th>
</tr>
</thead>
<tbody>
<tr>
<td>6-12 m</td>
<td>Parallel play – two children playing in the same area or same way but not with each other.</td>
<td>Infants share a space and both are playing with rattles and shakers. They do not look at or notice each other.</td>
</tr>
<tr>
<td>12-18 m</td>
<td>Parallel aware play – two children playing in the same area or in the same way but not with each other. However, they may acknowledge each other or make eye contact.</td>
<td>Infants share a space and both are playing with rattles and shakers. They occasionally glance at one another and may even offer each other a toy.</td>
</tr>
<tr>
<td>18-24 m</td>
<td>Simple social play – children engage in limited play together.</td>
<td>Two children are playing with clay at the art table. They share cookie cutters and may make simple comments.</td>
</tr>
<tr>
<td>18-24 m</td>
<td>Complimentary and reciprocal play – give and take is present and play is sustained.</td>
<td>Two children play on the climbing equipment together. They keep track of each other, watch each other down the slide, and laugh together. When one changes an activity the other sometimes immediately follows and other times does not.</td>
</tr>
<tr>
<td>2-3 yrs</td>
<td>Cooperative social pretend play – ability to role-play and work together but no planning or joint decisions about direction of play.</td>
<td>Children play dress-up together. They choose clothing and hats to put. They tell each other what choices they are making as they go. “I am the mother. I came home from work and I am tired.” “I am the daddy. I will make dinner for everyone!”</td>
</tr>
<tr>
<td>3-4 yrs</td>
<td>Complex social pretend play – play can be planned and flexible with negotiation and problem-solving skills used.</td>
<td>Two children work in the block area together. They want to build a ramp for cars to ‘jump’ off. They agree on different tasks and plan how they will build their ramp. When their first attempt doesn’t work they discuss new strategies.</td>
</tr>
</tbody>
</table>

Play is made richer when adults support children and facilitate some activities. For example, adults pretend to “drink the coffee” made by the children and comment on it.
Caregiver Interaction Strategies

**Scaffolding**: Support from a caregiver that enables a child to try a new skill that he or she has not yet mastered. Caregivers provide only as much support as needed and only provide the support for as long as needed. This temporary assistance allows children to stretch their abilities to challenging yet achievable skills.

<table>
<thead>
<tr>
<th><strong>ACKNOWLEDGE</strong></th>
<th>To give attention that tells the child that you noticed what he or she did. “You wrote your name on the picture!”</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ENCOURAGE</strong></td>
<td>To offer comments or nonverbal actions that promotes the child’s persistence and effort. “This is a hard puzzle but you are coming up with lots of good ideas.”</td>
</tr>
<tr>
<td><strong>GIVE SPECIFIC FEEDBACK</strong></td>
<td>To offer specific, rather than general, comments on the child’s performance. “That’s a “d,” Lily– it looks like a “b” but it is turned the other direction, see what I mean?” (show the two and point to the differences)</td>
</tr>
<tr>
<td><strong>MODEL</strong></td>
<td>To display for the child or children a skill or desirable way of behaving. “You both want the shovel; let’s search together for another shovel to use.”</td>
</tr>
<tr>
<td><strong>DEMONSTRATE</strong></td>
<td>To show the correct way to perform a procedure that needs to be done in a certain way. Showing children how to wash one’s hands thoroughly.</td>
</tr>
<tr>
<td><strong>CREATE OR ADD CHALLENGE</strong></td>
<td>To generate a problem or add difficulty to a task or step so that it is a bit beyond what children have already mastered. If children can easily throw a bean bag through a target two feet away, moving the target three or four feet away to increase the challenge.</td>
</tr>
<tr>
<td><strong>GIVE A CUE, HINT, OR OTHER ASSISTANCE</strong></td>
<td>To help children work on the edge of their current ability. Providing pictures and word on labels for toys; then, as children become familiar with the words, removing the pictures.</td>
</tr>
<tr>
<td><strong>PROVIDE INFORMATION</strong></td>
<td>To directly give children facts, verbal labels, or other information. “This is a cylinder.”</td>
</tr>
<tr>
<td><strong>GIVE DIRECTIONS</strong></td>
<td>To provide specific instructions for children’s actions or behavior. “Move the mouse to the icon first, then click the button.”</td>
</tr>
</tbody>
</table>

</tbody>
</table>
Scenario #1

A three-year-old child is working to build a block tower. The blocks are sitting on a bumpy carpet and keep falling over after two or three blocks are stacked. You can see that she is starting to get frustrated with the activity.

Scenario #2

A four-year-old is trying to enter into a group already playing in the dramatic play center. She is having trouble getting the group to let her “have a part” in the story they are acting out about having dinner at a restaurant.

Scenario #3

A school age child is writing in a journal about a field trip taken earlier in the day. She asks you to help her spell several words that you think she probably could figure out on her own.
Session B: Assignments

1. **Observe children’s play in one specific learning area.** How do the children play? Do they play alone or with another child? Choose two caregiver interaction strategies and use them to support their play. How did your chosen interactions help children learn while playing? Bring your notes for our next session.

2. **Continue work on the CDA Portfolio assignment,** writing up a description about how play spaces in your environment contribute to children’s learning:

   **CDA Competency Standard I: To establish and maintain a safe, healthy learning environment.**

   Write at least one paragraph in response to the following prompts:

   **CS1b:** Reflect on the room environment in which your Observation will occur: How does the room design reflect the way you believe young children learn best? If the room was not designed by you, what do you see as its strengths and/or what would you change? For Center-Based Infant/Toddler: Additionally, reflect on and describe the similarities and differences between room environments designed for infants as compared to toddlers.

   For center-based providers working with infants and toddlers: Additionally, describe the similarities and differences between environments designed for infants as compared to toddlers.

   For center-based providers working with preschoolers: Additionally, describe the similarities and differences between environments designed for preschoolers as compared to toddlers.

   For family child care-based providers: Additionally, describe how you organize one learning area that is used by all the children in your care (for instance, what materials do you include in the dramatic play area to support infants, toddlers, preschoolers, and/or school age children.)

3. If the articles for Sessions C on inclusion and play are included in the Participant Guide, bring a copy of each article that is being used during Session C.

Print out and bring a copy of each of the articles below to the next class, Session C;

- **Play Modifications for Children with Disabilities** by Susan Sandell, one for each participant: [http://rbaeyc.org/resources/Inclusion_Article.pdf](http://rbaeyc.org/resources/Inclusion_Article.pdf)
Session C

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota KCF Content Area II:** Developmentally Appropriate Learning Experiences

**CDA Content Area 8:** Principles of Child Growth and Development

**Learning Objectives:**
This session was developed to address the following learning objectives. You can reasonably expect that, by the end of this session, actively engaged participants will be able to:

- Define socio-dramatic play and how adults support it in early childhood settings
- Describe how special needs may affect play
- Create plans for play modifications to support inclusion.

**Objetivos de aprendizaje:**
- Definición del juego socio dramático y cómo adultos apoyan en configuración de la primera infancia
- Describir cómo las necesidades especiales de los niños pueden afectar el juego
- Crear planes de modificaciones del juego para apoyar la inclusión de todos los niños.

</table>
Components of Inclusion

ACCESS
Children’s ability to be part of the program, to be a member.

PARTICIPATION
Children’s ability to, for the most part, do the same things the other children in the program are doing.

SUPPORTS
Modifications and adaptations required to provide access and to enhance participation.
Inclusion Self-Assessment and Goal Setting

Session C: CDA Portfolio Assignments

Use information from this class to complete this assignment for your portfolio. Describe how your room environment, including materials in that environment helps children learn through play.

**CDA Competency Standard I: To establish and maintain a safe, healthy learning environment.**

Write at least one paragraph in response to the following prompts:

**CS Ib:** Reflect on the room environment in which your Observation will occur: How does the room design reflect the way you believe young children learn best? If the room was not designed by you, what do you see as its strengths and/or what would you change? For Center-Based Infant/Toddler: Additionally, reflect on and describe the similarities and difference between room environments designed for infants as compared to toddlers.

For center-based providers working with infants and toddlers: Additionally, describe the similarities and differences between environments designed for infants as compared to toddlers.

For center-based providers working with preschoolers: Additionally, describe the similarities and differences between environments designed for preschoolers as compared to toddlers.

For family child care-based providers: Additionally, describe how you organize one learning area that is used by all the children in your care (for instance, what materials do you include in the dramatic play area to support infants, toddlers, preschoolers, and/or school age children.)

**CDA Competency Standard II: To advance physical and intellectual competence.**

**CS IIa:** Pick one of the nine learning experiences you chose for your Resource Collection (RC II). How does this experience reflect your philosophy of how to support young children’s physical development?

CDA Content Area II (Infant Toddler Edition): Steps to advance physical and intellectual competence

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: Describir las etapas del desarrollo temprano del lenguaje
- Objetivo 2: Explorar estrategias para proporcionar bebés y niños pequeños con experiencias enriquecedoras con el lenguaje
- Objetivo 3: Practicar la construcción del lenguaje en rutinas
GLOSARIO

Dual Language Learners: Estudiantes que aprenden en dos idiomas: niños que están aprendiendo dos (o más) idiomas al mismo tiempo, o que están aprendiendo un segundo (o tercer) idioma mientras continúan desarrollando su primer idioma.

Self-talk: (Para desarrollar el lenguaje) El adulto describe sus acciones (lo que están haciendo y cómo lo están haciendo) a medida que lo hacen (narran sus propias acciones). Esto ayuda a los niños a aprender palabras nuevas (especialmente palabras de acción) e ideas.

Parallel-talk: el adulto describe lo que hace el niño mientras lo hace. Esto construye el vocabulario de los niños (especialmente las palabras de acción) y las habilidades del lenguaje.

Expansión del lenguaje: expandir (agregar) cosas que los niños dicen. Use las mismas palabras que el niño usó y agregue algunas más a medida que repite al niño. Por ejemplo, si un niño dice "cachorro blando", puede expandirse diciéndoles: "Sí, el cachorro se siente muy suave". Esto muestra que usted comprende y comparte su interés, mientras que también les da más lenguaje y extiende la idea.

Atención compartida: la atención compartida ocurre cuando tanto el adulto como el niño se enfocan en lo mismo al mismo tiempo, comunicando de forma no verbal un interés compartido en otro objeto al mirar el objeto y entre sí (para establecer la conexión del interés compartido), señalando, etc.
Reflection Observation Assignment: Children’s Exploration

Write 2-4 sentences describing the learning concepts you observed while the child was playing. What did you share with the parent, and how did you continue to support the child’s learning?
ESTRATEGIAS DE MENSAJES TEMPRANOS PARA MEJORAR EL DESARROLLO DEL LENGUAJE EN NIÑOS Y NIÑOS PEQUEÑOS

- Ser receptivo cuando los niños inician la comunicación
- Participar en la comunicación no verbal
- Usar lenguaje dirigido a niños
- Usar conversación propia y conversación paralela
- Ayuda a los niños a expandir el lenguaje
- Apoyar el desarrollo bilingüe
- Asistir al desarrollo individual y las necesidades
- Involucrar a los bebés con libros e historias
- Juega con los niños
- Crea un ambiente amigable para la comunicación

Developed by Peter Mangione and Alice Nakahata. © WestEd, The Program for Infant/Toddler Care. This document may be reproduced for educational purposes.
Speech and Language Development: Red Flags

A child’s failure to reach speech and language milestones as expected may be a “red flag,” or warning, which may indicate a speech and language development problem. If your child does not reach developmental milestones on schedule, it does not necessarily mean there is a problem. But he or she should be evaluated by a health professional.

Language delays include problems understanding what is heard or read (receptive language delays) or problems putting words together to form meaning (expressive language delays). Some children have both speech and language delays.

Red flags for a speech or language delay include:

- No babbling by 9 months
- No first words by 15 months
- No consistent words by 18 months
- No word combinations by 24 months
- Slowed or stagnant speech development
- Problems understanding your child’s speech at 24 months of age; strangers having problems understanding your child’s speech by 36 months of age
- Not showing an interest in communicating
- Repeating words not connected to the function: echolalia

Also, talk to your health professional anytime you or another caregiver has concerns about your child’s speech and language development or other problem that affects your child’s speech or understanding of language, such as:

- Excessive drooling
- Problems sucking, chewing, or swallowing
- Problems with control and coordination of lips, tongue, and jaw
- Stuttering (also called “disfluency”) that causes a child embarrassment, frustration, or difficulty with peers
- Poor memory skills by the time your child reaches kindergarten age (5 to 6 years). He or she may have difficulty learning colors, numbers, shapes, or the alphabet.
- No eye contact with communication; not responding to their name.

Other red flags include:

- Failure to respond normally, such as not responding when spoken to. This may include signs that the child does not hear well, such as not reacting to loud noises.
- A sudden loss of speech and language skills. Loss of abilities at any age should be addressed immediately.
- Not speaking clearly or well by age 3.

**Homework:**

This week, your assignment is about practicing the three strategies of “Self-talk” “Parallel talk” and “expansion”. Practice at least once a day during a routine OR during active play. You must practice during a routine at least once and active play at least once.

Write down anything you notice about how the child responded. Also write down what you liked about doing this and what was hard about doing this.

If you prefer, you may audiotape your interactions, and play them back to note what the child did, what you liked and challenges.

**NOTES:**
Desarrollo del Lenguaje

MNITCDA
Clase 21
Sesiones A, B
6 horas

Session A

Date / Time: Location:
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies and content areas are addressed in the training.

KCF Content Areas: I. Child Development and Learning and II: Developmentally Appropriate Learning Experiences

CDA Content Areas: II. Advancing Physical and Intellectual Development and VIII. Understanding Principles of Child Development and Learning

Learning Objectives
• Describe language behaviors linked with developmental stages (infant, toddler, preschool, school age);
• Demonstrate behaviors to promote communication and language development, such as introducing new language, narrating, back and forth exchanges, and extending language.

Objetivos de Aprendizaje
• Describir comportamientos del lenguaje relacionados con etapas de desarrollo (niño, niño, edad preescolar, escolar);
• Demostrar maneras de promover la comunicación y el desarrollo del lenguaje, tales como presentación de lenguaje nuevo, narrando, intercambios de ida y vuelta, y extendiendo el vocabulario.

## Importance of Language Development

Desarrollar el lenguaje es de vital importancia durante la primera infancia porque:

- Desarrollo del lenguaje comienza al nacer.
- Desarrollo del lenguaje es promovido a través de relaciones.
- Desarrollo del lenguaje afecta a otros ámbitos del aprendizaje y desarrollo.
- Hablar y escuchar viene antes de la lectura y la escritura
- Experiencias tienen un impacto importante en el desarrollo del lenguaje.
- El desarrollo del lenguaje se influye al éxito escolar.

The Caregiver’s Role in Supporting Oral Language

Remember the Three Ts: Tune In! Talk More! Take Turns!

Tune In

- **Listen, watch, and notice** to understand what a child is trying to communicate and respond in a timely way.

- Watch and notice what a child is focused on.

- Use moments of **joint attention** to notice and describe or name what a baby is focused on at that moment.

- When you communicate with children, pay attention to how they respond.

- Model listening.

Talk More

- Use “**parentese**” to talk with babies (includes using gestures as well as words.)

- Use **self-talk** and **parallel talk** with all children. Describe what you do as you do it and what children are doing as they do it.

- **Repeat and expand** on what children say.

- Build vocabulary by introducing **rich words** connected to real experiences.

- Play with language using songs, finger plays, rhymes, storytelling, and dramatic roles.

- Use books to build and practice using vocabulary.

- With older toddlers and preschoolers, talk about experiences in the past and what will happen in the future.

Take Turns

- **Respond** to children’s words and actions.

- Encourage children to respond to your words and actions.

- Encourage **back and forth exchanges** (conversation) by talking about things that interest children.

- Ask **open-ended questions**.

- **Give children time** to listen and respond to you and to one another.

- Use play, small groups, and other informal times to encourage conversation.
Supporting Language Development in Children with Special Needs

Caregivers can support children with special needs in their language development using the following principles:

- Communicate with families; ask for suggestions or information about language impacts and specialist suggestions.

- Suggest community services.

- Provide a model of appropriate language.

- Make simple modifications.

- Be patient and expect children to be patient, too.

- Avoid the use of slang or invented words.

- Resist making assumptions.
Qué destacar con diferentes edades y etapas de desarrollo del lenguaje

- Con **niños pequeñitos** (de entre 10-18 meses):
  - Utilizar un montón de lenguaje relacionados con lo que están enfocados y en respuesta a lo que hacen y dicen.
  - Usar gramática simple en nuestras oraciones.
  - Etiquetar y describir objetos, personas y eventos.

- Con **niños pequeños** (cerca de 18 meses a 3 años):
  - Continuar con un montón de idiomas.
  - Uso de oraciones más complejas.
  - Introducir más palabras raras.

- Con **tres años de edad**:
  - Hablar sobre el pasado y el futuro.
  - Preguntar lo que piensan o sienten sobre algo y esperar una respuesta.
  - Empezar a preguntarles lo que piensan que puede pasar, o por qué creen que un personaje de la historia hizo algo, o cómo podría resolver un problema.

- Con **cuatro y cinco años de edad**:
  - Fomentar conversaciones con adultos y compañeros.
  - Pedirles que describan eventos del pasado y del futuro.
  - Animarlos a crear o construir historias en juego, interacciones de grupo y en conversación.

---

**Session A – Portfolio Assignment**

BEGIN Portfolio Assignment (to be completed after Session B)

**Competency Standard II: To advance physical and intellectual competence**

RCII: In your own words, explain how you would teach the curricular area below. Indicate the age group and list the intended goals, materials, and process/teaching strategies. For each activity, specify how it is developmentally appropriate for that age group.

- Family Child Care-infants, toddlers, preschool
- Preschool-3s, 4s, 5s
- Infant/Toddler-young infants, mobile infants, toddlers

RCII-2: Language and Literacy

CSIId: In an additional paragraph, describe ways to promote the communication/language development among all children including dual language learners.

**Field Work**

Bring one song, one finger play, and one children’s book to the next session and be prepared to share the activities with the group.
Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies and content areas are addressed in the training.

KCF Content Areas: II: Developmentally Appropriate Learning Experiences

CDA Content Areas: II. Advancing Physical and Intellectual Development

Learning Objectives:
- Identify strategies to support oral language development with Dual Language Learners.
- Demonstrate ability to form open-ended questions; and
- Plan strategies to prompt conversation using listening, questions, and back and forth exchanges.

Objetivos de aprendizaje:
- Identificar estrategias para apoyar el desarrollo del lenguaje oral con niños que aprenden dos idiomas.
- Demostrar capacidad para formar preguntas abiertas; y
- Plan de estrategias de conversación rápida utilizando escuchar, preguntas y intercambios.

Supporting Children Learning English

Suggestions for supporting acquisition of English:

- When possible, use first language (home language) to introduce English
- Create a consistent and predictable routine
- Use small groups when possible
- Pair them with a supportive child
- Use repetition
- Use self-talk and parallel talk
- Speak at a standard speed with pauses between phrases, using simple, clear, short sentences
- Use gestures, movements, and facial expressions to help convey meaning
- Simplify language somewhat to help create understanding
- Use real, interesting experiences and concrete objects linked to English language
- Choose books wisely
- Use play experiences
- Play with language through songs, stories, chants, rhymes, and finger play
- Think about ways to give children background knowledge to prepare for an experience. For example, read a book to them one-on-one before you read it to the big group; introduce some key words in English (with their home language word if you know it) that relate to concepts you will explore in large or small groups, or read about in a story
Suggestions for supporting continued development of home language:

- Encourage family members to continue to use the child’s home language
- Be clear about what the language of instruction is within the program
- Have some materials in the child’s home language present in the environment
- Locate and suggest community resources

You may see young dual language learners go through these stages:

1. Using their home language to communicate
2. Silently watching and listening
3. Attempting to use some key words or phrases in English
4. Using English productively

Six Ways to Extend the Topic
(adapted from Weitzman & Greenberg, 2002)

1. **Inform**: Add information about the past or present; describe objects, food, or experiences; compare or contrast two things.
2. **Explain**: Give reasons for what is happening, justify opinions, or explain outcomes.
3. **Talk about feelings and opinions**: Express feelings or opinions and reasons you may feel that way.
4. **Take another perspective**: Project into others’ experiences or lives to help children understand other points of view, or project into situations never experienced, such as space travel.
5. **Talk about the future**: Discuss predictions, speculations, anticipation, and problem-solving (what might happen if...) using prediction.
6. **Pretend**: Talk about imaginary things, play a pretend role, or create an imaginary story.
Asking Questions: Is it Open or Closed? Creating Open-Ended Questions

Look at the questions/statements below and determine whether each one is open-ended (if yes, mark it with an “O”) or closed-ended (if it is closed, mark it with a “C”). If the question is closed, reframe it so children would be required to answer with more than a one-word response.

Examples:

_ O Why do we need to put the caps on the markers? Change to: n/a; this is an open-ended question

_ C Did you eat breakfast with Dad this morning? Change to: What do you like about breakfast?

_ _What was the story about? Change to: _____________________________

_ _What is the shape of that block? Change to: _____________________________

_ _Tell me about what you’re making with the play dough. Change to: _____________________________

_ _Why did you put your gloves inside your jacket? Change to: _____________________________

_ _Was Goldilocks scared by the bears? Change to: _____________________________

_ _Do you like pizza? Change to: _____________________________

Open ended questions:

- require more than a one-word response.
- encourage children to think and to use language.
- can produce more than one kind of response.
### Juego: Andamios técnicos para desarrollar habilidades lingüísticas

Competency Standard II: To advance physical and intellectual competence

RCII: In your own words, explain how you would teach the curricular area below. Indicate the age group and list the intended goals, materials and process/teaching strategies. For each activity, specify how it is developmentally appropriate for that age group.

- Family Child Care-infants, toddlers, preschool
- Preschool-3s, 4s, 5s
- Infant/Toddler-young infants, mobile infants, toddlers

RCII-2: Language and Literacy

CSIIId: In an additional paragraph, describe ways to promote the communication/language development among all children including dual language learners.
GLOSARIO

**Lenguaje oral.** Este término se refiere a todos los aspectos del lenguaje hablado, incluyendo vocabulario creciente y diverso de los niños con nuevas y variadas palabras.

**Lenguaje.** El medio por el cual una persona comunica ideas o sentimientos a otro de tal manera que el significado es entendido mutuamente.

**Lenguaje expresivo.** Y uso de los sonidos (o signos) de un idioma o idiomas para la comunicación.

**Lenguaje receptivo.** La audiencia (o tomar) y entender el lenguaje.

**Gorgoritos.** Agradable vocal-como sonidos de los bebés alrededor de los dos meses de edad. Ejemplo: "u-u-u."

**Balbuceo.** Repetición de combinaciones de consonante-vocal en cadenas largas, comenzando alrededor de los 6 meses de edad. Ejemplo: "ba, ba, ba"

**Comprensión.** La capacidad para entender palabras y combinaciones de palabras.

**Producción.** La capacidad de utilizar palabras y combinaciones de palabras.

**Gramática/reglas.** Las formas en que palabras se pueden poner juntas a fin de formar oraciones en un idioma dado.

**Fonema.** La unidad más pequeña del discurso. Ejemplo: Palabra de Th "bat" incluye 3 Fonemas: "b-a-t."

**Vocabulario.** Las palabras utilizadas y entendidas por una persona.

**Conjunta atención.** "Cuando un niño comparte un objeto o una actividad con un cuidador. Un niño puede señale un objeto interesante, mirar hacia adelante y hacia atrás entre un objeto y un cuidador o mostrar interés por sosteniendo o darle un objeto"(Adamson, 2013).

**Narrativa.** Lenguaje de modelado, describiendo sus acciones y las acciones de los niños. A veces esto se llama "juego por juego". Hay dos maneras de narrar:

- **Hablar paralelo.** Describir acciones de los niños como que hacen. Ejemplos: "veo que mueve los dedos pequeños!" "Daniel dibuja un tigre."
- **Dialogo.** Describir las acciones. Ejemplos: "ahora voy a cambiar el pañal." "Estoy poniendo la pintura en la taza."

**"Diálogo materno".** Un tipo de discurso de adultos con los bebés que ocurre en todas las culturas. El adulto "habla en un tono más alto, a un ritmo más lento, con enunciación clara y en frases más simples y más cortos, combinados con gestos y expresiones faciales" (de la nieve, 1991). Diálogo materno ayuda a bebés a escuchar los sonidos en palabras. Ejemplo: "así bilig!!!!"
**Repetición y extensión.** Repitiendo lo que dice un niño y luego agregando un poco más. Por ejemplo, si un niño dice "carro rojo", usted podría decir "que es un enorme camión rojo!" Repetición y extensión anima a los niños a utilizar el idioma que tienen y les da un nuevo lenguaje.

**En palabras raras o “ricas”.** Palabras nuevas o desconocidas o vocabulario presentado a los niños para ampliar su vocabulario. Palabras raras o riacas no se utilizan a menudo por los niños o con niños, pero adultos saben lo que significan. Ejemplo: En lugar de utilizar siempre la palabra "grande" para describir a algo grande, usted podría decir "enorme" o "gigantesco". Nuevas palabras se aprenden mejor cuando el tema es de interés para los niños o se introducen en contextos significativos.

**Preguntas abiertas.** Preguntas que requieren más de una respuesta de una palabra. Preguntas abiertas no tienen una respuesta concreta, el niño puede decir lo que le gusta y “tener razón”. Algunos ejemplos de preguntas abiertas son las siguientes: "¿Dónde está tu coche?" o "Qué piensas que va a pasar?" Preguntas abiertas alentan a los niños a pensar y les dan la oportunidad de expresar sus propias ideas.

**Andamios.** El apoyo de un cuidador que permite a un niño probar una nueva habilidad que él o ella no ha todavía dominado. Como el niño aprende la habilidad de los maestros, el apoyo se reduce hasta que el niño puede hacer la nueva habilidad independientemente. A veces un cuidador ayudará al niño con señales o consejos para ayudarle a cumplir una tarea en el borde de sus habilidades actuales.

**Conversaciones.** Intercambios orales sobre un tema. Al tener conversaciones con los niños, intentar hacer cinco turnos conversacionales (Dickinson, 2011). Esta técnica se conoce como "intercambiar para cinco".

Websites

LAUP’s webpage “Take Time to Talk” has information for parents in:

Observación y planificación curricular
Clase 22
2.5 horas

Descripción general de la clase 22

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

Minnesota KCF Content Area IV: Assessment, Evaluation and Individualization
CDA Content Area VII: Observing and recording children’s behavior

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

• Objetivo 1: explorar el ciclo de planificación del currículo.
• Objetivo 2: practicar la observación de bebés y niños pequeños para usar la observación en la planificación del currículo.

Class 22 Overview:

                          |                                           | • Large group discussion  
                          |                                           | • Small group: analyze observation statements |
### GLOSARIO

**Plan de estudios:** "En su forma más simple, el plan de estudios se define como qué enseñar y cómo enseñarlo". (Frede y Ackerman, 2007) Para bebés y niños pequeños: qué experimentan los bebés y niños pequeños (qué atraviesan y cómo se sienten) y qué ellos aprenden de esas experiencias. (Lally) El plan de estudios sucede durante el día. Los contextos clave del currículo para bebés y niños pequeños son: espacios de juego, rutinas de cuidado diario e interacciones y conversaciones.

**Observar / observación:** observar, escuchar y registrar lo que los niños hacen y expresan (verbalmente o sin palabras). Los educadores usan la información para ver qué saben y pueden hacer los niños para que podamos ayudarlos a seguir creciendo y aprendiendo.

**Documentar/ documentación:** anote o de alguna manera observe (fotos, muestras de trabajo, grabaciones, etc.) lo que ve que hacen o dicen los niños que usted piensa que es significativo para que pueda pensar más profundamente al respecto, reflexionar sobre ello y, lo más importante, compartir con otros para obtener su interpretación de lo que se documentó.

**Reflexionar/ reflexión:** pensar en lo que has visto o oído a un niño (o niños) o pensar en tus acciones para mejorar la práctica.

**Evaluación:** Recopilación de información para ver qué saben y pueden hacer los niños para que podamos ayudarlos a seguir creciendo y aprendiendo. El Código de Conducta Ética de NAEYC recomienda que es mejor si la información de evaluación proviene de más de una o múltiples fuentes.

---
Diapering as Curriculum: Making Everyday Moments Intentional

For young children, “curriculum” occurs in the everyday moments of regular caregiving routines, if we are intentional about what we do in those everyday moments. For example, diapering is often one of the only times in group care (other than feeding) where a child has the full, one-on-one attention of her caregiver. What can a child learn during diapering?

Social-emotional development

- Diapering is a great one-on-one, close interaction between teacher and child. Letting the child know what you are going to do before you do it and gentle, sensitive care during diapering teaches the child that the world is a safe, predictable place and that people can be trusted to meet her needs.
- Diapering can be an opportunity for playful exchange between teacher and child with eye contact and verbalizations (e.g. “Peek-a-boo” or singing). These close interactions let the baby know that he is interesting and important, thus promoting self-esteem.
- If the child is distressed, the teacher offers comfort and soothing, using words to describe what the child may be feeling. This teaches the child about expressing and regulating emotions (Oh, you look sad to stop playing to have your diaper changed. It’s hard, but I will help you.). This also helps children learn self-regulation.
- Responding to the infant’s cues—e.g. that she is feeling uncomfortable, playful, distressed--during diapering (and other times), teaches the child that she is a competent person who is able to get her needs met by communicating with these cues.
- Letting the child know what we are going to do ahead of time (no matter how young the baby) helps her believe that the world is a predictable place. Even if she doesn't understand the words, when you talk to her, she learns that something is about to happen and she gets her ‘coping skills’ ready--this helps children learn self-regulation.

Communication

- Talking and singing to the child during this intimate time teaches the rhythm of speech which helps children learn literacy. This also teaches vocabulary, including words for bodily functions and physical sensations (wet, dry, cold, warm, calm) which will help during toilet training and give the child a sense of self.
- The sensitive teacher pauses in her talking to allow the baby to respond by vocalizing which teaches the pleasure of back-and-forth conversation. Imitating the baby's sounds also promotes the 'back-and-forth' of conversation.

Sensory and motor development

- Without the confinement of clothes and diapers, the infant can move his legs, find his toes (and other available body parts) and enjoy the “freedom” of being without clothes.
- Putting lotion or diaper cream on the baby can be soothing and provides an opportunity for learning more words about feelings which helps children learn self-regulation.

In caring for young children, how we are is as important as what we do (Jeree Pawl). By being aware of and intentional about the importance of our daily interactions with young children, every moment becomes a teachable moment.

Michele Fallon, LICSW, IMH-E™(IV) Infant and Early Childhood Mental Health Consultant, 2014

Next Steps:
Ten Principles of Infant-Toddler Curriculum Development

1) Curriculum for infants and toddlers is unique—It is not babysitting (just ‘love’ them and keep them safe) and it is not mini-preschool (you have to stimulate their development at all times).

2) All learning for infants and toddlers occurs in the context of relationships—Infants are born wired to be in relationship to ensure their survival. They look to their caregivers (parents and teachers) to learn about themselves (Am I interesting?, Am I worthy of care? Am I able to get my needs met? What kind of emotions is it okay to express?) and to learn about the world (Is the world a safe place to explore and learn?). Therefore, it is essential to support the development of consistent, predictable, nurturing relationships with trusted adults in small, intimate groups which become the base for social, emotional and intellectual learning in a safe and interesting environment.

3) Children are born curious and motivated to learn—It is our job to read and respond to the cues infants give us about what motivates and interests them; teachers are facilitators of learning for infants and toddlers, rather than directors of learning. Infants and toddlers should be active partners in “selecting” curriculum contact. Teachers must be prepared to adapt their plans and actions in the moment to meet the needs and interests of each child.

4) Infants and toddlers learn holistically, meaning that they do not separate social, emotional, language, intellectual and physical (motor) learning—they learn from the total experience in the moment more than at any other age.

5) Learning for infants and toddlers occurs in everyday moments and routines, such as diapering (see handout on “Diapering as Curriculum”), being fed, being held, talked to and played with. Good teachers are intentional in their interactions with babies, mindful that every interaction is a learning opportunity.

6) Every infant and toddler is unique, with a unique temperament and learning style. It is because of these differences that each child needs to be cared for differently. The three stages of infancy—young infant, mobile infant, toddler—and the transitions between them need to be taken into account as well.

7) Environment has a strong influence on infant and toddler learning and so must create interest and encourage and support exploration. This includes the physical environment, group size, daily schedules and routines, and assurance of consistent, responsive, trusted caregivers.

8) Language development is critical during the infant-toddler period. Young children
need to have many opportunities each day for meaningful and reciprocal ‘conversation’ about what is going on around them. This means that even young babies’ communications (looking, smiling, cooing) are acknowledged and encouraged.

9) **Caring for young children stirs up strong feelings in both parents and caregivers** and conflicts occur around these “protective urges” and strategies for dealing with these feelings and conflicts should be considered part of care. Teachers can have a powerful influence on the relationships between parents and their children by supporting parents and providing responsive care to children, which makes their cues easier to read and therefore more enjoyable for their parents. Connections with parents are essential!

10) **Infant and toddler teachers have the most important job in the world!** You are working with young children during the most rapid period of brain development and the experiences you give children contribute to the ‘architecture’ of their brains. You are helping to lay the foundation for all the learning that follows. But this is HARD work and typically stirs up our emotions! Take care of yourself and get the support you need to do your job well.

Never, ever, underestimate the importance of how you are and what you do for children in the everyday moments you spend with them. You are planting seeds that have the potential to change the world in ways you may never see.

*Michele Fallon, LICSW, IMH-E™
Infant and Early Childhood Mental Health Consultant*
**Homework:** This week, your practice assignment is about beginning the curriculum planning cycle. You are going to work on the first two parts: observe/document and reflect/analyze. Here is your task:

1. Choose one child (an infant or toddler if possible) to observe. Decide if you want to observe in one area of development (for example language/communication, movement, relationships, etc.) or if you want to do a general observation.

2. Decide how you are going to document your observations (remember for photos or recordings you need parental permission first). Simple notes are fine, just remember to include specific details.

3. Observe the child once a day (if possible at different times of day and in different locations) at least 3 times.

4. Reflect on what you saw. Use the questions on the “Curriculum Cycle” handout to think about what you think it means and write at least one sentence per observation.

Planificación para satisfacer las necesidades individuales

Clase 23
2 horas

Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Descripción general de la clase 23
Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y/o indicadores se abordan en la capacitación.

Minnesota KCF Content Area IV: Assessment, Evaluation and Individualization
CDA Content Area VII: Observing and recording children’s behavior

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

• Objetivo 1: Utilizar la documentación para informar a la evaluación del niño
• Objetivo 2: Describir los pasos para recomendar servicios adicionales
• Objetivo 3: Generar estrategias para comunicar con los padres sobre las necesidades especiales

### Reflection on Curriculum Observation:

Write 2-4 sentences on how observation helps you to understand what children (infants & toddlers) are learning and to plan for new learning (May apply to Competency Statement I).
Observar / observación: observar, escuchar y registrar lo que los niños hacen y expresan (verbalmente o sin palabras). Los educadores usan la información para ver qué saben y pueden hacer los niños para que podamos ayudarlos a seguir creciendo y aprendiendo.

Documentar / documentación: escribir o de alguna manera anotar (fotos, muestras de trabajo, grabaciones, etc.) lo que ve a los niños haciendo o diciendo para mantener un registro de ello.

Reflexionar / reflexión: pensar en lo que has visto u oído a un niño (o niños) o pensar en tus acciones para mejorar la práctica.

Evaluación: Recopilación de información para ver qué saben y pueden hacer los niños para que podamos ayudarlos a seguir creciendo y aprendiendo. El Código de Conducta Ética de NAEYC recomienda que es mejor si la información de evaluación proviene de más de una o múltiples fuentes.

Inclusión: Políticas, procedimientos y creencias de que todos los niños deberían incluirse en los entornos de la primera infancia, incluidos aquellos con retrasos o discapacidades del desarrollo; niños dotados y talentosos; niños cuyas familias son cultural y lingüísticamente diversas; y niños de todos los grupos socioeconómicos.

Individualización / Atención individualizada (de PITC): Seguir los ritmos y estilos únicos de los niños promueve el bienestar y un sentido saludable de sí mismo. Es importante no hacer que un niño se sienta mal por sí mismo debido a ritmos biológicos o necesidades que son diferentes a las de otros niños. Responder con prontitud a las necesidades individuales de los niños respalda su creciente capacidad de autorregularse, es decir, funcionar independientemente en contextos personales y sociales. El programa se adapta al niño, y no al revés, y el niño recibe el mensaje de que él o ella es importante, de que se cumplirán sus necesidades y de que se respeten sus elecciones, preferencias y impulsos.

Bandera roja: comportamientos que le causan preocupación en un área (s) del desarrollo de un niño. Deben advertirle que se detenga, mire y piense, y luego observe y documente.

Tomando perspectivas: ¿Qué se siente ser......

esta mamá

esta bebé

La/el cuidador/a
Planificando tu conversación con mamá (o familia):

¿Dónde y cuándo hablarás con ella?

¿Qué podrías decir?

¿Cómo transmitirá su apoyo?

Homework: This week, your practice assignment builds on what you did last week. Please continue the curriculum cycle with your child. Use your observations and reflections from last time, as well as other things you know about this child, and complete a plan for them using the Handout: Providing Individualized Care. Start by answering the first box: “what makes this child unique”. Plan at least 2 strategies in each area-strategies may include materials, toys or rearrangement of the environment. For example, after observing the child you may have noticed they are particularly interested in getting from one place to another by holding onto the edges of furniture. So you decide to rearrange the room so they can get farther that way, but the arrangement also provides some challenges that might encourage them to try taking a step or two without holding on.

You can think about ways you might change a routine. You can think about the kind of language you want to use, or maybe you see this child is interested in “helping” so you begin to pass them the diaper at the beginning of the routine.

When you think about relationships, you might think about what you do to promote your relationship with the child, to promote their relationship with their parent or to promote their relationships with other children.

Try out at least one of the new strategies before we get together again. (If possible more than once).

Session A

Overview of Curriculum Session A

KCF Content Area: Health, Safety and Nutrition; Professionalism
CDA Content Area: Safe and Healthy Environment

Learning Objectives
- Identify MN Rule 2 and Rule 3 licensing standards and best practices of supervision
- Examine and address supervision challenges experienced in early child care center-based care programs
- Identify three interaction techniques to use while supervising
- Identify safe infant sleep practices; SUID

Objetivos de aprendizaje
- Identificar la Regla 2 de MN y la Regla 3 con los estándares de licencia y prácticas de supervisión
- Examinar los desafíos de supervisión en programas de educación temprana
- Identificar tres técnicas de interacción para supervisar
- Identificar prácticas de sueño seguro del bebé; SUID

**Session A - Reflection**

Take a few minutes to reflect on what you have learned about “active supervision” in this session of this class. Use the spaces below to capture your ideas and plans for action. Be prepared to discuss at the beginning of Session B.
In this session I learned...

Based on what I learned, some things I plan to do ...

This session started me thinking about...
1. Complete Session A “Reflection” document and be prepared to share at beginning of Session 2

2. Reflecting “Active Supervision”: Identify five playground-specific risks for injury and supervision challenges you would anticipate for toddlers playing on a playground.

3. Provide a supervisory activity which could minimize risk of injury and reflect effective active supervision.

**Session A Resources**

**Session B: Objectives**

**Knowledge and Competency Framework (KCF) Content Area, CDA Content Areas**

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**KCF Content Area:** Health, Safety and Nutrition; Professionalism  
**CDA Content Area:** Safe and Healthy Environment

**Learning Objectives:**
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory they will be able to:

- Define the difference between Universal and Standard Precautions.
- Differentiate between cleaning, sanitizing and disinfecting;
- Identify three components necessary to maintain a healthy and safe environment;
- Describe effective hand-washing techniques and when they should be utilized;
- Recognize potential blood-borne pathogen exposure incidents and identify procedures for minimizing incidents, preventing exposure, cross-infecting and proper disposal.
- Identify signs of abuse, neglect and abusive head trauma
- Recognize support needs for children with special health needs

**Objetivos de aprendizaje:**

- Definir la diferencia entre precauciones estándar y universales;
- Diferenciar entre limpieza, sanitización y desinfección;
- Identificar tres componentes necesarios para mantener un ambiente sano y seguro;
- Describir técnicas de lavado de manos eficaz y cuándo deben ser utilizadas;
- Reconocer posibles incidencias de exposición de patógenos transmitidos por la sangre e identificar procedimientos para minimizar incidentes, prevención de la exposición, infección y eliminación correctas
- Identificar signos de abuso, negligencia y traumatismo craneal abusivo
- Reconocer las necesidades de apoyo para niños con necesidades especiales de salud

School-age: A child who is at least of sufficient age to have attended the first day of kindergarten or is eligible to enter kindergarten within the next four months but is younger than 13 years of age.
SIDS: Sudden Infant Death Syndrome
SUID: Sudden Unexpected Infant Death
Toddler: A child at least 16 months old but less than 33 months old

Session B - Reflection

Take a few minutes to reflect on what you have learned about “active supervision” in this session of this class. Use the spaces below to capture your ideas and plans for action. Be prepared to discuss at the beginning of Session C.
In this session I learned...

Based on what I learned, some things I plan to do ...

This session started me thinking about...
1. Complete Session B “Reflection” document and be prepared to share at beginning of Session C.

2. Respond in writing to the following questions:
   a. How are mouthed toys managed to prevent cross-infecting between infants?
   b. How frequently do toys in a toddler room need to be cleaned, sanitized, or disinfected?
   c. How are food contact surfaces cleaned, sanitized, or disinfected?

3. List the steps to making a “child protection” report.

Session C: Objectives

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas

The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

KCF Content Area: Health, Safety and Nutrition; Professionalism
CDA Content Area: Safe and Healthy Environment

Learning Objectives:
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory they will be able to:

- Recognizes and protects children from exposure to hazards related to the environment (such as Pesticides, lawn applications, animals/pets, mold, mildew, garbage, diapering, pests, air quality, etc.)
- Recognizes and avoids health hazards related to food, such as choking, and allergies.
- Recognizes and protects infants and children through the risk reduction assessment and risk reduction plan.
- Describes and follows regulations and best practices for safe transport of children in vehicles.

Objetivos de aprendizaje:

- Reconocer y proteger a los niños contra peligros relacionados con el medio ambiente (tales como pesticidas, aplicaciones de césped, animales, moho, basura, cambio de pañales, plagas, calidad del aire, etcetera.)
- Reconocer y evitar riesgos para la salud relacionados con la comida, como asfixia y alergias.
- Reconocer y proteger a los bebés y los niños evaluando como reducir riesgos y tener un plan de reducción de riesgos.
- Describir y seguir las normas y mejores prácticas para el transporte seguro de niños en los vehículos.

CCC: Child Care Centers
CDC: Centers for Disease Control and Prevention
CFO3: *Caring for Our Children, 3rd Edition*
CSHN: Child/ren with special health needs
DHS: Department of Human Services
IDCCS: Infectious Diseases in Child Care Settings and Schools
Infant: A child who is at least six weeks old but less than 16 months
MDH: Minnesota Department of Health
MN: Minnesota
OSHA: Occupational Safety and Health Administration
Preschooler: A child who is at least 33-month-old but who has not yet attended the first day of kindergarten
Rule 2: Legislation in MN Rules, governing licensed family-based child care environments
Rule 3: Legislation in MN Rules, Chapter 9503 governing child care centers
School-age: A child who is at least of sufficient age to have attended the first day of kindergarten or is eligible to enter kindergarten within the next four months but is younger than 13 years of age.
SIDS: Sudden Infant Death Syndrome
SUID: Sudden Unexpected Infant Death
Toddler: A child at least 16 months old but less than 33 months old

Session C

Interaction Scenarios

Reading through the scenarios, answer these questions:

A. What are the potential health and safety challenges in this scenario?
B. What could be done to eliminate (or minimize) the potential health and safety risks in this scenario?
C. What would best practices be in each scenario and how might those differ from licensing requirements?

1. Ms. Melissa, the early child care educator, is serving lunch to the preschoolers. There is one preschooler with a severe peanut allergy. A second preschooler has just finished washing his hands. On the way back to the table, he stops by his cubby and picks up a bag of Halloween candy, bringing it to the lunch table. He states his mom said he could share the candy with his friends after lunch.

2. Preparing for nap, the caregiver begins changing diapers. She has three toddlers in the bathroom with her. One needs diapering and the other two are toilet trained. She has directed one of the toilet trained toddler to the toilet. While the caregiver is diapering one toddler, the toddler who has been using the toilet walks up to her crying. The caregiver notes the toddler has had a loose stool and it is running down his legs. The second toddler waiting to use the bathroom runs out of the bathroom with all her clothes off.

3. Some preschoolers are playing a board game together. One of the preschoolers in the group gets up from the table, grabs the bottle of sanitizer on the counter, and sprays it in the air above the other children playing the game. The children who were sprayed shout to their teacher that they were sprayed.

4. You are the lead teacher in the young preschool room. The Center Director has just told you a new child will be starting next week in your classroom and that this child has a seizure disorder. However, the child is on medication and has not had a seizure for over a year.

News Briefs on Child Care Development Fund Health and Safety Requirements

CDA Portfolio Assignment:
Competency Standard V: To ensure a well-run, purposeful program that is responsive to participants needs.
CSV RC: Resource Collection Item (point to resources in the DHS documents listed in the Participant Guide.)

RCV: Collect three samples of record keeping forms you use/have used. Include an accident report form; an emergency form; and a completed tool/form that you have used to observe and document a child’s developmental/learning progress. (Do not include a child’s name).

Then write at least one paragraph about how you used the observation tool/form you included. Why are observation and documentation important parts of program management? How do you ensure that you are accurately/objectively observing and tracking each child’s developmental and learning progress?

Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies and content areas are addressed in the training.

Minnesota's KCF: Content Area II: Developmentally Appropriate Learning Experiences

CDA Content Area 5: Managing an Effective Program

Learning Objectives
- Define curriculum and describe its relationship to early learning standards and child development.
- Identify various types and approaches to curriculum.
- Describe the domains of development and the types of skills that fit within each domain.

Objetivos de aprendizaje
- Definir el currículo y describir su relación con estándares de aprendizaje temprano y desarrollo del niño.
- Identificar diferentes tipos y enfoques de currículo.
- Describen los dominios de desarrollo y los tipos de habilidades que encajan dentro de cada dominio.

Preparation for Session A:

Print out and bring:
- A copy of Choosing a Preschool Curriculum by the National Center on Quality Teaching and Learning for the Office of Head Start, available online at https://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/docs/preschool-curriculum.pdf
- A copy of 10 Components of High Quality Child Care for Infants and Toddlers, available online at https://www.childdevelopmentcouncil.org/resources/10-components-of-infant-and-toddler-care
- Bring your copy of the ECIPs or print them out at: http://education.state.mn.us/MDE/dse/early/ind/

### Webbing “Curriculum”
Defining “Curriculum”

“Curriculum is more than a collection of enjoyable activities. Curriculum is a complex idea containing multiple components, such as goals, content, pedagogy, or instructional practices. Curriculum is influenced by many factors, including society’s values, content standards, accountability systems, research findings, community expectations, culture and language, and individual children’s characteristics.”

“The Head Start Program Performance Standards define curriculum as a written plan that is based on sound child development principles, is consistent with Program Performance Standards overall, and includes:

- Goals for children’s development and learning;
- Experiences through which children will achieve the goals;
- Roles for staff and parents to help children to achieve these goals; and
- Materials needed to support the implementation of a curriculum.”

Choosing a Preschool Curriculum by the National Center on Quality Teaching and Learning for the Office of Head Start, available online at https://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/docs/preschool-curriculum.pdf

“A set of written materials caregivers/early educators use to develop engaging learning experiences for young children that include:

1) A research basis or philosophy that describes how children learn and how teachers teach
2) Goals and objectives of children’s learning
3) Instructional approaches used to help children achieve the goals and objectives
4) Information about the setting and environment in which learning happens
5) Examples of learning experiences for young children”

The Parent Aware definition of curriculum is available online at http://parentaware.org/content/uploads/2018/02/PA-014-Curriculum-Nomination-Form-and-Guide-JANUARY-2018-FINAL.pdf

“The curriculum consists of the knowledge and skills to be acquired in the educational program as well as the plans for experiences through which children’s learning will take place.”

Developmentally Appropriate Practice in Early Childhood Programs, NAEYC (2009) p. 42.

“Curriculum – the knowledge and skills teachers are expected to teach and children are expected to learn, and the plans for experiences through which learning will take place.”

“Curriculum in early childhood is defined as an organized framework that includes three components:

- Content—This component is the subject matter of the curriculum, the goals and objectives of children’s learning.
- Processes—This component is the pedagogy of learning, how teachers teach, and the ways in which children achieve goals and objectives of the curriculum.
- Context—This component is the setting, the environment in which learning takes place.”

Benefits of Using a Curriculum

Approaches to Curriculum

**Integrated Curriculum** - An integrated curriculum encourages young children to transfer knowledge and skills from one subject to another while using all aspects of their development. Most early childhood curriculum is highly integrated as young children tend to learn in undifferentiated ways.

**Project Approach** - A project is an in-depth investigation of a topic worth learning about. Programs using a project approach encourage individual children, small groups, or whole groups to engage in projects by applying their skills, asking questions, making decisions and choices, and assuming responsibility. Projects may last a few days or for an extended period of time. Learning in all domains is addressed as the project unfolds.

**Emergent Curriculum** - Emergent curriculum develops out of the interests and experiences of the children. Teachers and children work together to decide what to do when and how to do it.

**Inclusive Curriculum** - An inclusive curriculum underscores the importance of individual differences, special needs, and cultural and linguistic diversity among young children. An inclusive curriculum is for all children, not just for children with identified special needs.

**Anti-Bias Curriculum** - An anti-bias curriculum actively challenges prejudice, stereotypes, and unfair treatment of an individual or group of individuals. Curriculum that is anti-bias values differences and similarities among children, is sensitive and respectful of children’s differing backgrounds and cultures, and encourages children to explore their strengths as they develop to their fullest potential.
Theme-based Curriculum - Thematic curriculum focuses on one topic, or theme, at a time. A theme is usually a broad topic such as “seasons” or “the environment”. Theme-based curriculum typically uses an integrated approach in which all domains are addressed in activities related to the theme’s topic.

Montessori - Montessori programs are based on the ideas, materials, and methods developed by Dr. Maria Montessori, one of early childhood education’s pioneers. Montessori programs are known for the use of child-sized and carefully arranged materials. Children in Montessori programs choose their own work and often work independently. Montessori materials are often designed to be self-correcting and to teach very specific skills. There is variation among Montessori programs and many early childhood programs use some aspects of the Montessori approach.

Reggio Emilia - Reggio Emilia is a small area in northern Italy which has become well known for its approach to programs for young children. Programs using an approach inspired by Reggio Emilia often use projects that emerge from the interests of the children as a catalyst for learning. Teachers in these programs are careful observers of children and support children in documenting what they know and discover in their work. Children use visual representation – drawing, sculpture, dramatic play, and writing as the language that shows their development.

Bundled Curriculum – Some programs use two or more curriculum packages, each designed for one content area. These programs “bundle together” multiple packages to foster development across all domains. For example, a program may combine an early math curriculum and an early literacy curriculum with activities selected by the program to address all domains of development.

Domains of Development—MN Early Childhood Indicators of Progress

<table>
<thead>
<tr>
<th>Social and Emotional Domain</th>
<th>Language, Literacy, and Communications</th>
</tr>
</thead>
<tbody>
<tr>
<td>With trusting relationships as a foundation, social-emotional skills include Self/Emotional Awareness, Self-Management, and Social Understanding and Relationships.</td>
<td>Beginning in the first months of life, skills necessary for receiving and expressing ideas and information including verbal, nonverbal, gestural, emergent reading, and written language.</td>

<tbody>
<tr>
<td>The awareness of identity within the context of community. Components include: Community/People/Relationships, Change over Time, Environment, Economics, and Technology.</td>
<td>The development of gross motor and fine motor skills. Gross motor skills include those that involve the use and coordination of large muscles – neck, trunk, arms, and legs. Fine motor skills involve the use and coordination of small muscles such as mouth, hands, eyes, and feet.</td>
</tr>
</tbody>
</table>
### Scientific Thinking Domain

The mental activity and processes such as thinking, inquiry, exploration, observation, and processes that lay the foundation for deeper ways of thinking. This domain includes Discover, Act, Integrate,

### Mathematics Domain

Skills that develop from a very young age, including a sense of patterns, numbers, and space. Developed through interactions with others and the world around them, this domain includes: Number Knowledge, Measurement, Patterns, Geometry and Spatial Thinking, and Data Analysis.

### The Arts Domain

The development of skills that enable children to explore a variety of ways to be creative and express themselves. This domain includes: Exploring the Arts, Using the Arts to Express Ideas and Emotions, and Self-Expression in the Arts.

### Approaches to Learning Domain

Traits that children develop to become successful learners. This domain includes: Curiosity, Engagement, Persistence, Inventiveness, and Organizing Information.

Reflection: **What are some of the things you have learned about curriculum? How do you plan to use the new information you have learned in your work with children?**
Session A – Assignments

1. Curriculum Investigation

With the instructor decide on one of the following curriculum approaches (1 or 2) or commercially-produced curriculum packages to investigate. Download the article *Different Approaches to Teaching: Comparing Three Preschool Programs* by Amy Sussna Klein, available online at [http://www.earlychildhoodnews.com/earlychildhood/article_view.aspx?ArticleID=367](http://www.earlychildhoodnews.com/earlychildhood/article_view.aspx?ArticleID=367) as part of the assignment. Look over your assigned curriculum or approach and fill out the Investigation Worksheet. Bring your completed worksheets to the next class.

<th>Component</th>
<th>Doing Now</th>
<th>Using ECIPs as a foundation, how will you adapt/adjust?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Time</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• There is a daily schedule that fits with the ages of children served.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The daily schedule includes blocks of time for child-directed play. The schedule has a balance of child-directed and teacher-directed activities</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• There is time for care routines such as meals, naps, etc.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The daily schedule reflects the understanding that children learn and develop during all activities, including routines.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Space – the Environment</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The use of the environment reflects learning across all domains.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The environment includes areas for children to play alone and in small groups.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The environment is arranged to support children’s growing independence.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Children’s art is respectfully displayed.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The environment reflects children’s lives, their interests, their culture, and the diversity that exists within the community.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Materials
- There is a variety of materials available for children.
- The materials are appropriate to the ages and abilities of the children in the program.
- The materials reflect all domains.
- The materials are multicultural and reflect diversity.

### Activities
- The activities offered fit the ages and abilities of the children in the program.
- The activities address all domains of development.
- The activities can be adapted easily to meet individual children’s needs.
- There are activities planned for child-directed play, small groups, and whole groups.
- The activities encourage children’s active involvement in learning – movement and hands-on activity rather than passive activities.
<table>
<thead>
<tr>
<th>Teachers—Interactions, Guidance, etc.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Caregivers or teachers are actively involved in planning and implementing curriculum, interacting with children, and supporting learning.</td>
</tr>
<tr>
<td>• The interactions between adults and children create a positive climate that is responsive to children’s needs and matches the level of support needed at the ages of the children in the program.</td>
</tr>
<tr>
<td>• The interactions between adults and children allow for variation based on culture, language, and children’s varying needs.</td>
</tr>
<tr>
<td>• The interactions between adults and children support children’s growing independence.</td>
</tr>
<tr>
<td>• The interactions support development of children’s language and critical thinking skills using extended conversations, open-ended questions, and other instructional strategies.</td>
</tr>
</tbody>
</table>

</tr>
<tr>
<td></td>
<td>• The curriculum requires or allows for materials that are multicultural and reflect diversity.</td>
</tr>
<tr>
<td></td>
<td>• The curriculum supports materials that are found in the natural world as well as purchased materials.</td>
</tr>
</tbody>
</table>
**Activities**

- The curriculum describes activities that fit the ages and abilities of the children in the program.
- The curriculum’s activities address all domains of development.
- The curriculum’s activities can be adapted easily to meet individual children’s needs.
- The curriculum includes activities for child-directed, small group, and whole group activities.
- The curriculum’s activities encourage children’s active involvement in learning—movement and hands-on activity rather than passive activities.
**Teachers—Interactions, Guidance, etc.**

- The curriculum describes the role of the teacher in implementing curriculum, interacting with children, and supporting learning.
- The curriculum describes interactions that are responsive to children’s needs and matches the level of support needed at the ages of the children in the program. For example, the curriculum for infants describes responsive caregiving and the importance of relationships.
- The interactions described in the curriculum allow for variation based on culture, language, and children’s varying needs.
- The interactions described in the curriculum support children’s growing independence.
- The interactions support development of children’s language and critical thinking skills using extended conversations, open-ended questions, and other instructional strategies.

**Notes:**

**Reflection:** What have you learned about curricular packages? How do you plan to take what you have learned about curriculum for infants and toddlers?
Session B: Assignment

2. Look at your own curriculum (or planning process). Choose TWO activities from your plan that you did not examine in this session and TWO ECIP domains. On your own, review each of the activities, looking for ways you might support each of the two ECIP domains. Choose specific indicators and link them to the activity. Write down how each of the activities provides an opportunity to support the two indicators. Now take it one step further: What if you had a child in your group with motor challenges? Or verbal challenges? How would you adapt the activity?

When you finish, you will have notes similar to those in the following example (this is only an example—choose your own activity and domains/indicators):

<table>
<thead>
<tr>
<th>Activity: small group patterns</th>
<th>ECIP domain and indicator:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Mathematics: Identify one indicator that the activity will support.</td>
</tr>
<tr>
<td></td>
<td>Scientific Thinking: Identify one indicator that the activity will support.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Activity: hospital in dramatic play</th>
<th>ECIP domain and indicator:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3. ** Remember to bring your lesson plan examples to the remaining sessions.

4. Print out and bring to the next session: Copies of ECIPs resource handout, “Practice Brief 7: Using the ECIPs in Lesson Plans.” Find at: [http://education.state.mn.us/MDE/dse/early/ind/](http://education.state.mn.us/MDE/dse/early/ind/) Scroll down to “Practice Briefs.”
Session C

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota’s KCF: Content Area II: Developmentally Appropriate Learning Experiences

CDA Content Area 5: Managing an Effective Program

Learning Objectives
- Explore how to build a curriculum that meets MN criteria.
- Build curriculum-based lesson plans that intentionally reflect ECIPs.
- Use the ECIPs to identify opportunities for math and literacy/language/communication skill development.

Objetivos de aprendizaje
- Descubra cómo construir un currículo que cumpla criterios de MN.
- Crear planes de lecciones basados en un currículo que reflejan intencionalmente los ECIPs.
- Utilice los ECIPs para identificar oportunidades de desarrollo de habilidades matemáticas y alfabetización/lenguaje/comunicación.

Session C: Assignment

Watch 2 or 3 children in dramatic play. Write down 3–4 notes about their play (identifying which child you are writing about using only initials). Use specific descriptions and quotes, but do not evaluate (simply report what happened). What props are they using? What are they saying? What words are they using? What plot are they playing out? What are they learning? Bring your notes to the next class where we will discuss your observations.

** Remember to bring your sample lesson plans to the final session.
Knowledge and Competency Framework (KCF) Content Area, MN Core Competency Content Area, and CDA Content Areas

The Primary Knowledge and Competency Content Areas, the MN Core Competencies Content Area, and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

**Minnesota’s KCF:** Content Area IV: Assessment, Evaluation, and Individualization

**CDA Content Area 7:** Observing and recording children’s behavior

**Learning Objectives**

- Demonstrate the ability to develop or adapt activities based on authentic assessment data
- Describe program enhancements that reflect children’s identity, culture, and the diversity of the community

**Objetivos**

- Demostrar la capacidad de desarrollar o adaptar actividades basadas en datos de la evaluación auténtica
- Describir mejoras de programa que reflejan la identidad de los niños, la cultura y la diversidad de la comunidad

</tbody>
</table>
| A caregiver notes that Minh rarely answers questions during group book-reading time. The caregiver’s notes indicate that in the past week, Minh has only responded to two questions during a group time—one about his pet and one about his family’s new car. | - Plan to ask more questions directed to Minh specifically during group time  
- Plan to engage Minh in conversations during non-group times to understand his language abilities  
- Plan to ask Minh’s family about his language during family gatherings, with friends or siblings, or other groups Minh is in. |
| A caregiver records the following exchange between two children in the dramatic play area:  
Sue: “I go’d to the new pizza store last night.”  
John: “Cool, I want to go too.”  
Sue: “Do you have enough money?”  
John: “I have two cents!” |  |
| A caregiver records the number of visitors to each of the learning activities in her environment during one day each week for three weeks. She notices that the writing table gets very few visitors, only 2 per day on average. |  |
A caregiver notices during a counting activity that one child, Maria, always counts as many as 30 objects accurately. She also often helps other children count above 20 when playing board games.
The Cycle of Curriculum, Assessment, and Teaching

ASSESSMENT

CURRICULUM

IMPLEMENTING
CURRICULUM –
TEACHING

PLANNING
Sam is nearly four years old. During free play Sam and a four-year-old friend are playing a game with picture cards and dice with dots. In the game 25 pairs of picture cards are placed face down (picture not showing) on the table. One child rolls the die and can turn over the number of cards indicated by the total number of dots on the 2 die. If any of the cards are matching pairs the child find the pairs and “wins” those cards. Play continues with the two children alternating turns until all cards are matched.

On the first turn Sam rolls a one and a three on the die. Sam counts the dots and turns over four cards. Sam is able to quickly find one match among the cards. On his next turn Sam rolls a four and a four. Sam counts one dice and then hesitates, looking at the other dice. Sam turns over four cards, then counts the other dice and turns over four more cards.

Play continues this way until all of the matches are made. Sam and his friend alternate turns each time with no conflicts. Each time Sam roles the die and the total is more than 5 or 6, Sam uses the strategy of counting each dice separately. He does not count the two die and develop one number for the sum of the two die. (He does not “count on” which means counting up from a number. For example, if the first dice has “2” and the second dice has “3”, he counts the first “two” and goes on from there to three four five, rather than starting over at 1.)

Based on what you know about Sam from this short observation, complete the following chart.

<table>
<thead>
<tr>

### Reflecting Identity, Culture, and Diversity in Curriculum
Portfolio Assignment

“RC I-3: A sample of your weekly plan that includes goals for children’s learning and development, brief descriptions of planned learning experiences, and accommodations for children with special needs (whether for children you currently serve or may serve in the future). Indicate the age group(s) for which the plan is intended.”

“Competency Statement I, CS I: reflect on the weekly plan you included in your resource collections (RC I-3). How does this plan reflect your philosophy of what young children need on a weekly basis? If the plan was not designed by you, what do you see as its strengths and/or what would you change?”

Write a paragraph on how you will use or adapt your curriculum to meet the needs of the children in your program. Include work you have done and ideas you have learned during the Curriculum class. (Think about each child’s culture and identity, age, abilities, stages of learning, interests, etc.).
Prácticas del programa que respaldan las relaciones
Clase 26
2 horas

Descripción general de la clase 26
Área de contenido del Knowledge and Competency Framework (KCF), Área temática del CDA, Indicadores de capacitación de Parent Aware

Las áreas de contenido del Knowledge and Competency Framework, las áreas temáticas de CDA y (según corresponda) los indicadores de entrenamiento de Parent Aware se enumeran aquí para ayudar a los participantes a comprender qué competencias, áreas de contenido y / o indicadores se abordan en la capacitación.

KCF Content Area Ila: Creating Positive learning Experiences

CDA Content Area II: Steps to advance children’s physical and intellectual development (Infant Toddler Edition)

Objetivos de aprendizaje:
Si bien ningún entrenamiento por sí solo puede garantizar los objetivos de aprendizaje, se pueden diseñar para cumplir con ciertos objetivos para cada alumno. Si los alumnos participan, aprenderán a:

- Objetivo 1: Identificar el impacto de las políticas del programa en la relación de apego entre el cuidador y el niño
- Objetivo 2: Diseñar estrategias para abordar las barreras a la atención receptiva en relación con el tamaño del grupo, la atención primaria, la continuidad de la atención y las agrupaciones de edades mixtas

**Reflection:** How did providing individualized care improve the quality of care you provided to this child?
GLOSARIO

Apego: "una relación personal específica que se desarrolla entre un bebé y el cuidador a través del cuidado físico y emocional regular, considerado esencial para la supervivencia, así como para el posterior desarrollo físico y mental". (Gervai, 2009 de Bowlby, 1969). Cuando con el tiempo se forma un vínculo seguro entre el niño y el cuidador, el niño lo utiliza como una base segura desde la cual explorar y como una fuente de seguridad y comodidad cuando sea necesario.

Continuidad de la atención: el concepto de continuidad de la atención se refiere a la política de asignar un maestro de cuidado infantil primario a un bebé en el momento de la inscripción en un programa de cuidado infantil (generalmente en el centro) y continuar esta relación hasta que el niño tenga tres años o abandona el programa. En el cuidado infantil familiar esto generalmente es un hecho.

Grupo de edad mixta: ambiente donde los bebés, los niños pequeños y los niños en edad preescolar se agrupan y, con pocas excepciones, interactúan entre sí la mayor parte del día. El cuidado infantil familiar generalmente se configura en este formato. Los grupos mixtos de edad en los centros son raros.

Atención primaria / cuidado: en un sistema de atención primaria, cada niño es asignado a un maestro especial de cuidado infantil que es principalmente responsable de la atención de ese niño. Esto ocurre naturalmente en los entornos de cuidado infantil familiar.

Rutinas: actividades diarias repetidas. En este caso, nos enfocamos en las rutinas de cuidado de la alimentación, cambio de pañales / uso del baño, siestas; y llegadas y salidas.

Grupos pequeños: el tamaño del grupo es lo suficientemente pequeño para que el cuidador o los cuidadores puedan prestarle atención y cuidado a cada niño. Cuanto más joven es la edad, más pequeño es el grupo. PITC recomienda proporciones de atención primaria de 1: 3 o 1: 4, en grupos de 6-12 niños, según la edad.

Here is a link to the Minnesota Department of Human Services website, where you will find information on licensing regulations for child care centers and family child care homes:

https://mn.gov/dhs/ (Search for: child care licensing)
PITC’s Six Program Policies

**Primary Care**

In a primary care system, each child is assigned to one special infant/toddler care teacher who is principally responsible for that child’s care. When children spend a longer day in care than their primary infant/toddler care teacher, a second infant/toddler care teacher is assigned to be the primary relationship. Each child should have a special infant/toddler care teacher assigned to him or her at all times during the child care day. Teaming is also important. Primary care works best when infant/toddler care teachers team up and support each other and provide a back-up base for security for each other’s primary care children. Primary care does not mean exclusive care. It means, however, that all parties know who has primary responsibility for each child.

**Small Groups**

Every major research study on infant and toddler care has shown that small group size and good ratios are key components of quality care. PITC recommends primary care ratios of 1:3 or 1:4, in groups of 6–12 children, depending on the age. The guiding principle is this: the younger the child, the smaller the group. Small groups facilitate the provision of personalized care that infants and toddlers need, supporting peaceful exchanges, freedom and safety to move and explore, and the development of intimate relationships.

**Continuity**

Continuity of care is the third key to providing the deep connections that infants and toddlers need for quality child care. Programs that incorporate the concept of continuity of care keep primary infant/toddler care teachers and children together throughout the three years of the infancy period, or for the time during that period of the child’s enrollment in care.

**Individualized Care**

Following children’s unique rhythms and styles promotes well-being and a healthy sense of self. It’s important not to make a child feel bad about him or herself because of biological rhythms or needs that are different from those of other children. Responding promptly to children’s individual needs supports their growing ability to self-regulate, i.e., to function independently in personal and social contexts. The program adapts to the child, rather than vice versa, and the child gets the message that he or she is important, that her/his needs will be met, and that his choices, preferences, and impulses are respected.
**Cultural Continuity**

Children develop a sense of who they are and what is important within the context of culture. Traditionally, it has been the child’s family and cultural community that have been responsible for the transmission of values, expectations, and ways of doing things, especially during the early years of life. As more children enter child care during the tender years of infancy, questions of their cultural identity and sense of belonging in their own families are raised. Consistency of care between home and child care, always important for the very young, becomes even more so when the infant or toddler is cared for in the context of cultural practices different from that of the child’s family. Because of the important role of culture in development, infant/toddler care teachers who serve families from diverse backgrounds need to:

1. heighten their understanding of the importance of culture in the lives of infants,
2. develop cultural competencies,
3. acknowledge and respect cultural differences, and
4. learn to be open and responsive to, and willing to negotiate with families about child rearing practices. In this way, families and infant/toddler care teachers, working together, can facilitate the optimal development of each child.

**Inclusion of Children with Special Needs**

Issues already embraced by the PITC—a relationship-based approach to the provision of care that is individualized, and a responsiveness to the child’s cues and desires to learn—is equally important for children with disabilities or other special needs. Infants who have responsive, enduring relationships develop emotional security, which gives them the foundation for becoming socially competent and resilient. Inclusion means making the benefits of high quality care available to all infants through appropriate accommodation support in order for the child to have full active program participation.

PITC Recommendations for Group Size, Ratios, and Amount of Space

<table>
<thead>
<tr>
<th>Same-Age Groups</th>
<th>Total Group Size</th>
<th>Square Feet Per Group*</th>
<th>Ratios</th>
</tr>
</thead>
<tbody>
<tr>
<td>Young Infants Birth – 8 months</td>
<td>6</td>
<td>350</td>
<td>1:3</td>
</tr>
<tr>
<td>Mobile Infants 6 – 18 months</td>
<td>9</td>
<td>500</td>
<td>1:3</td>
</tr>
<tr>
<td>Older Infants 16 – 36 months</td>
<td>12</td>
<td>600</td>
<td>1:4</td>
</tr>
</tbody>
</table>

Note: Another acceptable option is the Early Head Start program model with ratios of 1:4 in a group size of 8 for children from 0-36 months of age. This arrangement supports continuity of care as ratios and group size remain constant for the first three years of life. Groups may be of same-age or mixed-age children.

* Primary groups should have no more than two infants under 2 years of age.
** The space guidelines represent recommended standards of square footage per group; the amounts shown do not include space used for entrance areas, hallways, diapering areas, or napping areas.

PITC Recommendations for Creating Small, Self-Contained Groups

1. Create separate groups of children in rooms with floor-to-ceiling walls.
2. Assign no more than 6-12 children to a room, depending upon the age of the children.
3. Maintain age-appropriate ratios of three or four children to a primary caregiver throughout the day.
4. Provide facilities for caregiving activities including feeding, toileting, and sleeping in each room.
5. Include a self-contained outdoor play space for each group with direct access from the room.

Developed by Sheila Signer and Alicia Tuesta. © 2004, WestEd, The Program for Infant/Toddler Care. This document may be reproduced for educational purposes.
Ways to Provide Continuity of Care

Option One
A same-age group stays in the same environment

- Modify the environment to adapt to developmental changes of the children.
- Change furniture and equipment to fit the children’s growing size and activity level.
- Store or use elsewhere furniture and equipment not currently in use (cribs, indoor climbers, small chairs and tables).
- Convert the infant nap room to a 2-year-old play space as children grow into the older infant stage.
- Install low sinks and toilets in every room for (eventual) toilet learning.
- Replace any children who leave the group with a child of the same age range.

Option Two
A same-age group moves to a different room as the children grow and their interests and abilities change.

- The oldest group of children leaves the program, making room for younger children to move up.
- When infants move to the next room, replace them with a new group of babies.
- Allow time and patience for children and adults to adjust to a new room.
- Allow infant/toddler care teachers and children to move favorite items with them to the new environment.
- Add new children (or another primary group) to the room as children grow older and ratios and group size recommendations change.
- If necessary, move one primary group of children and teacher, rather than the whole group.
- As a temporary measure, if necessary, move the primary care group with a secondary teacher who has developed a close relationship with them.

Option Three
A mixed-age group remains in the same environment

- Environments must be flexible enough to accommodate young, mobile, and older infants at one time.
- Infant/toddler care teachers are trained to work with a mixed-age group, along with learning about the different stages of development.
- Children within the group may be divided into same-age primary care groups or mixed-age primary care groups.
- Children who leave the group may be replaced by a child of any age within the age range of the group.
- A child of similar developmental level can fill an opening in a mixed-age group of active toddlers. It isn’t required that the opening be filled by a young infant.

Developed by Sheila Singer. © 2007, WestEd. The Program for Infant/Toddler Care. This document may be reproduced for educational purposes.
STEPS PROGRAMS HAVE TAKEN TOWARD A POLICY OF CONTINUITY

- Develop infant care teacher competencies with different age children
- Promote increased professional pride through training
- Make supportive staff relationships a priority
- Train and support infant care teachers in their communications with parents
- Begin the changeover to continuity with one or two infant care teachers who are interested in “moving up” with children
- Expand the length of time children stay in a group, e.g., infants from the time of enrollment months to 2 years instead of moving them at one year
- Bring in new staff with the expectation of continuity
- Begin to purchase toys and equipment adaptable for mixed age groups or as children in a same age group
STEPS TOWARD...
Creating small groups in programs with too many children in one large room

1. If possible, divide a large room into separate rooms for 6-12 children each, using floor-to-ceiling walls.

2. If the room cannot be divided completely with floor-to-ceiling walls, create self-contained areas with partial walls at least 4 feet high.

3. Provide space and equipment in each separate room or self-contained area for play activities and all caregiving routines.

4. Continue to work toward the goal of self-contained rooms with floor-to-ceiling walls.

STEPS TOWARD...
Improving intimacy in large group environments that cannot currently be divided to create small groups

1. If the room cannot be divided either with floor-to-ceiling or partial walls, use furniture, such as a couch or toy shelves, risers, or portable dividers, to create mini-environments that offer opportunities for solitude, concentrated exploration, and intimate interactions between caregivers and children and among the children.

2. Encourage children to spread out in the space by providing a variety of engaging play options in different parts of the room.

3. Have caregivers disperse themselves into different areas of the room so that children will move to separate areas to be near their primary caregiver.

4. Make mealtimes intimate by using small tables with three or four children and one caregiver at each table.

5. Stagger feeding times to create smaller groups and a more peaceful tone.

6. Lower the noise level by using allergen-free sound absorbing materials, such as carpets, fabric wall hangings, and stuffed furniture.
7. Continue to work toward the goal of self-contained rooms with floor-to-ceiling walls.

STEPS TOWARD...
Creating small groups in outdoor play spaces

1. If possible, divide a large outdoor space to create self-contained outdoor play spaces for each group with direct access from their room.

2. If the outdoor space cannot be divided, provide protected play spaces for infants and toddlers, using tires or short wooden posts, grass, hills, outdoor carpeting, an empty wading pool, etc. to define and separate areas.

3. Offer engaging activities both indoors and outdoors so that children voluntarily disperse themselves between the two environments.

4. When outdoor space is very limited and each group does not have its own yard, use a modified free indoor/outdoor access plan, limiting the number of children in the play yard at any one time, although they may come from different groups.

5. Continue to work toward the goal of self-contained outdoor play spaces for each group with direct access from their room.

Example:

Working Toward Small Groups: A PITC certified trainer, Ni Hui, is manager of a new infant/toddler program for 24 children. The facility consists of one large room, about 2,400 square feet, which could comfortably accommodate three groups of eight children each, if it were divided into separate rooms. There is a very limited budget for modifications, and Ni Hui has decided to spend most of it on plumbing, installing sinks in all three areas and two small toilets in the older infant area. She is determined to find the funding to build full walls to divide the room into three separate spaces, but she knows she can't do everything at once. She begins by purchasing inexpensive accordion-type room dividers to create three separate areas. The dividers prevent visual over-stimulation, but they don't block noise, so she asks local businesses and civic clubs to donate sound absorbers, including carpeting, fabric for the walls, and soft furniture. She spends the remainder of her budget on furniture, toys, and equipment, investing in a few high quality products and supplementing these items with homemade toys and books as well as used toys that are still in good condition.
Homework:

For center based people: Look at your own program and practices related to continuity of care, primary care and small groups. For family child care: look at your own program and practices related to mixed age grouping, continuity of care and small groups. Write down one thing you do to support each of these policies. If your program does not follow one of the policies (continuity of care, primary care or small groups), write down one change they could make that would be a step closer to the policy.

Session A

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

Minnesota’s KCF Content Area VI: Professionalism

CDA Content Area VI: Maintaining a commitment to professionalism

Learning Objectives
- Create a daily schedule for one age group (i.e. toddler, preschool)
- Develop a weekly lesson plan that includes activities and materials for children at various developmental levels
- Define elements necessary for an effective, supportive early childhood environment that encourages growth and learning

Objetivos de aprendizaje
- Crear un horario para un grupo de niños (niños pequeños o preescolares)
- Desarrollar un plan de lecciones semanal que incluye actividades y materiales para niños en distintos niveles de desarrollo
- Definir los elementos necesarios para un ambiente de educación temprana positiva, que fomente el crecimiento y el aprendizaje de todos los niños.

Bring to this class:
1. Your CDA portfolio.
2. Bring to class the Parent Aware Environment Self Assessment (ESA) tool that you have used and completed:
   - ESA: Licensed Family Child Care
   - ESA: Licensed Child Care Center-Infant and Toddler
   - ESA: Licensed Child Care Center-Preschool
Individual Perceptions

What additional small things can you do to raise and maintain the level of quality in your program every day?

Using the recent brainstorm session and categories below, list 3 new things you can start to do every week to enhance the quality in your family childcare home or classroom:

<table>
<thead>

</table>

**Considerations:**

- What is working with the current lesson plan?
- What are the challenges associated with the current lesson plan?
- What will happen every day, bi-weekly, or weekly?
- Quiet, neat, loud, and messy spaces
- Active vs. less active experiences
- Outdoor play
- Transition times
- Child-choice and teacher-directed activities/experiences
- Physical, social-emotional, language, and cognitive development
- What are the objectives for the activities?
- How am I communicating information with families?
Daily Schedule
Remember to Consider:

- Ages of children
- Developmental abilities and attention span
- Transitions and routines
  - Large-group, small-group, and individual activities
  - Rest time

- What about the current daily schedule is working?
- What are the challenges of the current daily schedule?

- Snacks and meals
- Outdoor play
- Child-choice opportunities
Session A – Homework

Plan a 5-minute presentation about one of the 28 courses of the MNITCDA. Choose one of the 28 courses to talk about and share at least one idea from that session and why by answering one of the following questions:

1. Choose one of the courses that was meaningful for you. Describe what stood out the most and why it applies to your work with children and families (perhaps an “aha moment”). Link what you share to at least one concept form that session.

2. Choose one of the courses that was meaningful for you. Describe how it inspired you to think of an infant or toddler in your life (past or present) that you wish you could apply the info to and why. Link what you share to at least one concept form that session.

We encourage you to use concrete materials or a story as part of what you share. For example, you could bring a photo or video (with parental permission of course), a toy, a story of one child or one moment, etc.
Session B

Knowledge and Competency Framework (KCF) Content Area and CDA Content Areas
The Primary Knowledge and Competency Content Areas and the CDA Content Areas are listed here to help participants understand what competencies, content areas and/or indicators are addressed in the training.

KCF Content Area VI: Professionalism

CDA Content Area (Infant Toddler Edition):
Standard VI: To maintain a commitment to professionalism.

Learning Objectives:
While no training alone can ensure learning objectives, they can be designed to meet certain goals for each learner. If learners are engaged and participatory they will learn to:

- Objective 1: Review key concepts covered throughout the sessions
- Objective 2: Share key ideas learned
- Objective 3: Plan next steps for individual professional growth

Objetivos de aprendizaje
- Demostrar prácticas y conocimientos básicos sobre la educación temprana
- Identificar metas para completar el portafolio del CDA
<table>
<thead>
<tr>
<th>Time (for each section)</th>
<th>Section Overview – Key Concepts</th>

</table>
| 25 minutes             | Professional learning opportunities including:  
  • CDA: next steps  
  • Eager to Learn/MnCPD etc  
  • IECMH certificate & courses  
  • 2 year colleges  
  • Resources: ECIPS, Core Comps  
  • MN Child Care Credential | • Large group presentation on opportunities for further learning and information  
• Q & A  
• Small groups or pair and share: 5-10 minute discussion about which they are interested in and why |
| 20 minutes             | Reflection and setting a professional goal | • Individual reflection using handout |
| 15 minutes             | Closing circle: Inspirational quote | • Circle share: choose a quote to share one of the quotes from the first session and explain why it inspires you in your work with infants, toddlers and their families  
• Portfolio Assignment |
Quotes from first session:

“Initially, views of one’s self and others develop in relationships.” (K. Johnson)

“From birth, children develop a sense of who they are. Relationships with family members, other adults and children, friends and members of their community play a key role in building their identities.” (National Council for Curriculum and Assessment, Ireland)

“Early relationships are vital to brain development because they help wire the brain to trust others, to love, and to feel safe and secure.” (CSEFEL)

“The motivation to learn language is social. Therefore it is rooted and nurtured in relationships.” (Kubicek)

“Infants learn best through imitation and exploration in the context of secure, limited stress relationships.” (Lally)

“Quality of care ultimately boils down to the quality of the relationship between the child care provider or teacher and the child.” (Shokoff & Phillips, 2000)

“All early learning and development occurs within the context of relationships.” (various)

Portfolio Assignment

Complete this assignment for your portfolio

Competency Standard VI: To maintain a commitment to professionalism

CSV1: Competency Statement VI

CSV1: Begin you Reflective Statement about this Competency Standard with a paragraph describing how your professional practices meet this Standard. Then:

CSV1a: Reflect on why you chose to become an early childhood professional.

CSV1b: Reflect on what you believe are the most important indicators of professionalism that you possess.

Bring portfolio to session C. Bring the following 2 handouts: “My MNITCDA Assignments” and “Everything You Wanted to Know About the CDA”
Class 28 Handout: Goals for Growing

Head: I want to know more about....

Resources I can use (places, people, reading/writing/watching)....

Heart: I feel.....

Feet: I want to move forward by.....

Reflective Questions

Articulation Questions
- How do you integrate families into the program?
- How are you or your program, involved in the community?
- How do you continue to grow yourself as a professional?
- What do you do to maintain strong program-home connections?
- If my child refuses to participate with the group, how will you handle that?
- Tell me how you promote language development in your program.
- Tell me how you promote physical development in your program.
- How do you promote social-emotional development and interactions in your program?
- What is your curriculum style?
- How are children assessed in your program and what is done with that information?
- Why do the children seem to play all day? When do they learn?
• When will you teach my child to read?
• How do I know if my child is ready for kindergarten?
• Tell me about your program.
• Some of the other children seem more advanced than my child, should I be worried?
• I keep hearing about developmentally appropriate practice, what does that exactly mean and how does it affect my child?
• My baby needs to be held all the time, you can accommodate that right?
• Why does my child’s art always look like a mess of colors?
• Describe the development and skill acquisition that happens in each learning area.
• What is a learning domain?
• Why is early childhood education an important field or profession?
• What do you look for in a program and/or curriculum to ensure it is developmentally appropriate?
What was your biggest challenge in obtaining this credential and how did you overcome it?

What community resources have you connected with and how are you utilizing that connection?

In what topic or area have you experienced the most development and growth? How are you translating that growth into everyday practice?

What topic (or area) will you continue to pursue professional development in? Why?
What were your biggest successes while obtaining this credential?
Professional Philosophy Statement

No more than two pages in length.

Your philosophy statement is a personal reflection of your thoughts on the purposes of education, as well as your educational beliefs, ideals and values, based on self-reflection and soul-searching. It should detail your beliefs about how children develop and learn, and what and how they should be taught.

</tr>
<tr>
<td>CS 1b: Reflect on the room environment in which your Observation will occur:</td>
<td>How does the room design reflect the way you believe young children learn best? If the room was not designed by you, what do you see as its strengths and/or what would you change?</td>
<td>For Center-Based Infant/Toddler: Additionally, reflect on and describe the similarities and difference between safe, sanitary environments and welcoming environments</td>
<td>Play Session C</td>
</tr>
</tbody>
</table>

Write 3-5 sentences describing how your environment is “homelike” and reflects the cultures of the children in your program, as well as children of other cultures. You may also add a sentence or two about how your schedule provides balance (time for play, outdoor and indoor time, quiet and active time). | Child Development Session B |
room environments designed for infants as compared to toddlers.

CS Ic: Reflect on the weekly plan you included in your resource collections (RC I-3). How does this plan reflect your philosophy of what young children need on a weekly basis? If the plan was not designed by you, what do you see as its strengths and/or what would you change?”

Write a paragraph on how you will use or adapt your curriculum to meet the needs of the children in your program. Include work you have done and ideas you have learned during the Curriculum class. (Think about each child’s culture and identity, age, abilities, stages of learning, interests, etc.).

Over the next week during play time, observe the play spaces in your program. What do children learn/practice while playing there? How does the room design help them to learn? How do the materials help children learn? Is there anything you would you change in the environment (think of space and materials) to better support children's learning while they play in this area?

Observe children’s play in one specific learning area. How do the children play? Do they play alone or with another child? Choose two caregiver interaction strategies and use them to support their play. How did your chosen interactions help children learn while playing? Bring your notes for our next session.

Write a paragraph on how you will use or adapt your curriculum to meet the needs of the children in your program. Include work you have done and ideas you have learned during the Curriculum class (think about culture and identity, different ages, abilities and stages of learning, interests, etc).

Describe how your room environment, including materials in that environment helps children learn through play.

This week, your practice assignment is about beginning the curriculum planning cycle. You are going to work on the first two parts: observe/document and reflect/analyze. Here is your task:
1. Choose one child (an infant or toddler if possible) to observe. Decide if you want to observe in one area of development (for example language/communication, movement, relationships, etc.) or if you want to do a general observation.
2. Decide how you are going to document your observations (remember for photos or recordings you need parental permission first). Simple notes are fine, just remember to include specific details.
3. Observe the child once a day (if possible at different times of day and in different locations) at least 3 times.
4. Reflect on what you saw. Use the questions on the “Curriculum Cycle” handout to think about what you think it means and write at least one sentence per observation.

Selecting “Active Supervision”: Identify five (5) playground-specific risks for injury and supervision challenges you would anticipate for toddlers playing on a playground. Provide a supervisory activity which could minimize risk of injury and reflect effective active supervision.

| F | Resource Collection Items II To advance physical and intellectual competence | Nine learning experiences (activities), written in your own words, including one from each of the following curricular areas: RC II-1: Science/Sensory, RC II-2: Language and Literacy, RC II-3: Creative Arts, RC II-4: Fine motor (please choose an indoor activity), RC II-5: Gross motor (please choose an outdoor activity), RC II-6: Self Concept, RC II-7: Emotional Skills/Regulation, RC II-8: Social Skills, RC II-9: Mathematics. For example, for RC II-1, Science/Sensory, you might write about an experience entitled “Smell Jars” and for RC II-6, Self Concept, you might write about an experience entitled “Self Portraits”. For each activity, indicate the age group (young infants, mobile infants or toddlers) and list the intended goals, materials and process/teaching strategies. For each activity specify how it is developmentally appropriate for that age group. | Language Development Session A/B Learning Through Discovery Safe Supervision A Cognitive Development Session B ECIPs Session A |
| G | Competency Statement II To advance physical and | CS IIa: Pick one of the nine learning experiences you chose for your Resource Collection (RC II). How does this experience reflect your philosophy | Play Session C |
intellectual competence of how to support young children’s physical development?

CS IIb: Pick another of the nine learning experiences you chose for your Resource Collection (RC II). How does this experience reflect your philosophy of how to support young children’s cognitive development?

CS IIc: Pick a third learning experience you chose for your resource collection (RCII). How does this experience reflect your philosophy of how to support young children’s creative development?

CSIIId: In an additional paragraph, describe ways to promote the communication/language development among all children including dual language learners.

Observe one child in your program a few times. Write down what you observe about that child’s behavior. Be as detailed and specific in your notes as you can. BRING your written observation notes to the next session.

Continue reviewing the ECIPs document; BRING any questions that surface.

Write 3-4 sentences about how “serve and return” helps children learn to communicate.

Write 2-4 sentences describing the learning concepts you observed while the child was playing. What did you share with the parent, and how did you continue to support the child’s learning?

Look at your own curriculum (or planning process). Choose TWO activities from your plan that you did not examine in this session and TWO ECIP domains. On your own, review each of the activities, looking for ways you might support each of the two ECIP domains. Choose specific indicators and link them to the activity. Write down how each of the activities provides an opportunity to support the two indicators. Now take it one step further: What if you had a child in your group with motor challenges? Or verbal challenges? How would you adapt the activity?

Watch 2 or 3 children in dramatic play. Write down 3–4 notes about their play (identifying which child you are writing about using only the following code: I=A, M=J, F=K).
| H | Resource Collection Items III  
To support social and emotional development and to provide positive guidance. | RCIII: Prepare a bibliography that includes the titles, authors, publishers, copyright dates, and short summaries of ten developmentally appropriate children’s books that you have used with young children. Each book should support a different topic related to children’s lives and challenges. Subjects you might consider addressing include:  
• Cultural or Linguistic Group Identity  
• Gender Identity  
• Children with Special Needs Separation/Divorce/Remarriage/Blended Families  
• Phases of the Cycle of Life from Human Reproduction to Death  
• other topics that reflect the children and families with whom you work. | Curriculum Session C |
**CSIIa:** Describe some of the ways you support the development of children’s positive self-concepts and growing social/emotional skills.

**CSIIb:** Reflect on your philosophy of guiding young children’s positive behaviors. How is your professional philosophy similar or different from how you were guided as a child? How do you constructively deal with young children’s challenging behaviors?

Think about how a positive climate and caregiver sensitivity can promote children’s EF skills. How do you use your skills as a sensitive caregiver to do this? What are some additional ways you can create or use a positive climate and sensitivity to promote children’s EF skills?

Choose 3 times this week to practice using the watch-ask-adapt process with a child in your program. Jot down:

- What cues the child gave you (what you notice when you “watch”) and what you think they are trying to tell you
- What you did to “ask” the child if this was what they were trying to tell you
- How did you respond and ways you might have “adapted” (changed what you did based on cues from the child)

Choose an infant or toddler to observe between now and next session. Notice & write down things you see the child doing as he/she works on security, exploration and identity (note 2-3 things they do in each area).

Write a few sentences on what infants and/or toddlers do as they explore their identity and how you (their caregiver) support them to feel good about who they are (their identity). (Applies to CDA Competency Statement IIIa)

Practice ‘serve and return’ activities: notice something the child initiates that you respond to (e.g. a smile, imitation of sounds, a game like peek-a-boo) and something that you initiate that the child responds to. Do this at least once a day. Write down the activity and who initiated it (you or the baby). Be sure to try these serve and return activities during daily routines such as diapering and feeding as well as during play.

Use the temperament scale to rate a child that you haven’t used for an assignment yet. Look at your own temperament chart. Think about:

<table>
<thead>
<tr>
<th>375</th>
</tr>
</thead>
</table>
Are there areas that may challenge the “goodness of fit?” Write down 2 strategies or things you want to try that you think will improve the “goodness of fit” (do this in class?) Between now and the next class, try your ideas.

This week, your practice assignment is to select one of the three circles we worked on today—child, family or caregiver—and continue to build on the ideas you had written down. Choose 2 ideas of actions that you can take to build resilience in either a child, family or yourself. Write them down, as well as how you intend to do them and build them in as part of your regular skills to promote resilience. Take notes each time you do them, including how you felt when you were doing them. Be prepared to discuss your experience at our next class.

---

J  Resource Collection
Items IV
To establish positive and productive relationships with families

RCV: Collect a Family Resources Guide that you might choose to share with the families you serve. The guide should include all of the helpful information you think they might need. At a minimum, you must include the following required items:

**RCIV-1:** The name and contact information (phone number, web site, etc.) of a local agency that provides family counseling.

**RCIV-2:** The name and contact information (phone number, web site, etc.) of a translation service for families whose home language is other than English as well as a service that provides American Sign Language translation.

**RCIV-3:** The name, contact information and brief descriptions of at least two agencies in the community that

---

Temperament and Self-Regulation

Resilience

All of IV is located in: Welcoming Children with Special Needs and Their Families, Session B
provide resources and serves for children with disabilities (in most communities, the local school district provides these services).

**RCIV-4**: A list of three or more websites, and brief descriptions of each, that provide current information to help families understand how young children develop and learn. Include one current article for each website. Websites must contain articles that help families understand the development and learning of 3- to 5-year-olds. At least one article must relate to child guidance.

| Welcoming Children with Special Needs and Their Families Session A |
| Welcoming Families: Creating Cultural Connections Session B |

| Children with Special Needs and Their Families Session A |
and/or gave you a new goal for professional growth.

Choose one baby or toddler and their family as your focus. Pay attention to what you do to greet the baby and family EACH DAY and what you do when the child and parent (or other family member who picks up/drops off) greet each other at the end of the day. After a few days, notice your routines and write down 2 new things you would like to do to welcome them when they arrive. Write down 2 new things you would like to do to help the parent (or other key adult) and child greet each other at the end of the day.

Set a time to talk with the person who regularly drops off and/or picks up the baby. Tell them you have been trying a couple of new ways to help families and children be more comfortable when they drop off and pick up their child. Describe what you tried and ask if they have any thoughts or anything else that would make the transitions easier.

Please also fill out “What is the Behavior Grid” in the Participant Guide (p. 92) on either a child who is in your care now or a child you know. Let’s take a few minutes now to get that started—please bring this to our next class and be prepared to share (without sharing any personal information that would identify the child, such as his or her name).

Ask one parent in your program about their child’s personality in terms of:
- Activity levels
- Approach to unknown people or situations
- General mood
- “Soothability” (how easily do they settle after being upset?)

Choose one day between your conversation with the parent and our next class to focus on this child. Notice how the parents’ description shows up in that child’s experiences throughout the day. Compare the parent’s description with your own observations of this child. How are your view of the child and the parent’s view similar? How are they different? Describe any new ideas or understanding this gives you about the child, the parent, or your own perspective.
Write 3-4 sentences about how discussing routines with families helps you improve a program/routine with children. (IVb)

<table>
<thead>
<tr>
<th>L</th>
<th>Resource Collection Items V To ensure a well-run, purposeful program that is responsive to participant needs.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Three samples of record keeping forms you use/have used. Include an accident report form, an emergency form and a completed tool/form that you have used to observe for and document a child’s developmental/learning progress (Do not include the child’s name).</td>
</tr>
</tbody>
</table>

Your first assignment is to gather one or more of the lesson plans you currently use in your program. Your lesson plan can be very simple; bring any kind of planning form you currently use. If you are not currently using a lesson plan, write down some of the activities you do during the day with the children. You don’t need a lot of details; just write down a sentence or two so you will remember the activity.
With the instructor decide on one of the following curriculum approaches (1 or 2) or commercially-produced curriculum packages to investigate. Download the article *Different Approaches to Teaching: Comparing Three Preschool Programs* by Amy Sussna Klein, available online at [http://www.earlychildhoodnews.com/earlychildhood/article_view.aspx?ArticleID=367](http://www.earlychildhoodnews.com/earlychildhood/article_view.aspx?ArticleID=367) as part of the assignment. Look over your assigned curriculum or approach and fill out the Investigation Worksheet. Bring your completed worksheets to the next class.

What have you learned about curricular packages? How do you plan to take what you have learned about curriculum for infants and toddlers?

Continue to think about what you are learning about curriculum and how you will use it in your work with infants and toddlers.

for personnel (teachers, directors and assistants) and group size, adult-child ratio requirements.

**RCVI-2:** Collect a list of two or three early childhood associations (national, regional, state or local), including website addresses, describing the professional resources and membership opportunities they each offer.

**RCVI-3:** Summaries of the legal requirements in your state regarding child abuse and neglect (including contact information for the appropriate agency in your state) and Mandatory Reporting Guidelines

| O | Competency Statement VI To maintain a commitment to professionalism | Begin your Reflective Statement about this Competency Standard with a paragraph describing how your professional practices meet this Standard. Then:

**CSVIIa:** Reflect on why you chose to become an early childhood professional.

**CSVIIb:** Reflect on what you believe are the most important indicators of professionalism that you possess.

Throughout the week, reflect on a team you are part of and answer the following questions: What skills are you using as part of the team? What roles do members of the team play? Are some challengers, are some collaborators, are some contributors, or are some communicators?

Complete the ITNA and bring it to the next session. (For those who have completed the ITNA within the past six months or so, ask them to look... | Professional Development Session A

Safe Supervision

Growing as a Professional Session A

Growing as a Professional Session B |
at it to refresh their memory for next session’s discussion. They could also help others who have not completed the ITNA before.)

| P | Professional Philosophy Statement | The Professional Philosophy Statement is the final reflective task in the creation of your professional portfolio. Here you will summarize your professional beliefs and values about early childhood education after you have completed the professional development experience of designing your portfolio by collecting resources and writing all six reflective statements of competence. The professional philosophy statement should be no more than two pages in length. Identify your personal values and beliefs around teaching and learning: How do you believe young children learn? Based on this, what do you believe your role is? Beyond teaching and learning, reflect and write about what you believe are the other important aspects of your role in the lives of children and families. | Growing as a Professional |
